Phone gutter 24. Card padding 20. Web gutter 36, content max 1120.

Radius

12 Inputs, small

16 Web cards, office card

20 Phone cards, tables

24 Sheets

999 Buttons, badges

Shadows only on overlays (sheet, drawer). Everything else uses hairlines.

Badges

In · Out · Goal met · No recent sync · FYI · Pending review · Approved · Not approved · Corrected

Green only for In and Goal met. Out is neutral. Small size: 24 px.

Buttons

Send code · Check now · Sync now · Use a different email · Sign in · Sending code

One primary (accent) button per view at most. Labels start with a verb. Heights 48, 36, 30.

Days meter, in progress

5 / 8 days — 3 to go

Days meter, goal met

9 / 8 days — Goal met

1 day over the target.

Inline (tables) and hours FYI

5 / 8

9 / 8 Met

Hours today FYI — 2 h 32 m

Suggested 5 h a day. Does not affect days.

Bar fills from 0 once on load (900 ms). Bar is always accent; green appears only in the Goal met badge. No percentage is shown.

Bottom bar, light

Today · Month · Colleagues · You

Bottom bar, dark

Today · Month · Colleagues · You

Colleague row

RK **Rohan Kapoor** — Gurugram, Tower B — In since 9:15 am — In

MD **Meera Das** — Kolkata, Plot Y14 — Out since Fri 5:55 pm — Out

Name, office, since, In or Out. No pin, hours, or days counted.

Roster row

Person	Status, since	Office	Month days	Hours today FYI	Last device

Office card

Kolkata, Plot Y14

Plot Y14, Block EP, Sector V, Salt Lake, Kolkata 700091

Radius **100 m** Counts as **2 days**

Motion

Status change: the status word fades in and rises 6 px over 320 ms; the dot color swaps with it. Days: the bar fills once. Nothing loops except the button spinner while a request is open. Both respect reduced motion.

Flow / Correction request

Lifecycle and rules for correction requests.

Correction request flow

How an employee asks to change one day, and how an admin decides. Totals never change until a request is approved.

Employee, phone or web

1. Open the day

Month, tap a day, Request a correction. Days in a locked month have no button.

Employee

2. Describe the change

Pick the issue, set office and In and Out times, add a reason, review the effect, Send request.

System

3. Pending review

Day shows a dashed outline. Admins see it in Corrections with a count. Employee can Cancel request.

Admin, web only

4. Review

Recorded vs requested, reason, phone sync for that day, effect on the month. Can edit before approving.

5a. Approve — ✓ Approved

The day is updated and marked Corrected. Month, roster and reports recalculate. The original record and who approved it are kept. Employee gets a notification.

5b. Reject — Not approved

A note is required. The day stays as recorded. Employee sees the note and can send a new request while the window is open.

Rules

- One open request per day. To change it, cancel it and send a new one.
- Requests close 5 days after month end (set in Rules). After that the month is locked for everyone.
- Any admin can decide, except on their own requests.
- Pending requests never change days counted, the roster or reports.
- Every decision stores who, when, the note, and the before and after values. Person visits shows Corrected rows.
- Admins never see coordinates in a review. Only office, times, and phone sync times.

Flow / View as another user

Modes and rules for admin impersonation on the phone.

View as another user

Admins can use one phone to see the app as any non-admin user. Real users are read only so no one can record attendance for someone else. Test accounts work fully.

Real user (read only)

Sees Today, Month, Colleagues and You exactly as the user would. Tracking and sync from this phone pause. Corrections, sharing, device sign out, and Check now are disabled.

Test account (full)

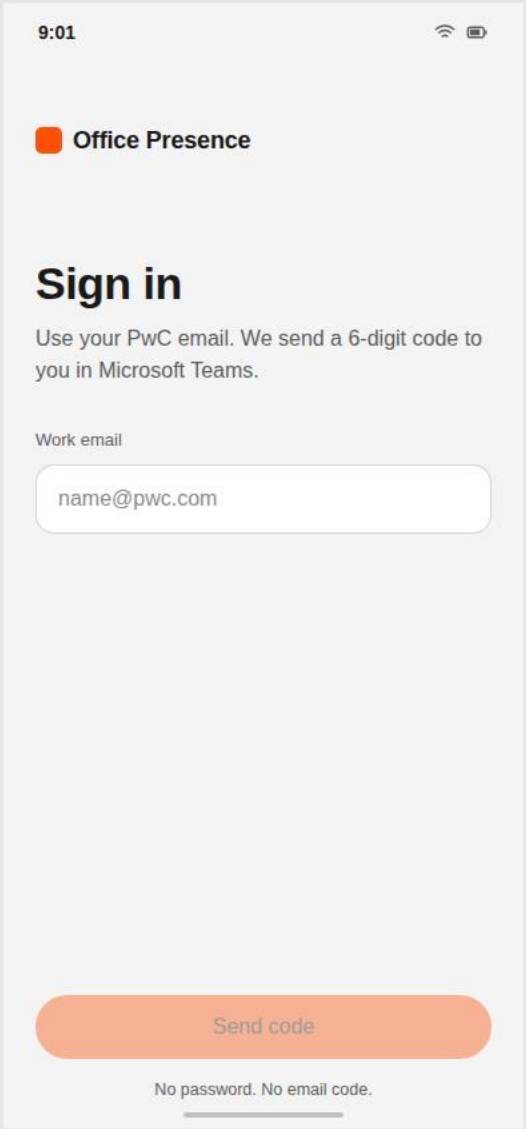

Everything works, including tracking from this phone. Visits are stored with a test flag and never count in the roster, reports, or another person's days.

Rules

- Only admins see "View as another user". Other admins cannot be selected.
- A session lasts at most 30 minutes, ends on End, on app restart, or on sign out.
- The dark banner stays on every screen of the session and cannot be dismissed.
- Each session logs admin, user, start, end, and mode. It appears on the user's record in Users.
- The server issues a separate session token for the viewed user. The admin's own token is kept and restored on End.
- Only users marked Test account in Users can be used in full mode.

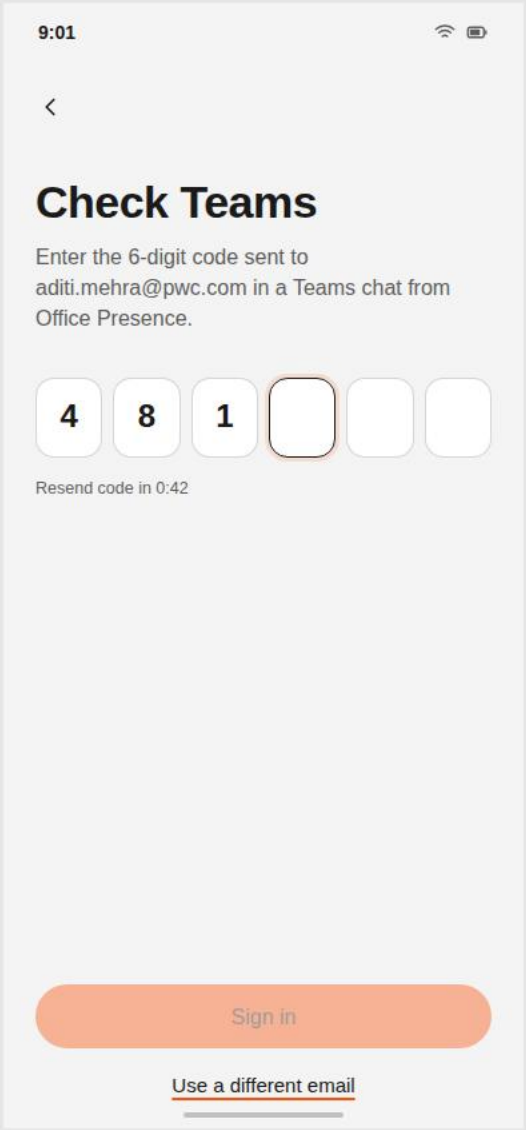

P / Login / Email

Empty state. Send code stays disabled until the address ends in @pwc.com.

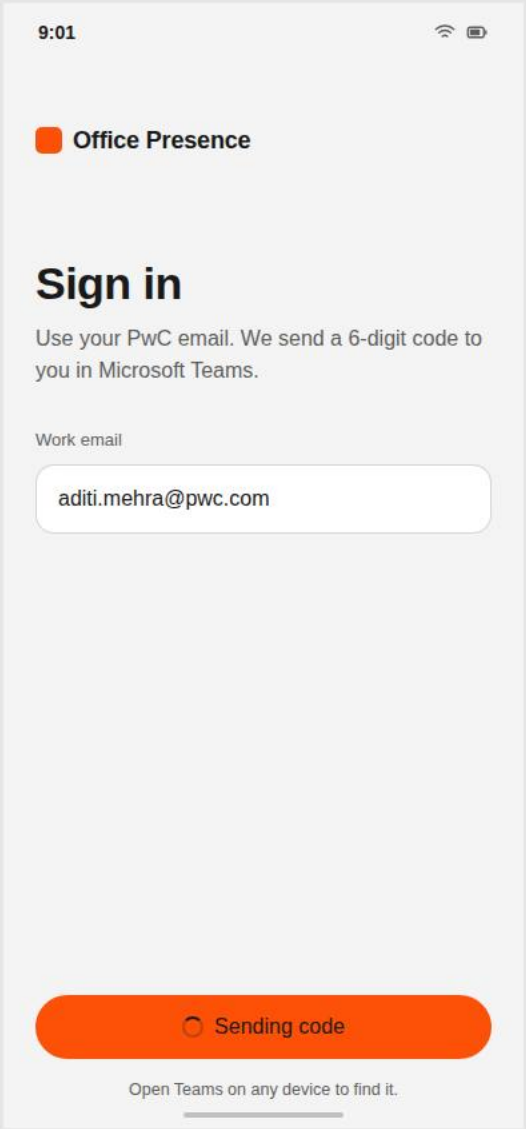

P / Login / Code

Accept a pasted 6-digit code into all boxes. Sign in enables at 6 digits.

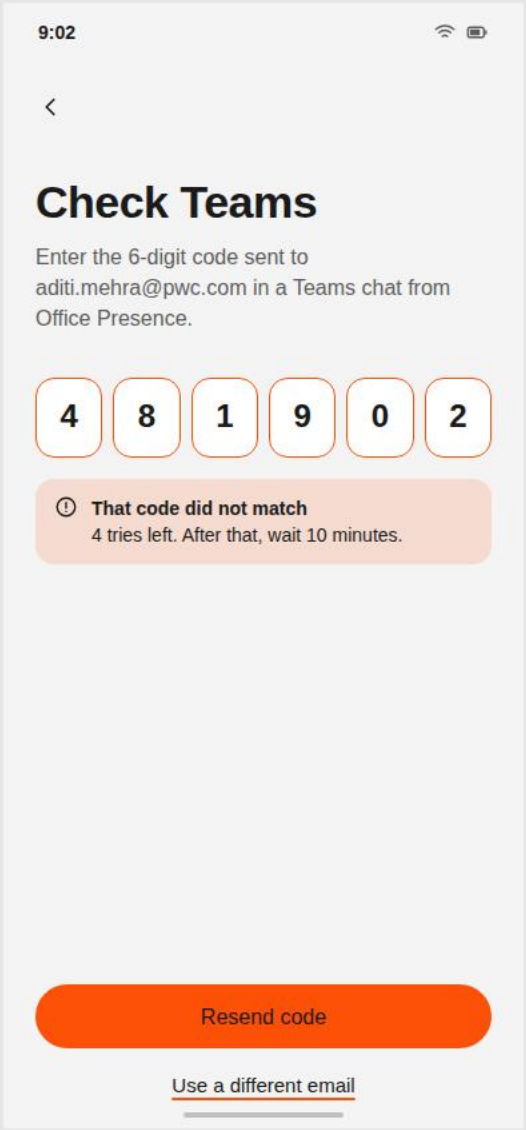

P / Login / Sending code

Loading. Button keeps its width; the field locks until the request returns.

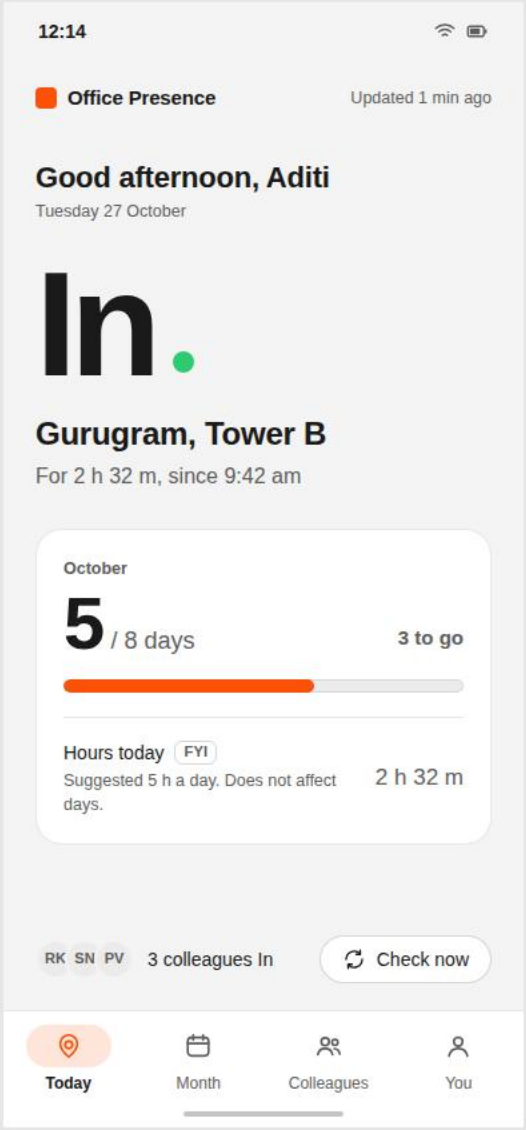

P / Login / Code failed

Error. Boxes clear on the next keystroke. Tries left comes from the server.

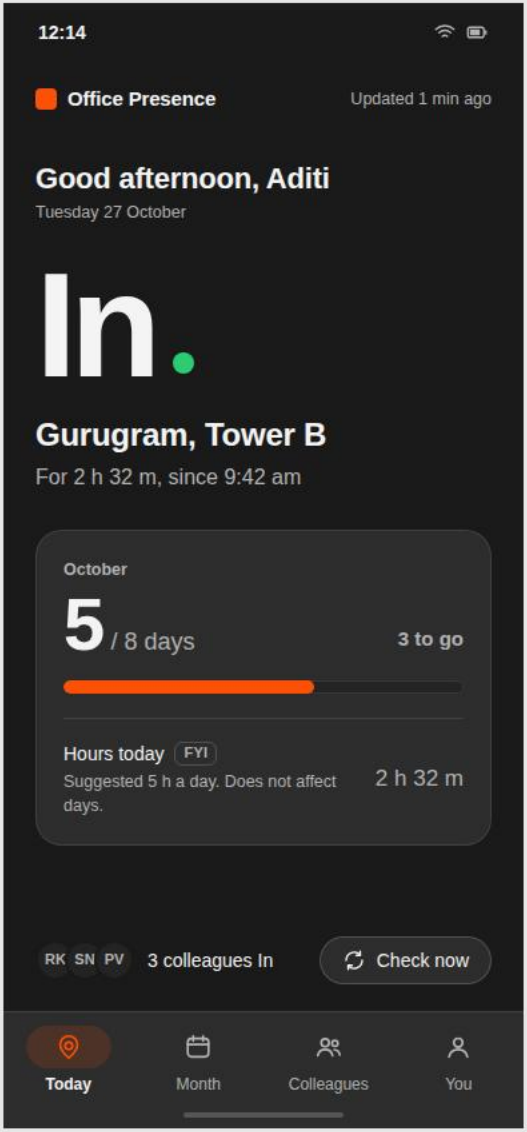

P / Today / In

Greeting uses preferred name, else first name; morning before 12, afternoon 12 to 5, evening after 5 (Asia/Kolkata). "For 2 h 32 m" is time since the last change, not hours today. Hours today sits in the FYI row.

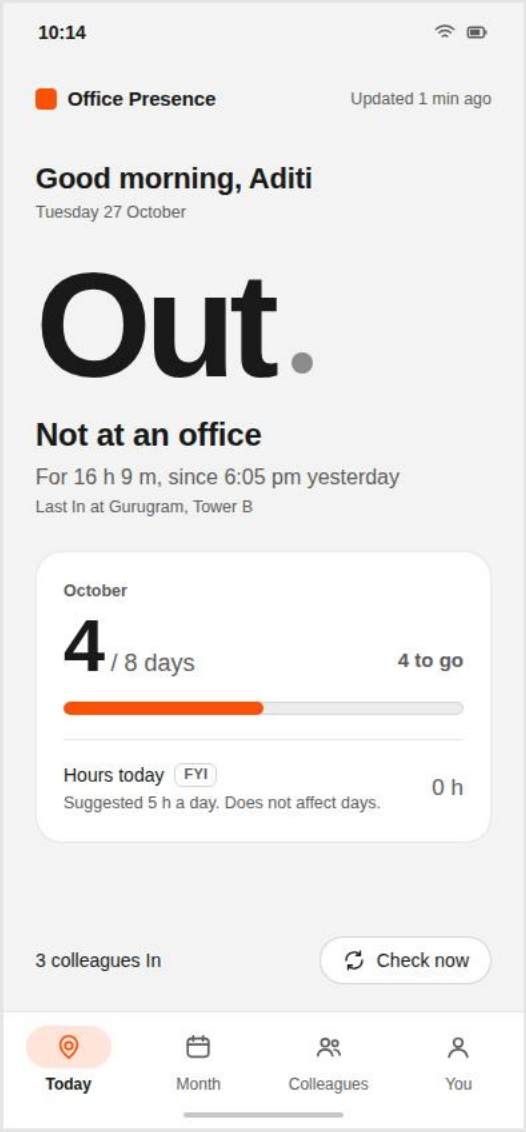

P / Today / In / Dark

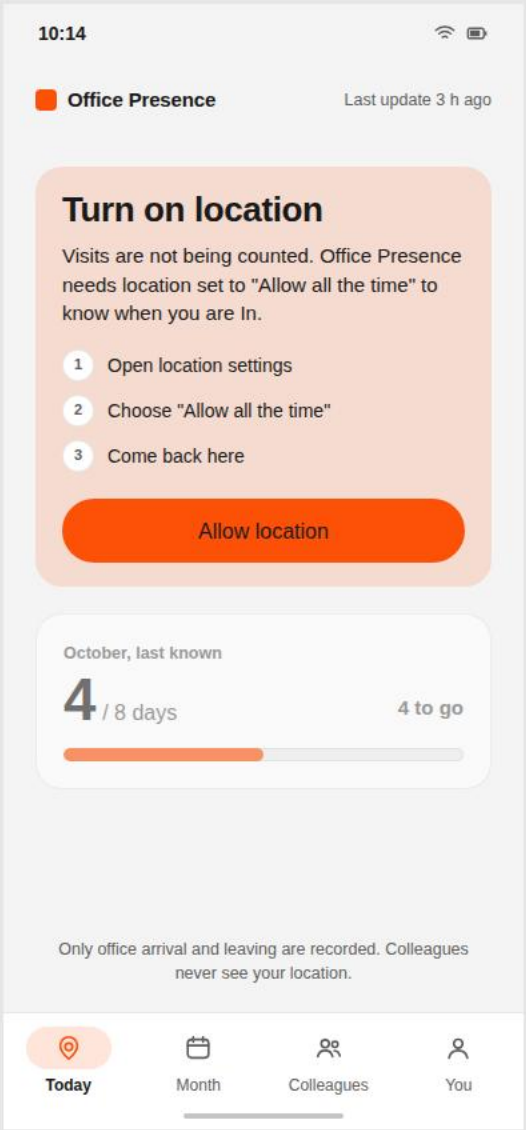

P / Today / Out

Out uses the neutral dot. Never red, never an alert.

P / Today / Permissions needed

Replaces the status block until location is "all the time". Meter shows last known values at 60% opacity.

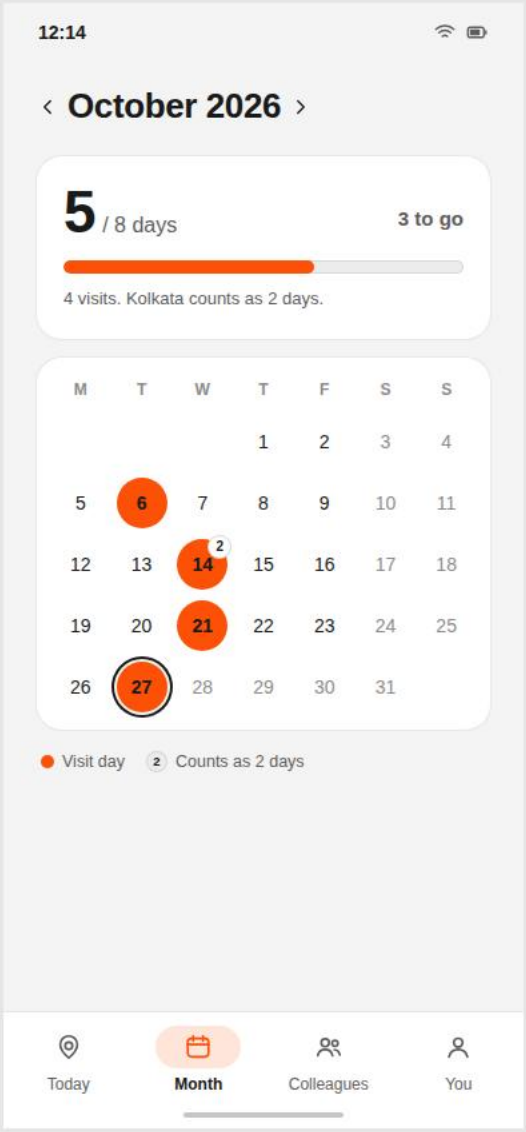

P / Today / Loading

Static skeleton, no shimmer. Show the last cached status instead if it is under 10 minutes old.

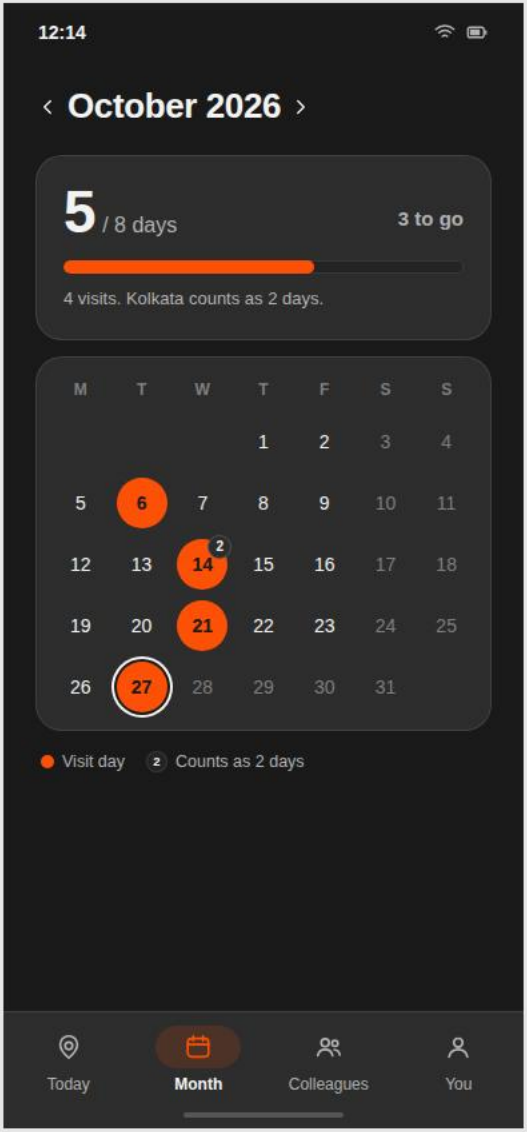

P / Month / In progress

A small "2" marks offices that count as 2 days. Tap a day to open the sheet.

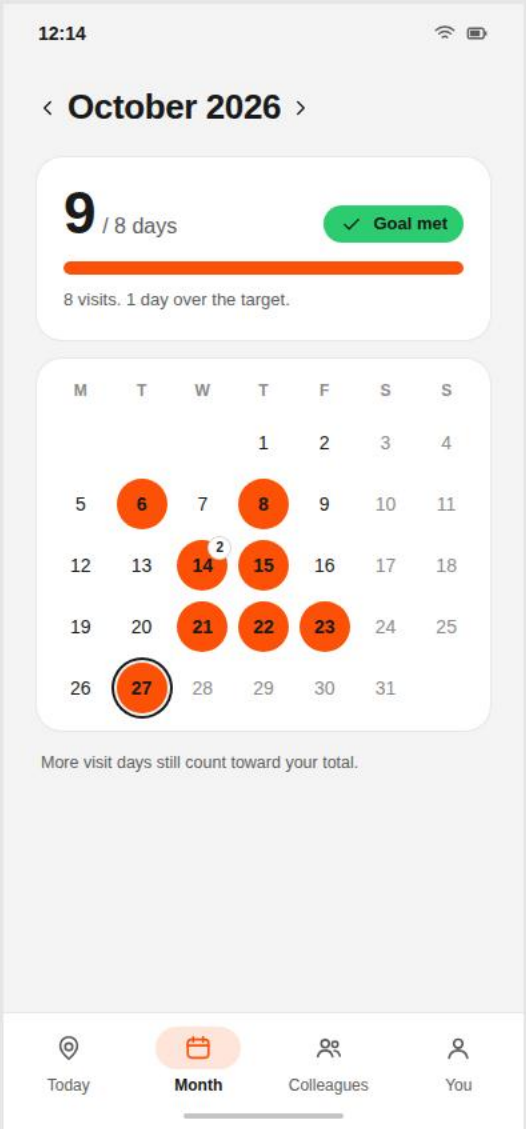

P / Month / In progress / Dark

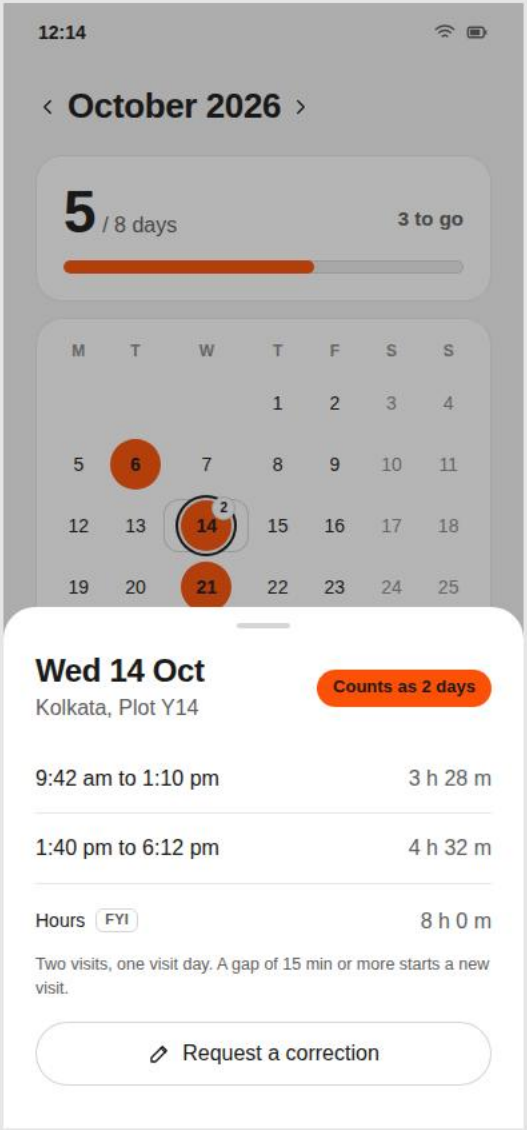

P / Month / Goal met

Bar stays accent at 100%. Only the badge is green. Days over target show as a total, not as extra bar.

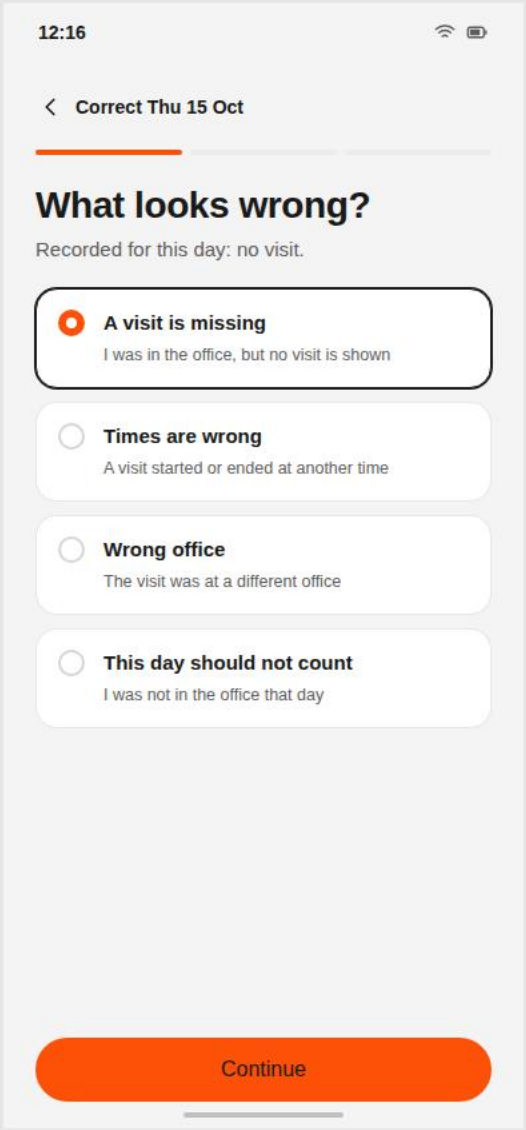

P / Month / Day detail

Bottom sheet over Month. Hours are reference only.

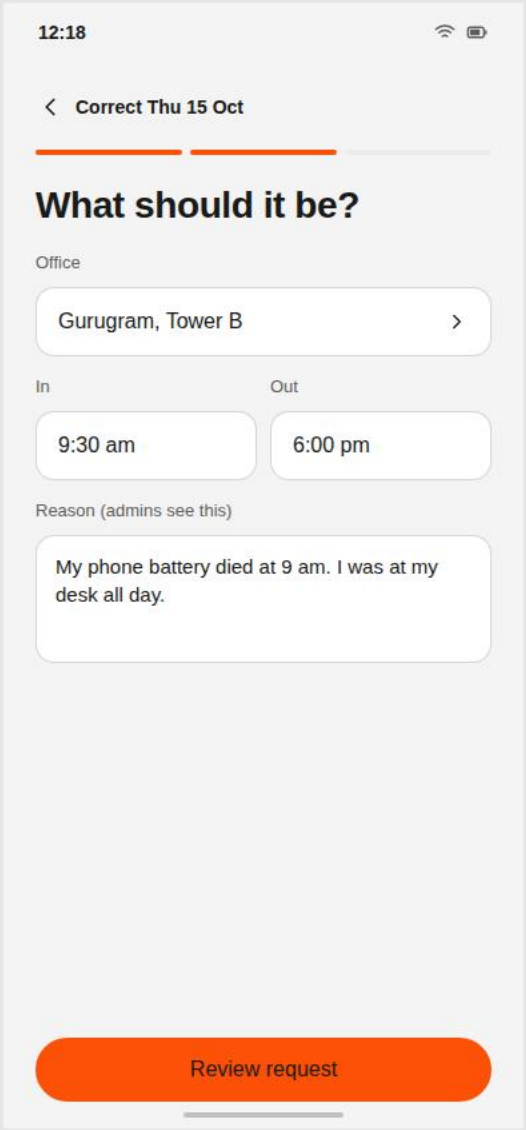

P / Correction / Choose issue

Step 1 of 3. Preselect "A visit is missing" when the day has no visit.

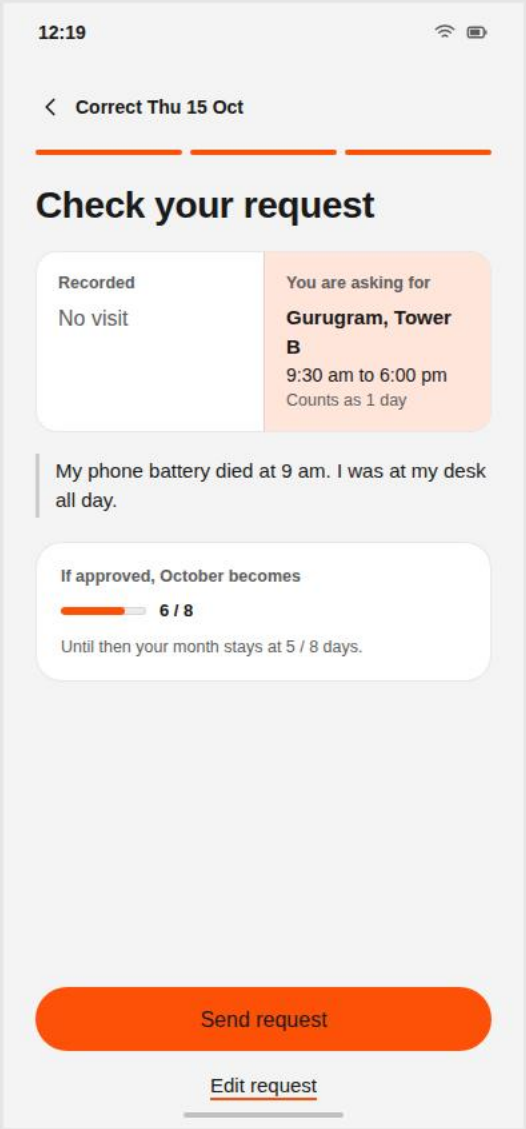

P / Correction / Edit day

Office list shows only active offices. Out must be after In, same day, Asia/Kolkata.

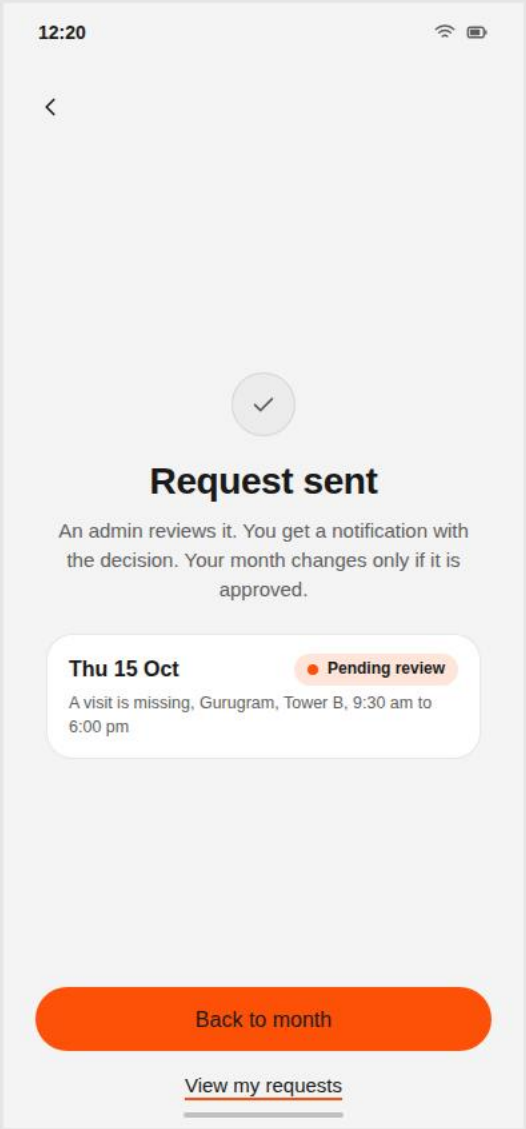

P / Correction / Review and send

Effect is computed by the server with the office day value, not by the app.

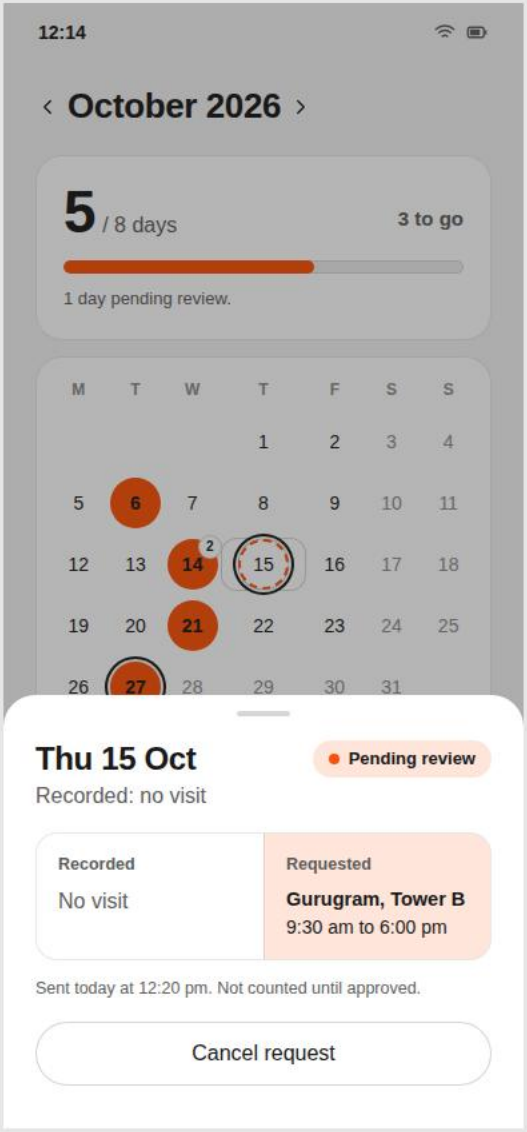

P / Correction / Sent

Totals do not change here.

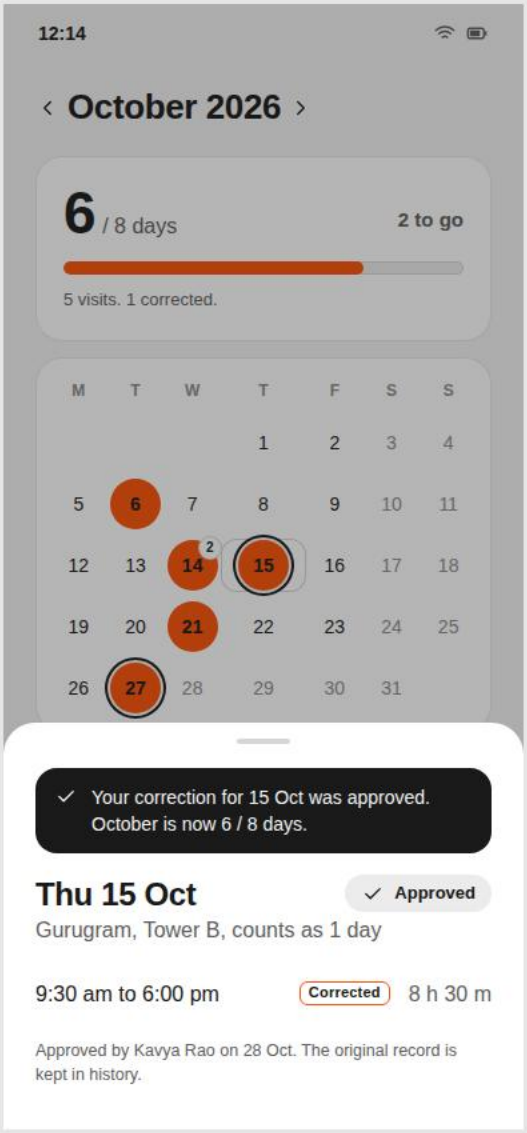

P / Month / Day pending

Dashed outline means pending. The day is not filled until approved.

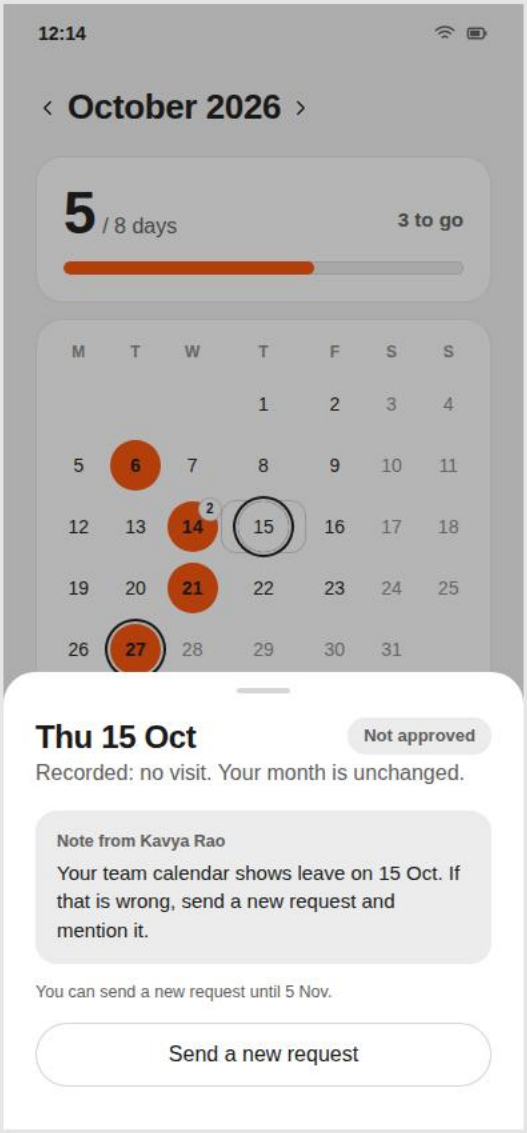

P / Correction / Approved

Toast shows once, from the push notification. Days bar refills from 5 to 6.

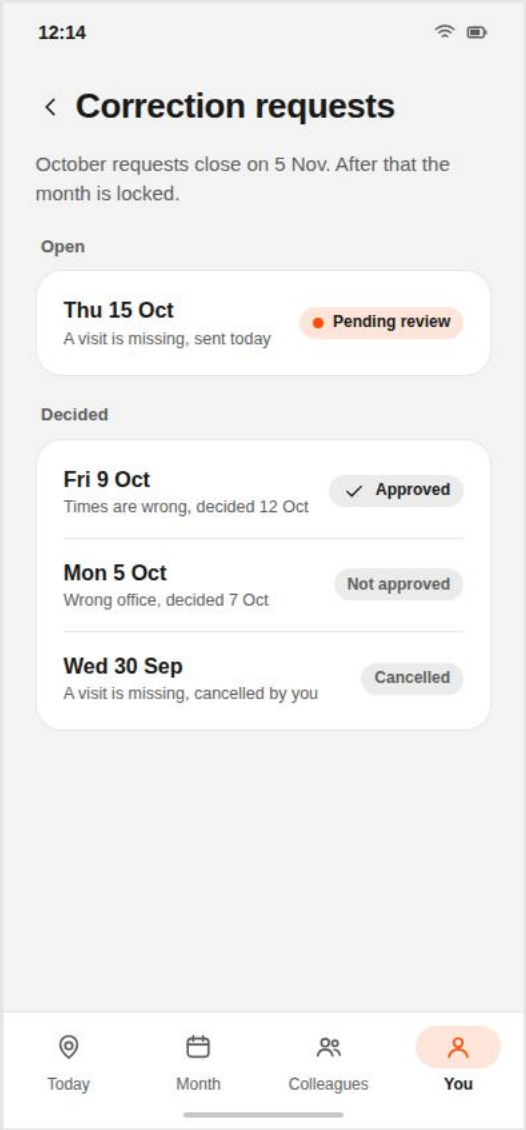

P / Correction / Not approved

Admin note is shown verbatim. New request is offered only while the window is open.

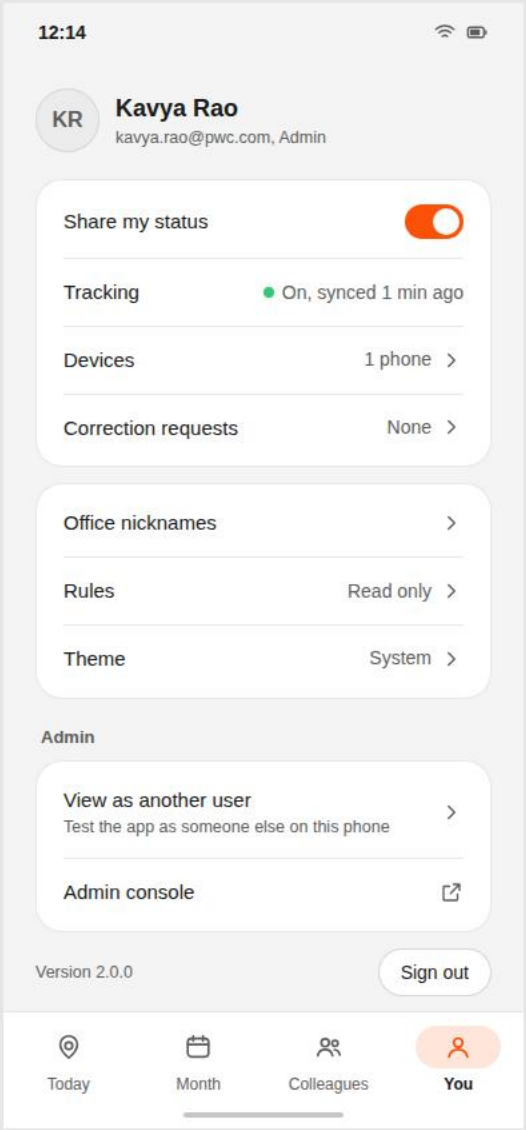

P / You / Correction requests

Reached from You. Tapping a row opens that day in Month.

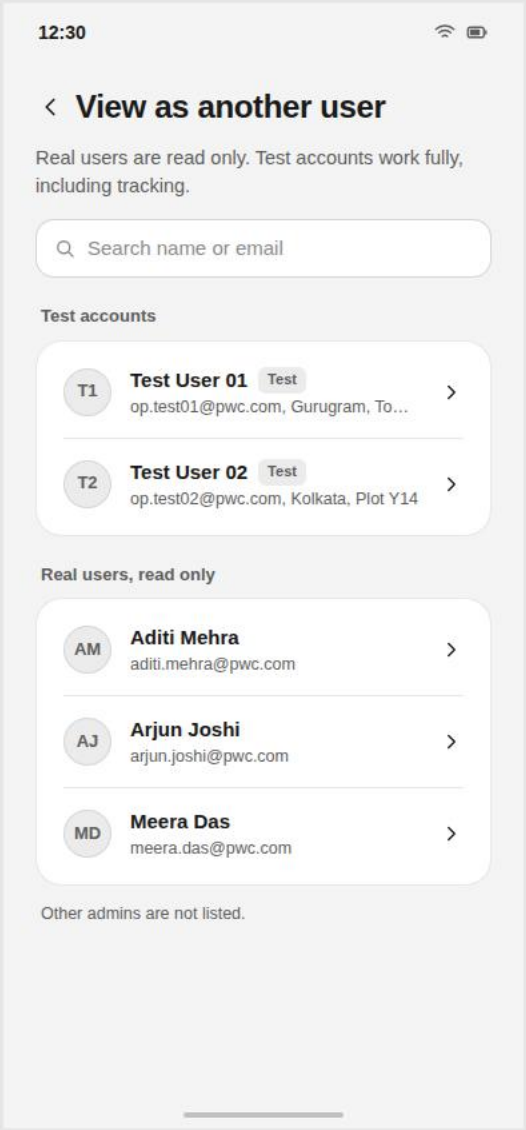

P / You / Settings (Admin)

The Admin group renders only when the signed-in user is an admin.

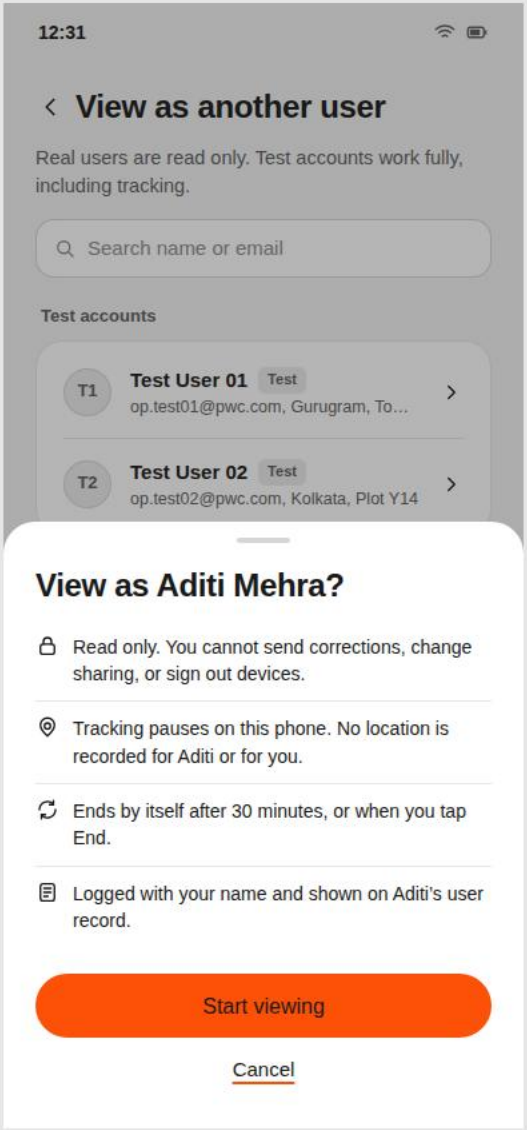

P / View as / Choose user

List comes from the server and already excludes admins and deactivated users.

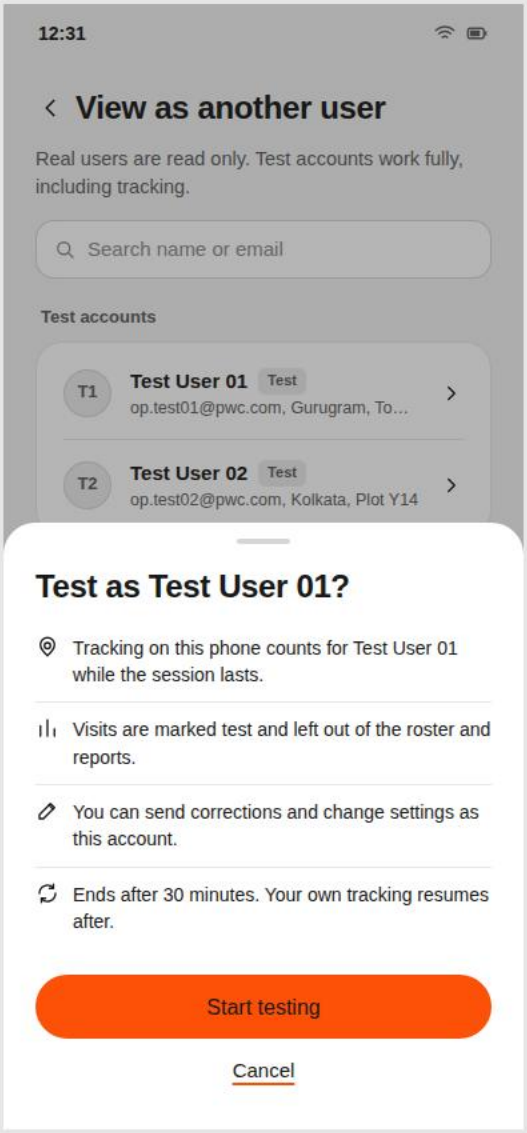

P / View as / Confirm

Real user: read only. Start pauses this phone's tracking before switching.

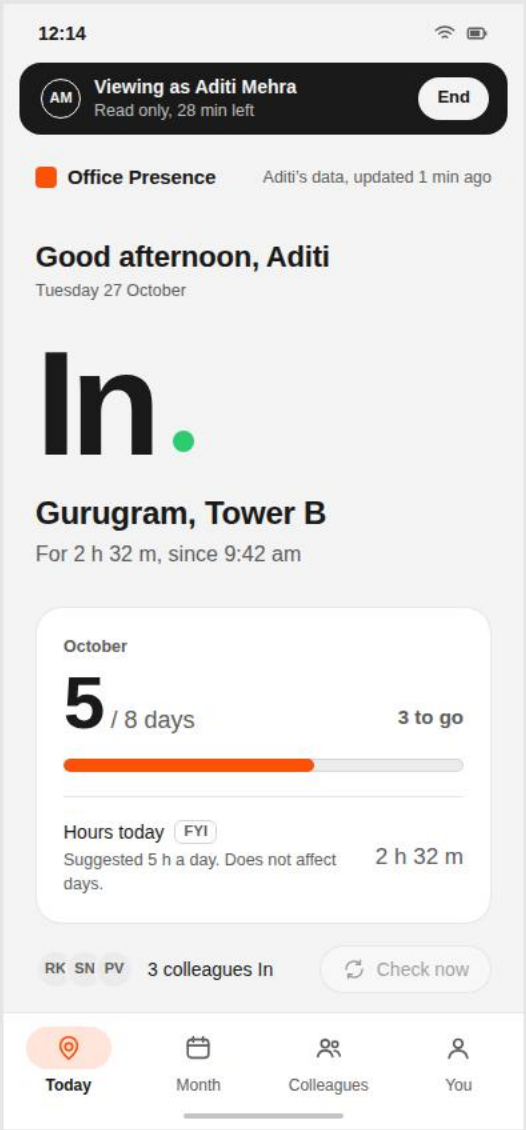

P / View as / Confirm test account

Only for users flagged Test account.

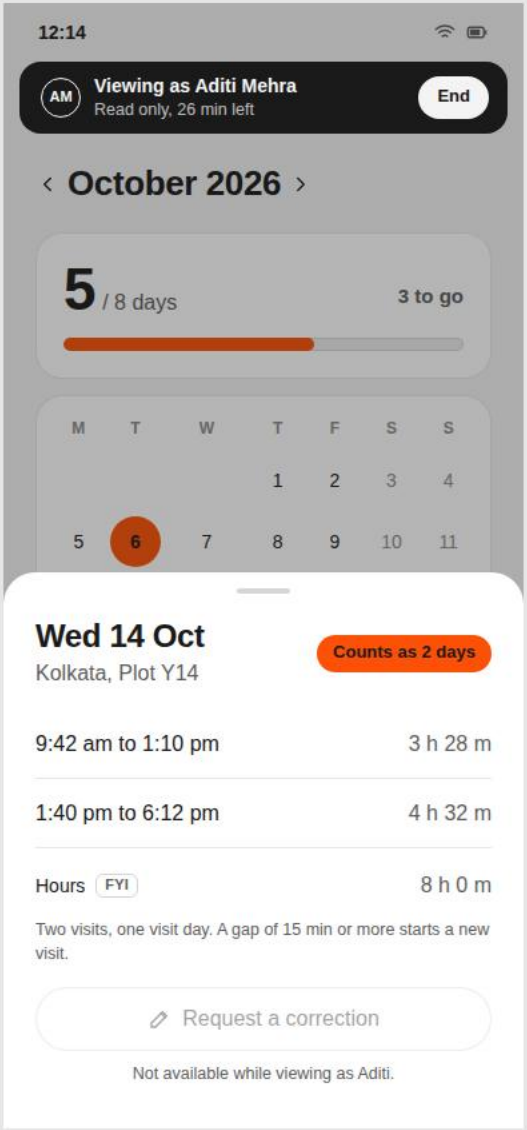

P / View as / Today

Banner sits above every screen in the session. Write actions are disabled, not hidden, so the layout matches the real user's.

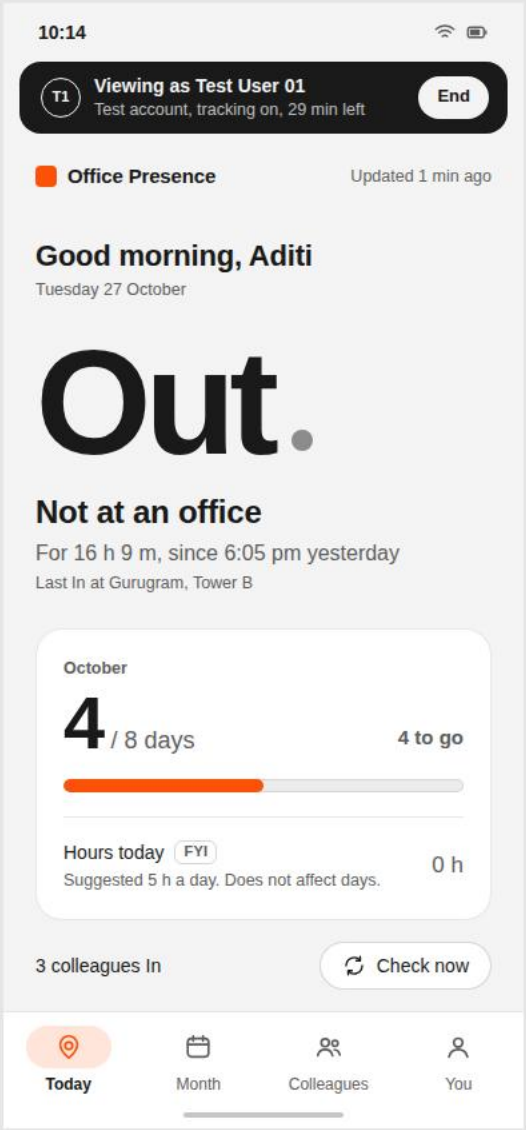

P / View as / Month read only

Disabled actions say why in one line.

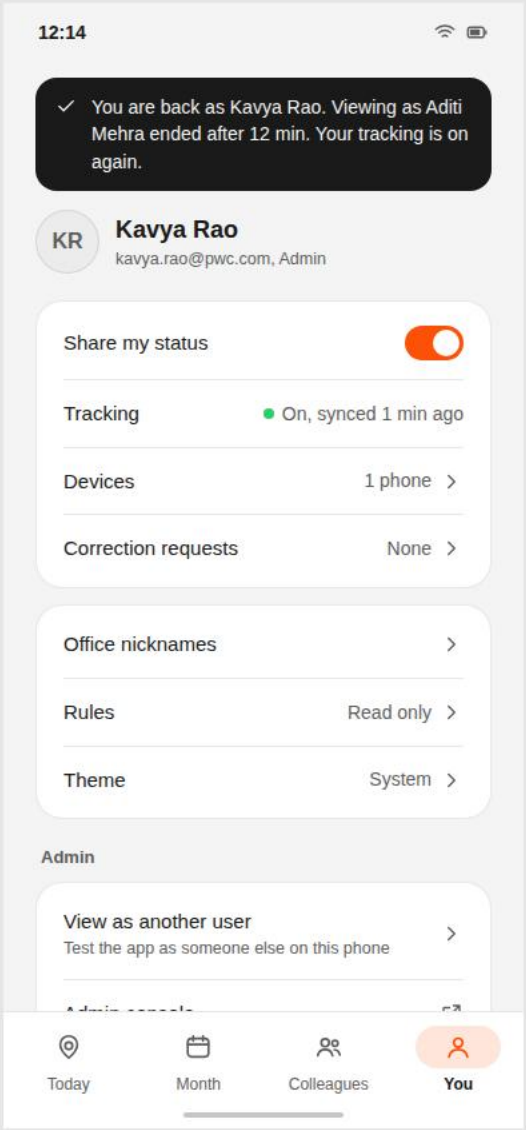

P / View as / Test account

Check now works here because test mode records tracking.

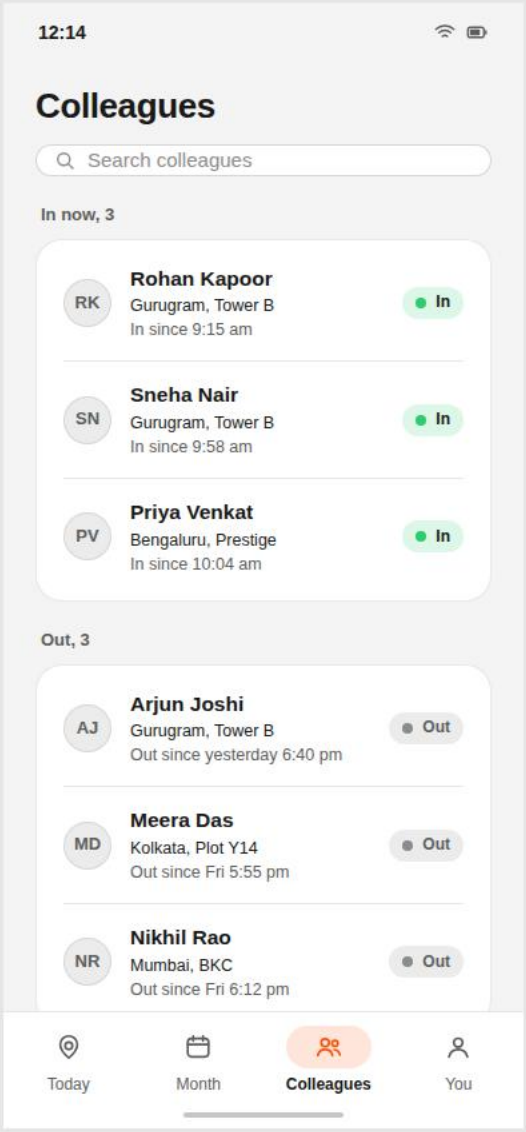

P / View as / Ended

Toast after End or the 30 min timeout. Restore the admin token, then resume tracking.

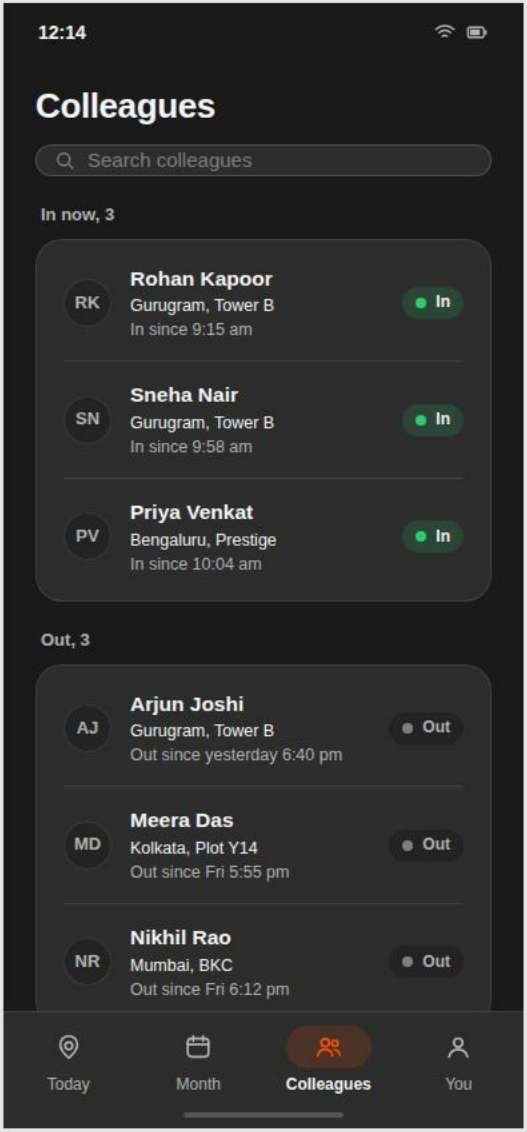

P / Colleagues / List

In first, sorted by since. Out shows the office of the last visit.

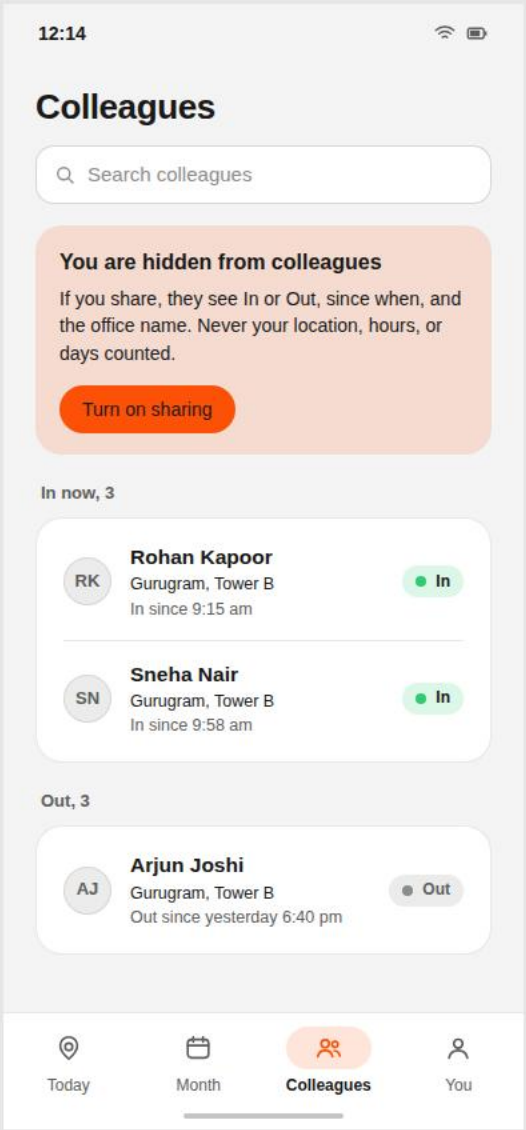

P / Colleagues / List / Dark

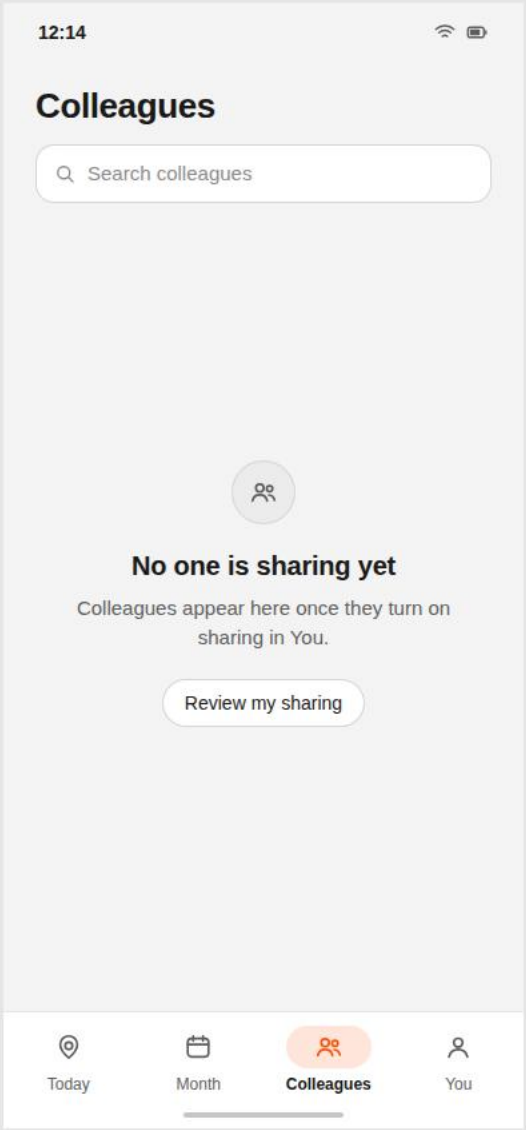

P / Colleagues / Opted out

Shown when your own sharing is off. If the backend hides others in that case, drop the list and keep the banner.

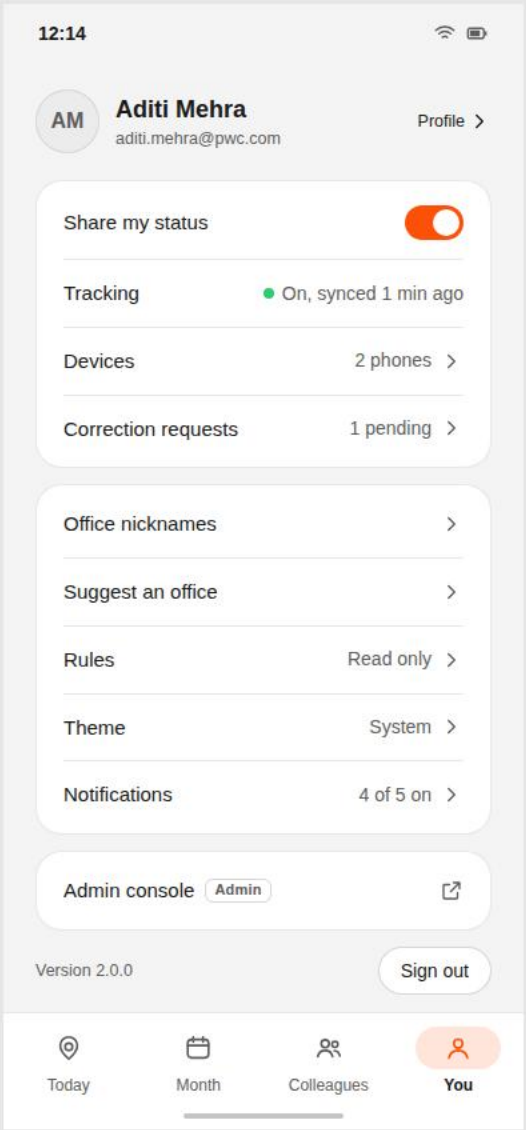

P / Colleagues / Empty

Nobody shares with you yet. The button goes to You, sharing.

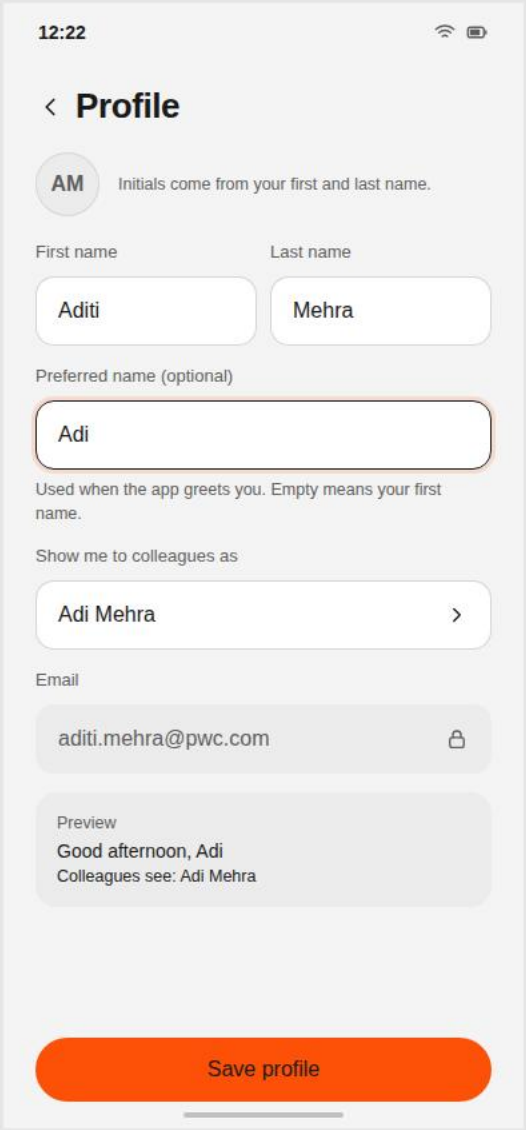

P / You / Settings

Admin console row renders only for admins and opens the web roster in the browser. Tap Version 7 times for Developer.

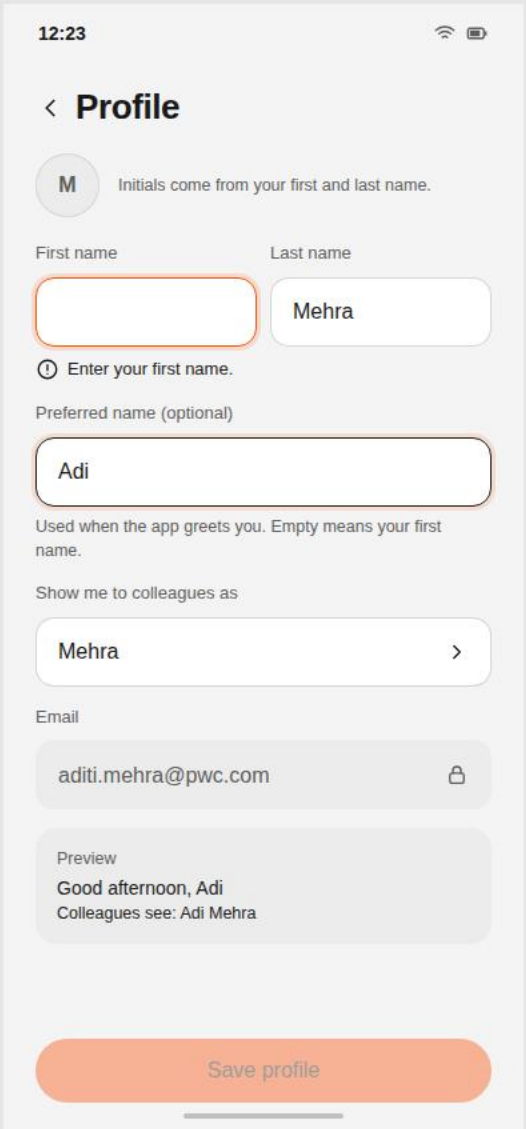

P / You / Profile

Save updates greeting and colleague name everywhere. Email is read only.

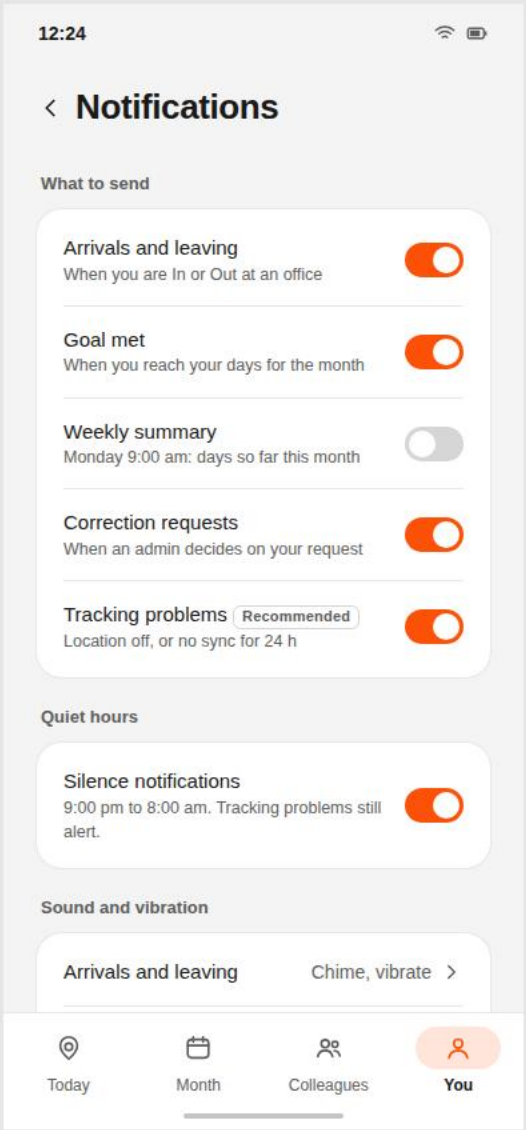

P / You / Profile / Error

First and last name required, 1 to 40 characters each. Preferred name optional, up to 30.

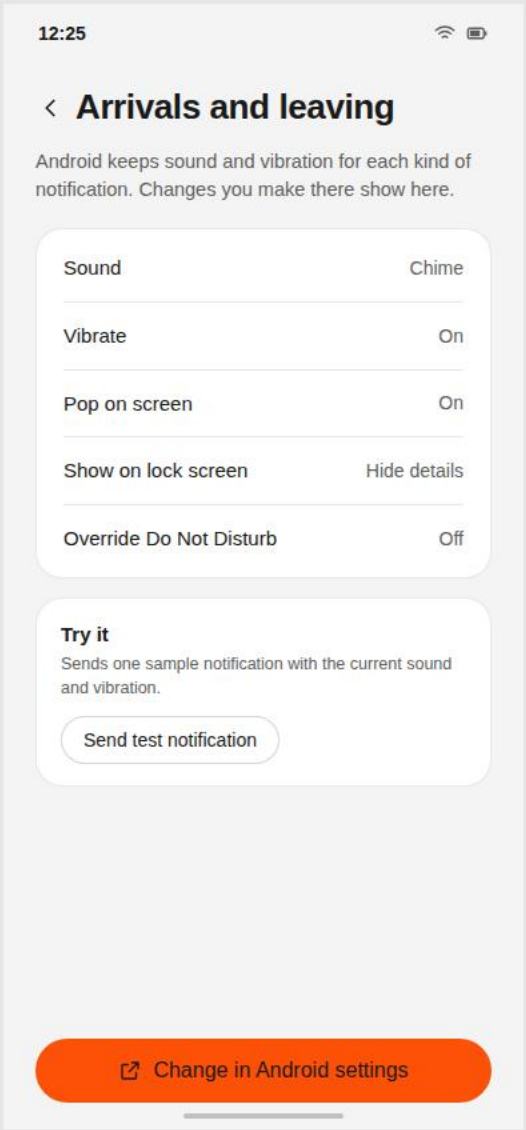

P / You / Notifications

One Android notification channel per row. Switches map to channel enabled, stored on the server too.

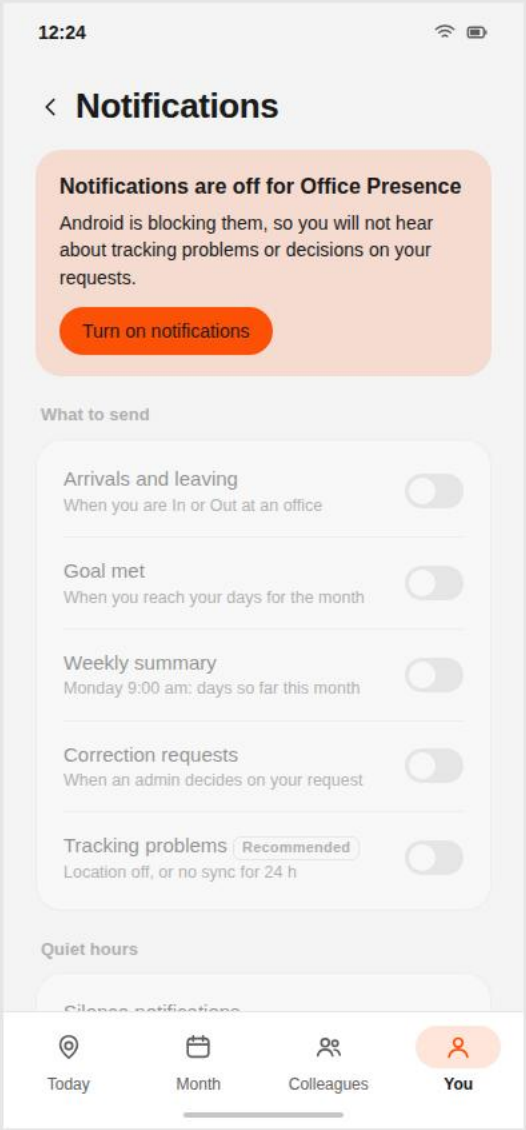

P / You / Notifications / Sound and vibration

Values are read from the NotificationChannel. The button opens ACTION_CHANNEL_NOTIFICATION_SETTINGS.

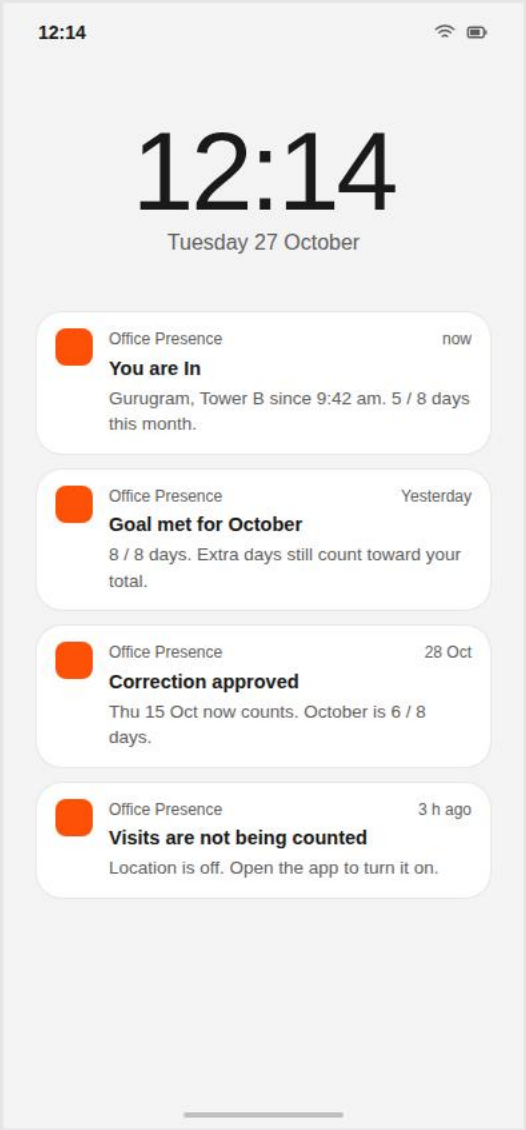

P / You / Notifications / Permission off

Shown when POST_NOTIFICATIONS is denied or the app is blocked.

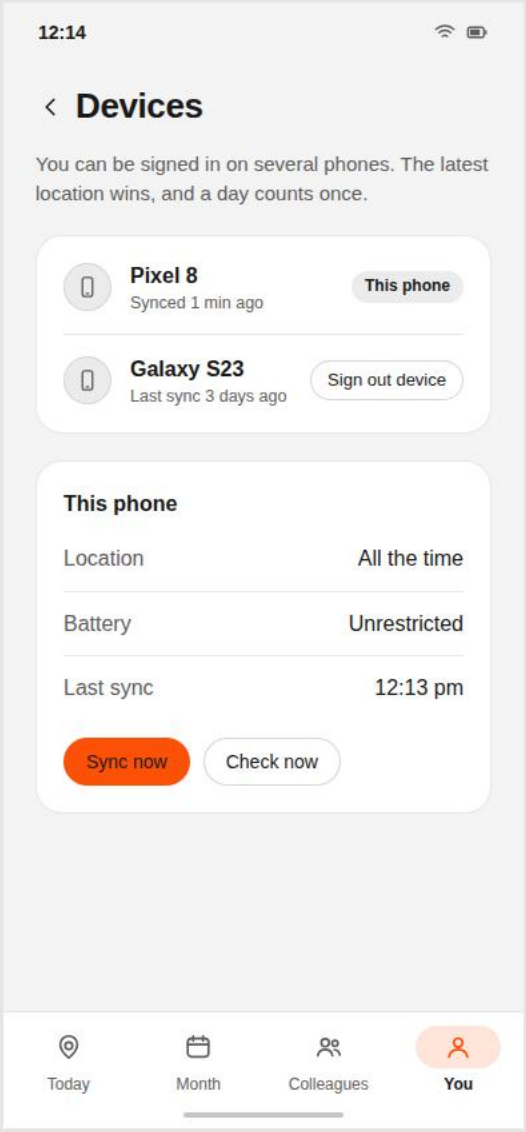

P / Notifications / Lock screen

Copy for each notification type. Lock screen hides details by default.

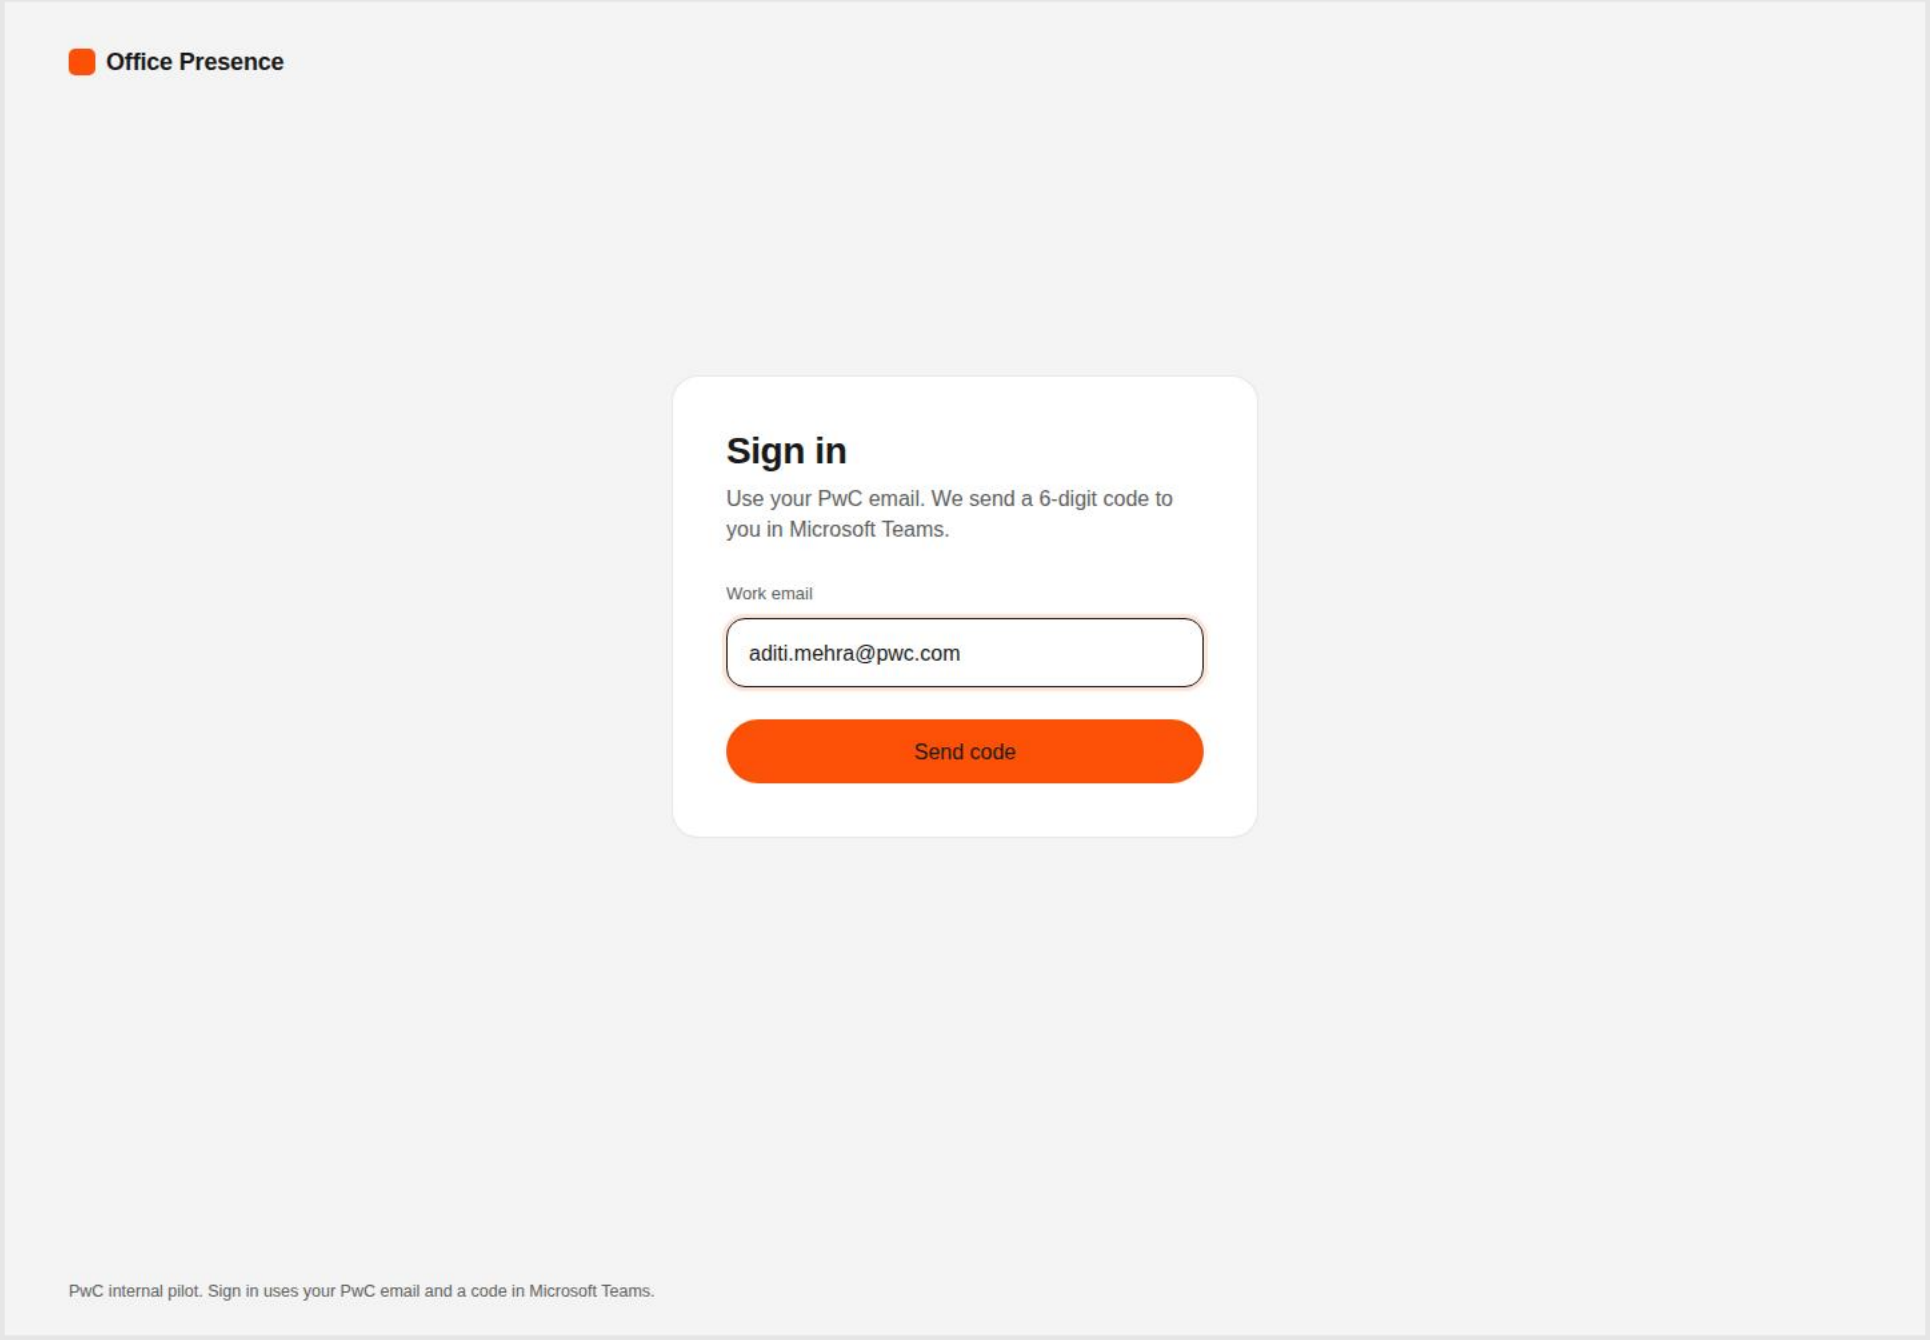

P / You / Devices

Sync now and Check now live here, not on a hidden screen.

W / Login

Same two steps as the phone. Code step reuses W / Login / Code failed layout without the error.

W / Login / Sending code

Loading.

Office Presence

Sign in

Use your PwC email. We send a 6-digit code to you in Microsoft Teams.

Work email

aditi.mehra@pwc.com

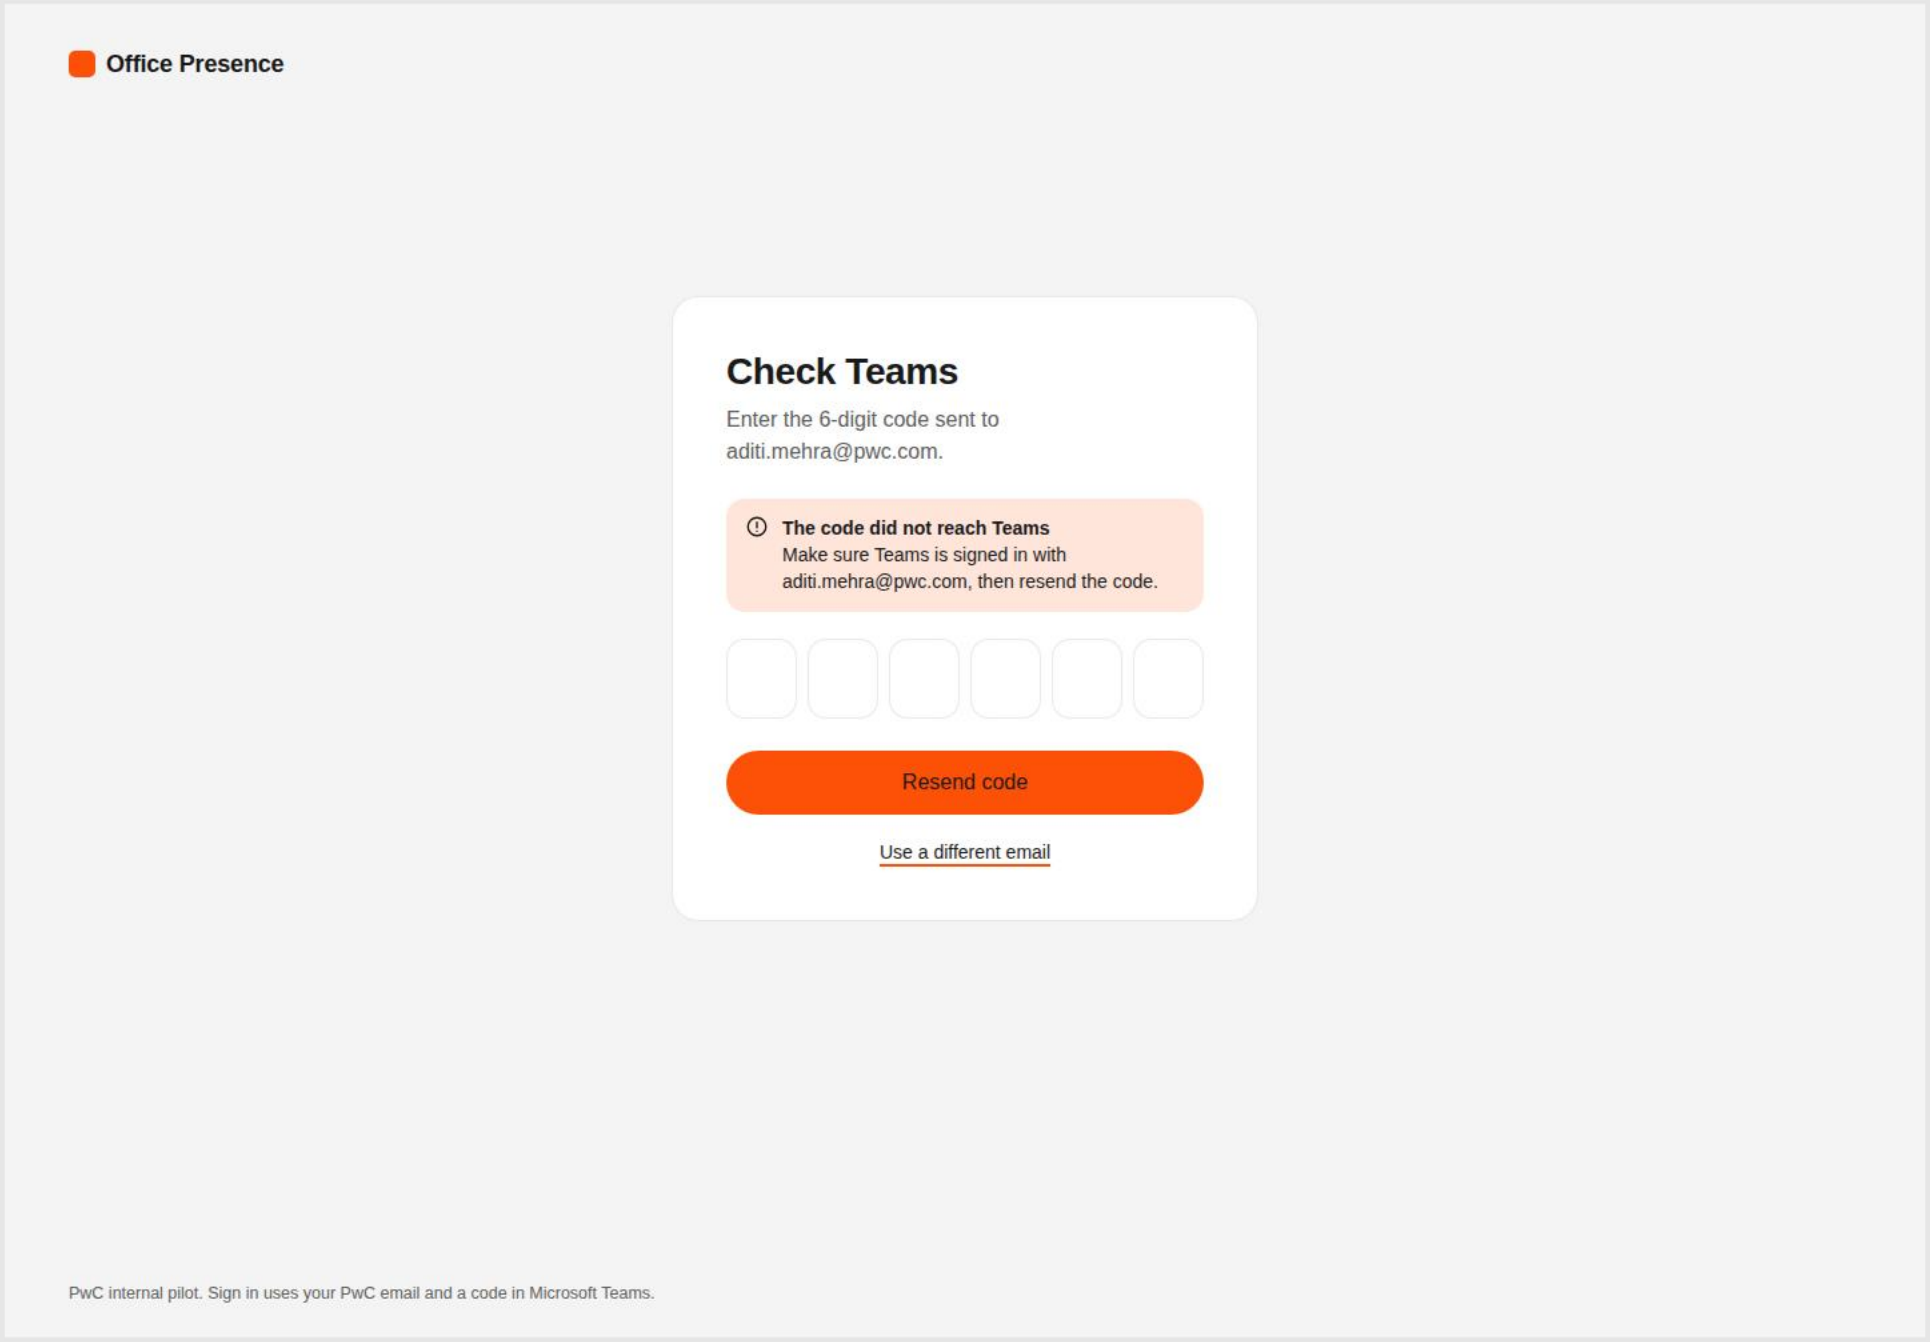

Sending code

Look for a chat from Office Presence in Teams.

PwC internal pilot. Sign in uses your PwC email and a code in Microsoft Teams.

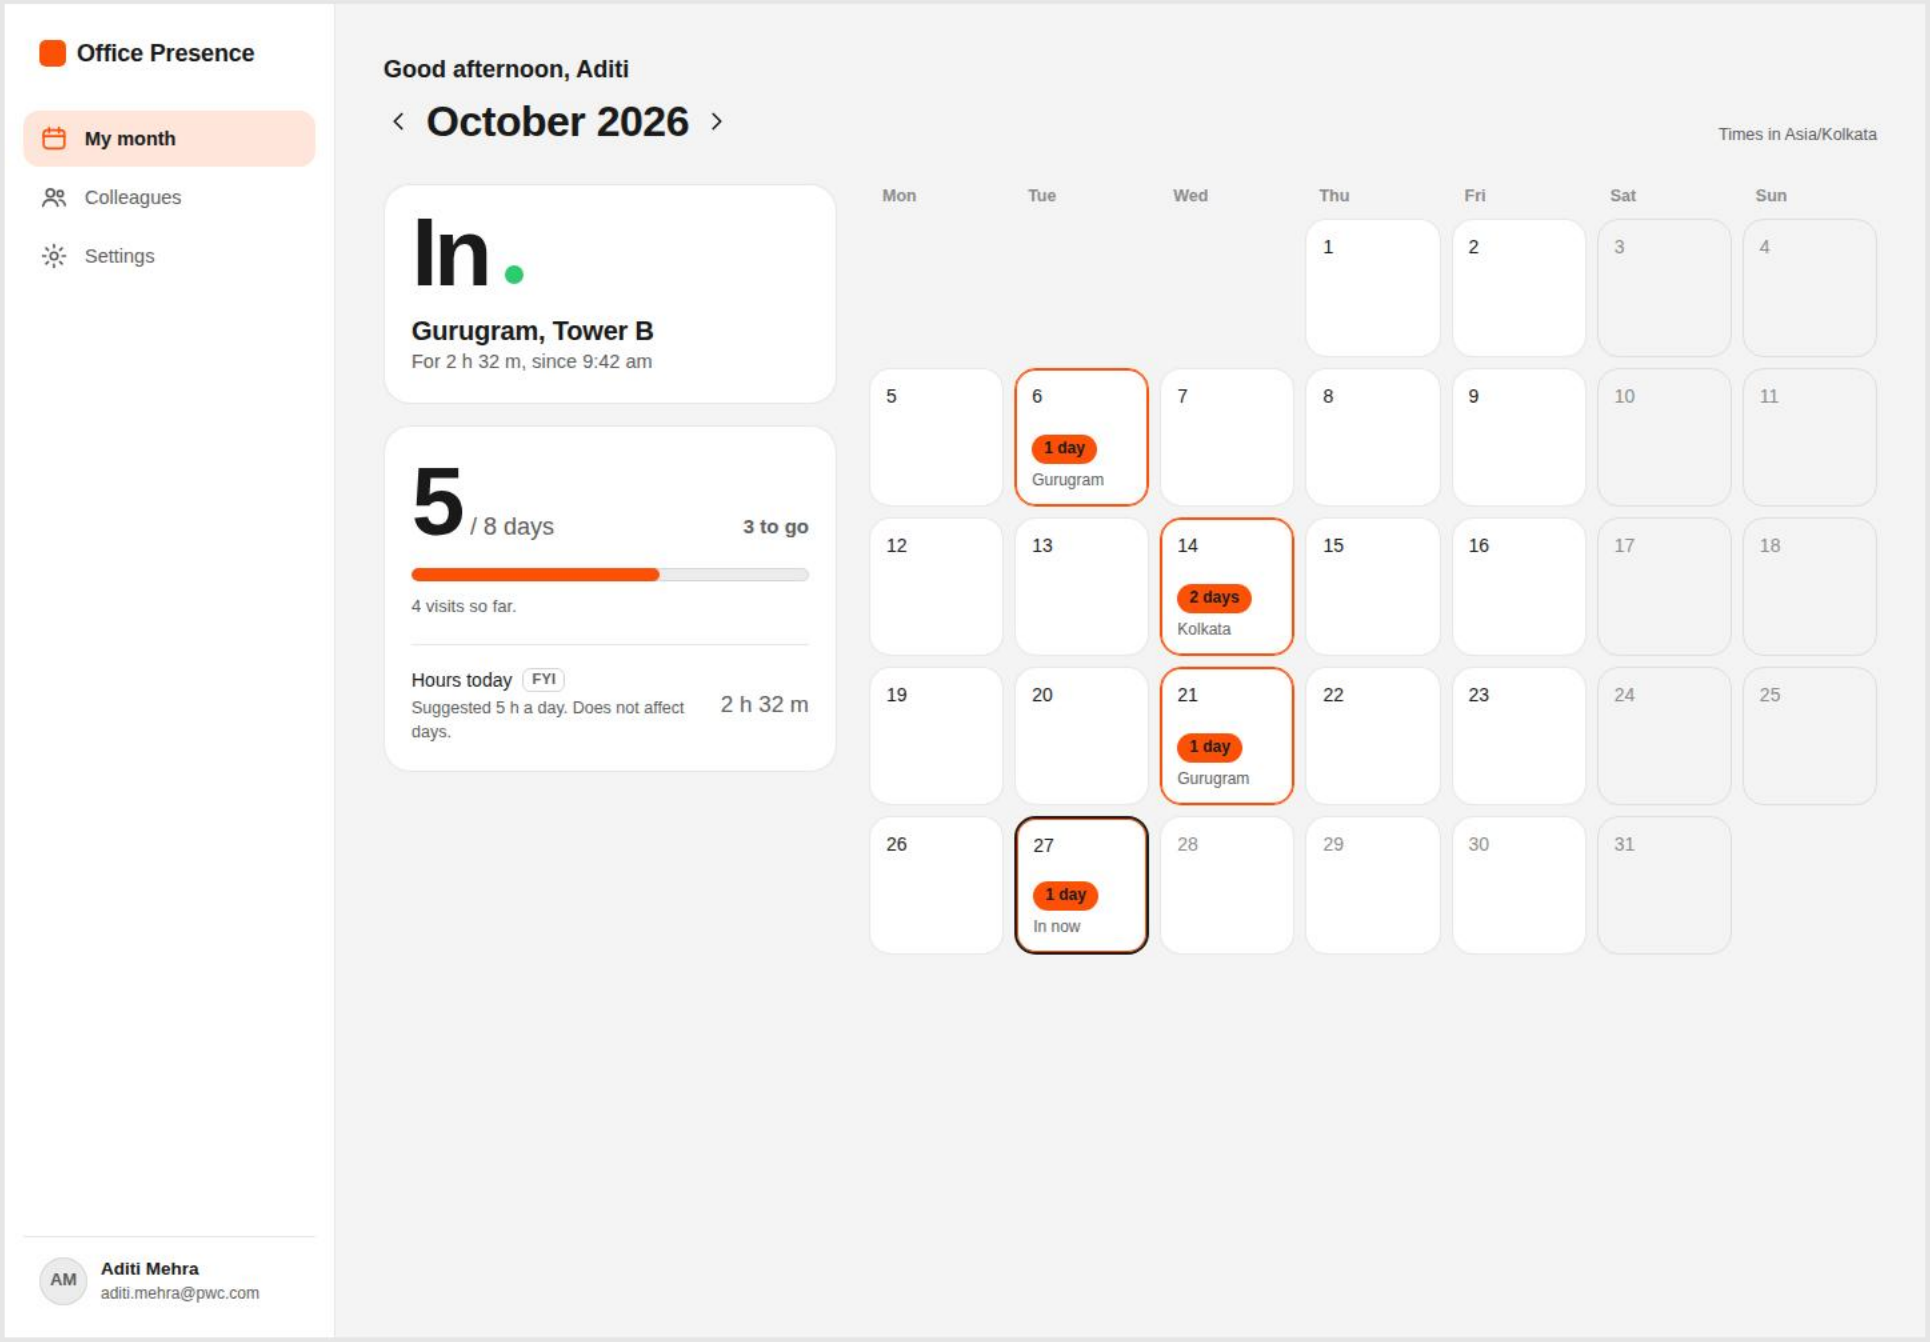

W / Login / Code failed

Error when Teams delivery fails. A wrong code uses the phone pattern: "That code did not match. N tries left."

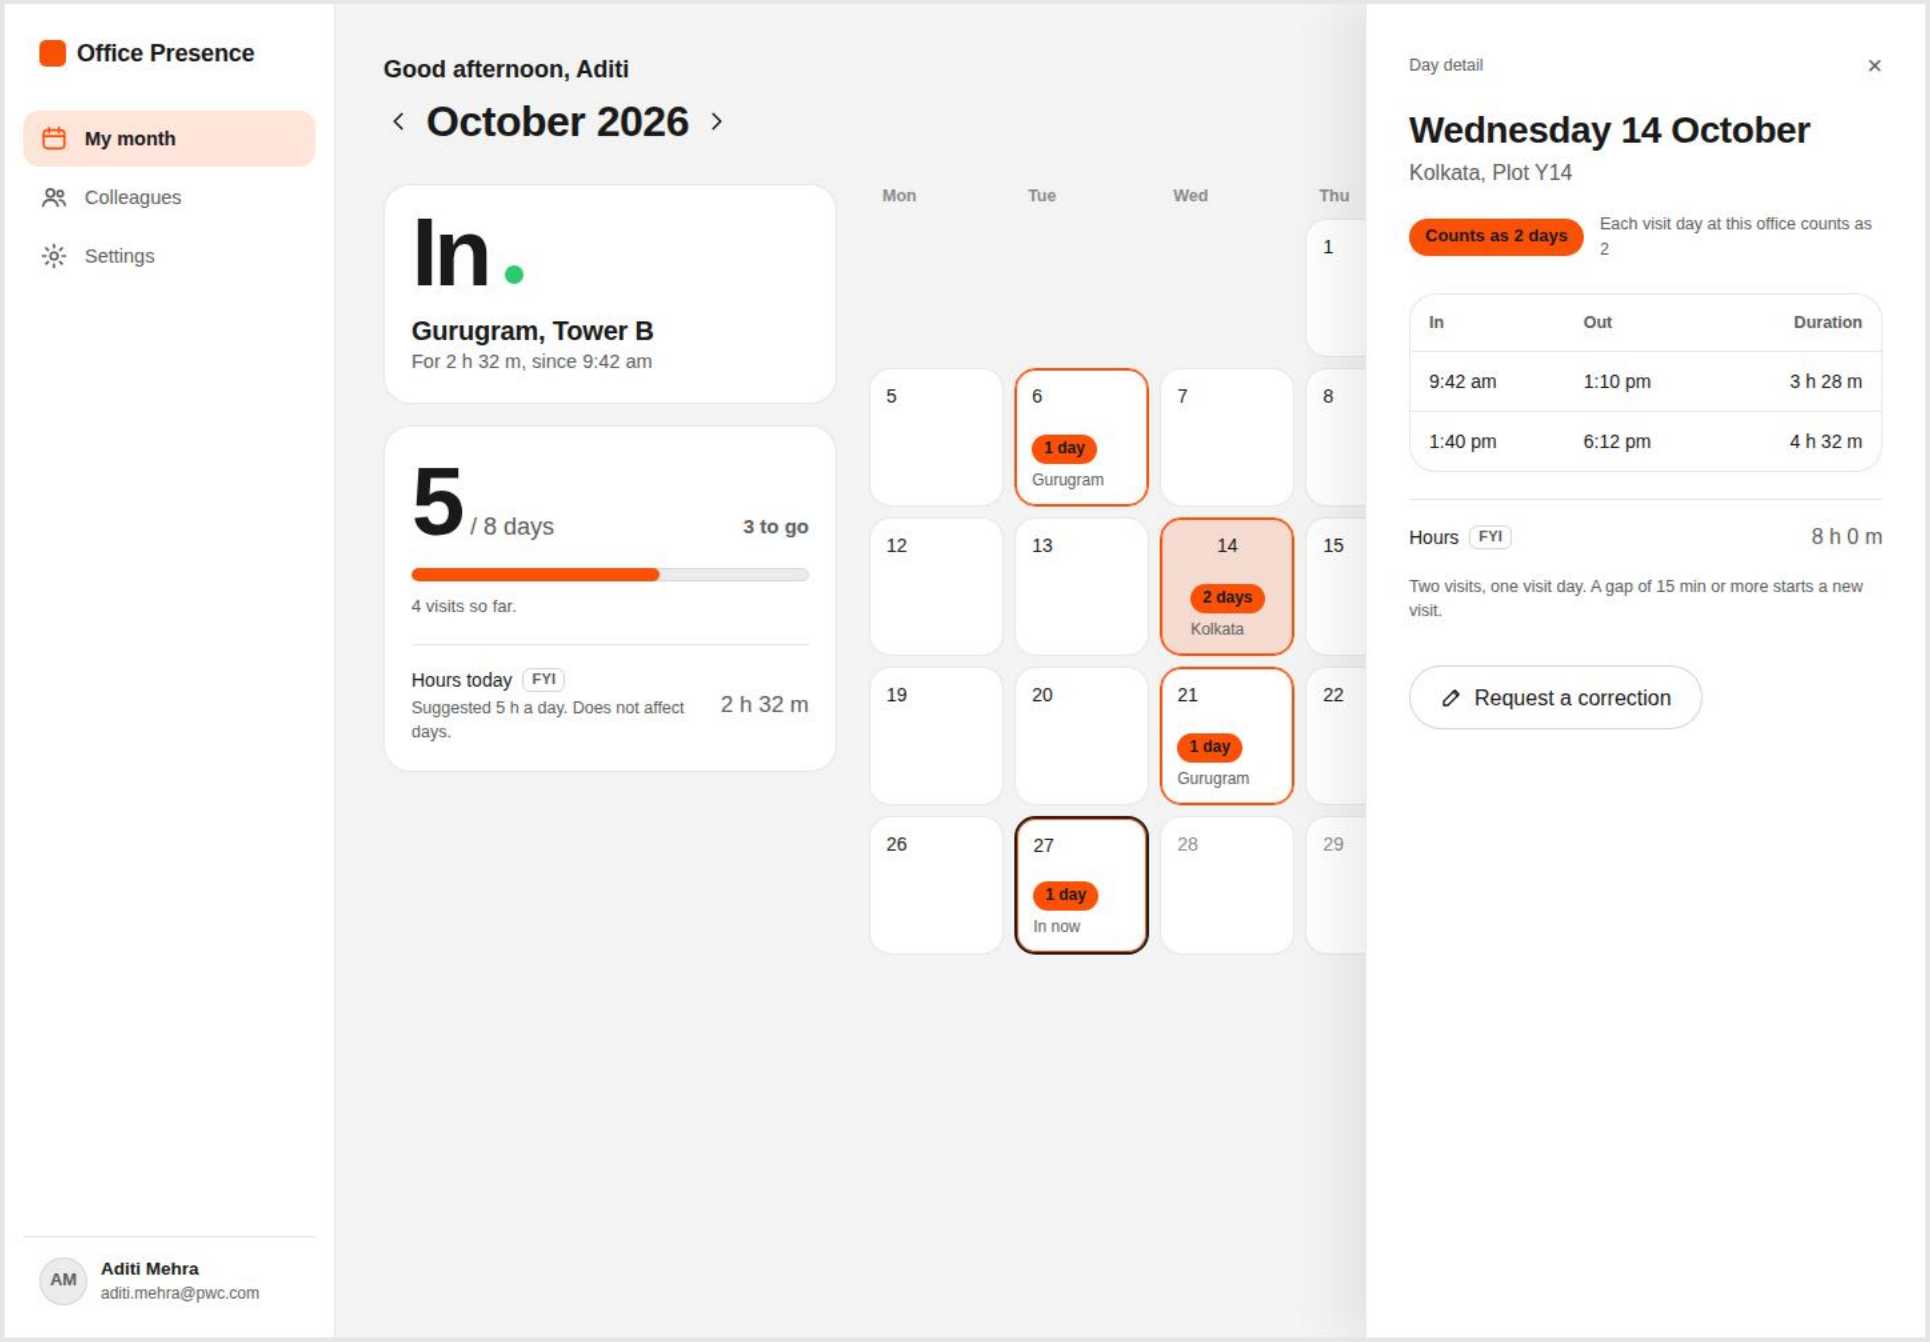

W / Month

Left column mirrors phone Today. Calendar cells show what each day counts as, not hours.

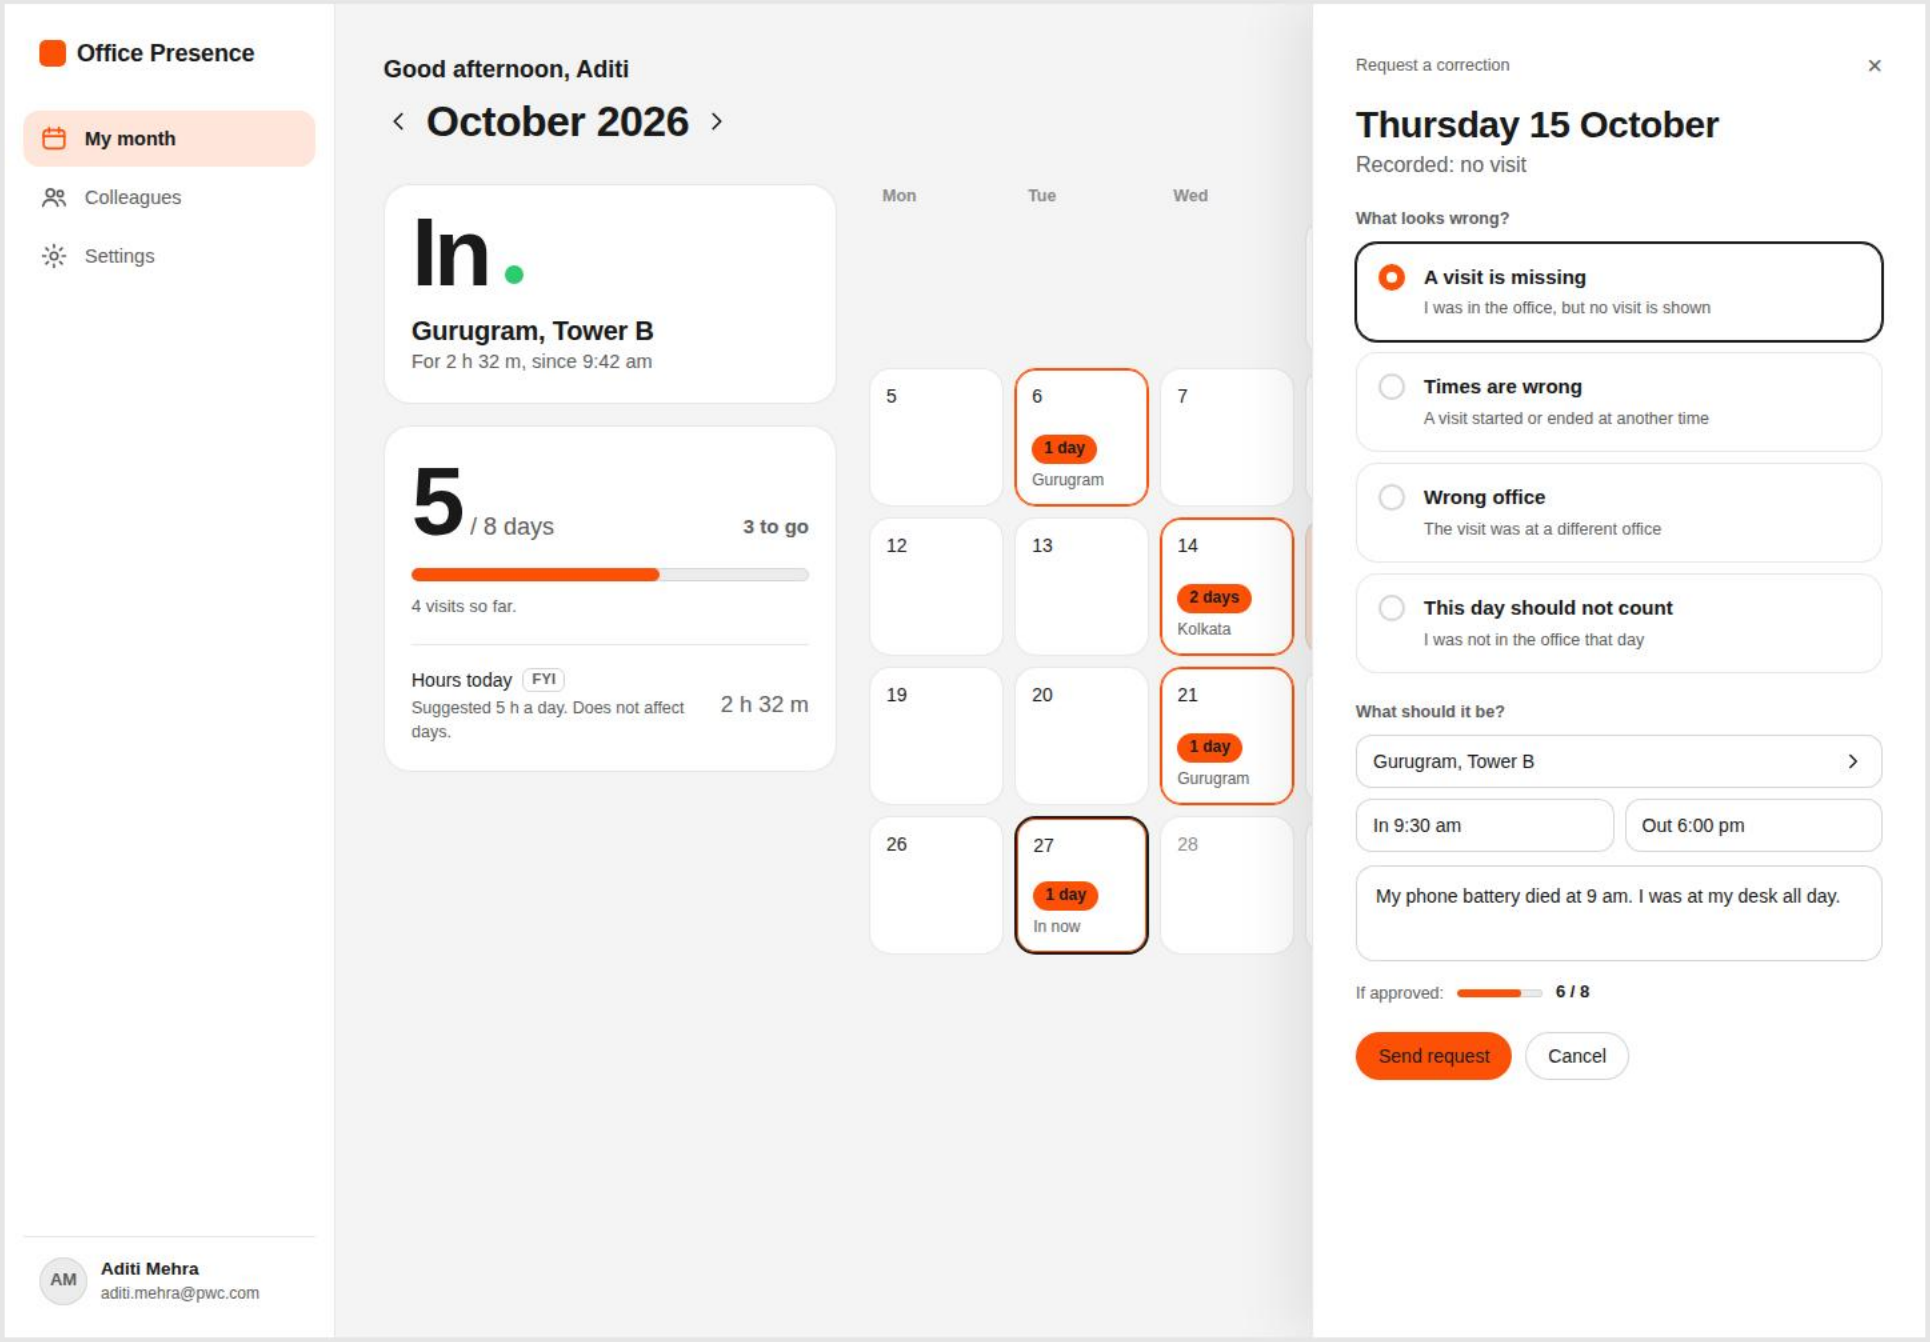

W / Month / Day open

Drawer, 420 wide, closes on Esc. URL gets ?day=2026-10-14 so it can be linked.

W / Month / Request a correction

Same three steps as the phone, in one drawer.

W / Colleagues

Exactly four columns. Do not add hours or days counted.

Office Presence

Colleagues

You are sharing your status Manage sharing

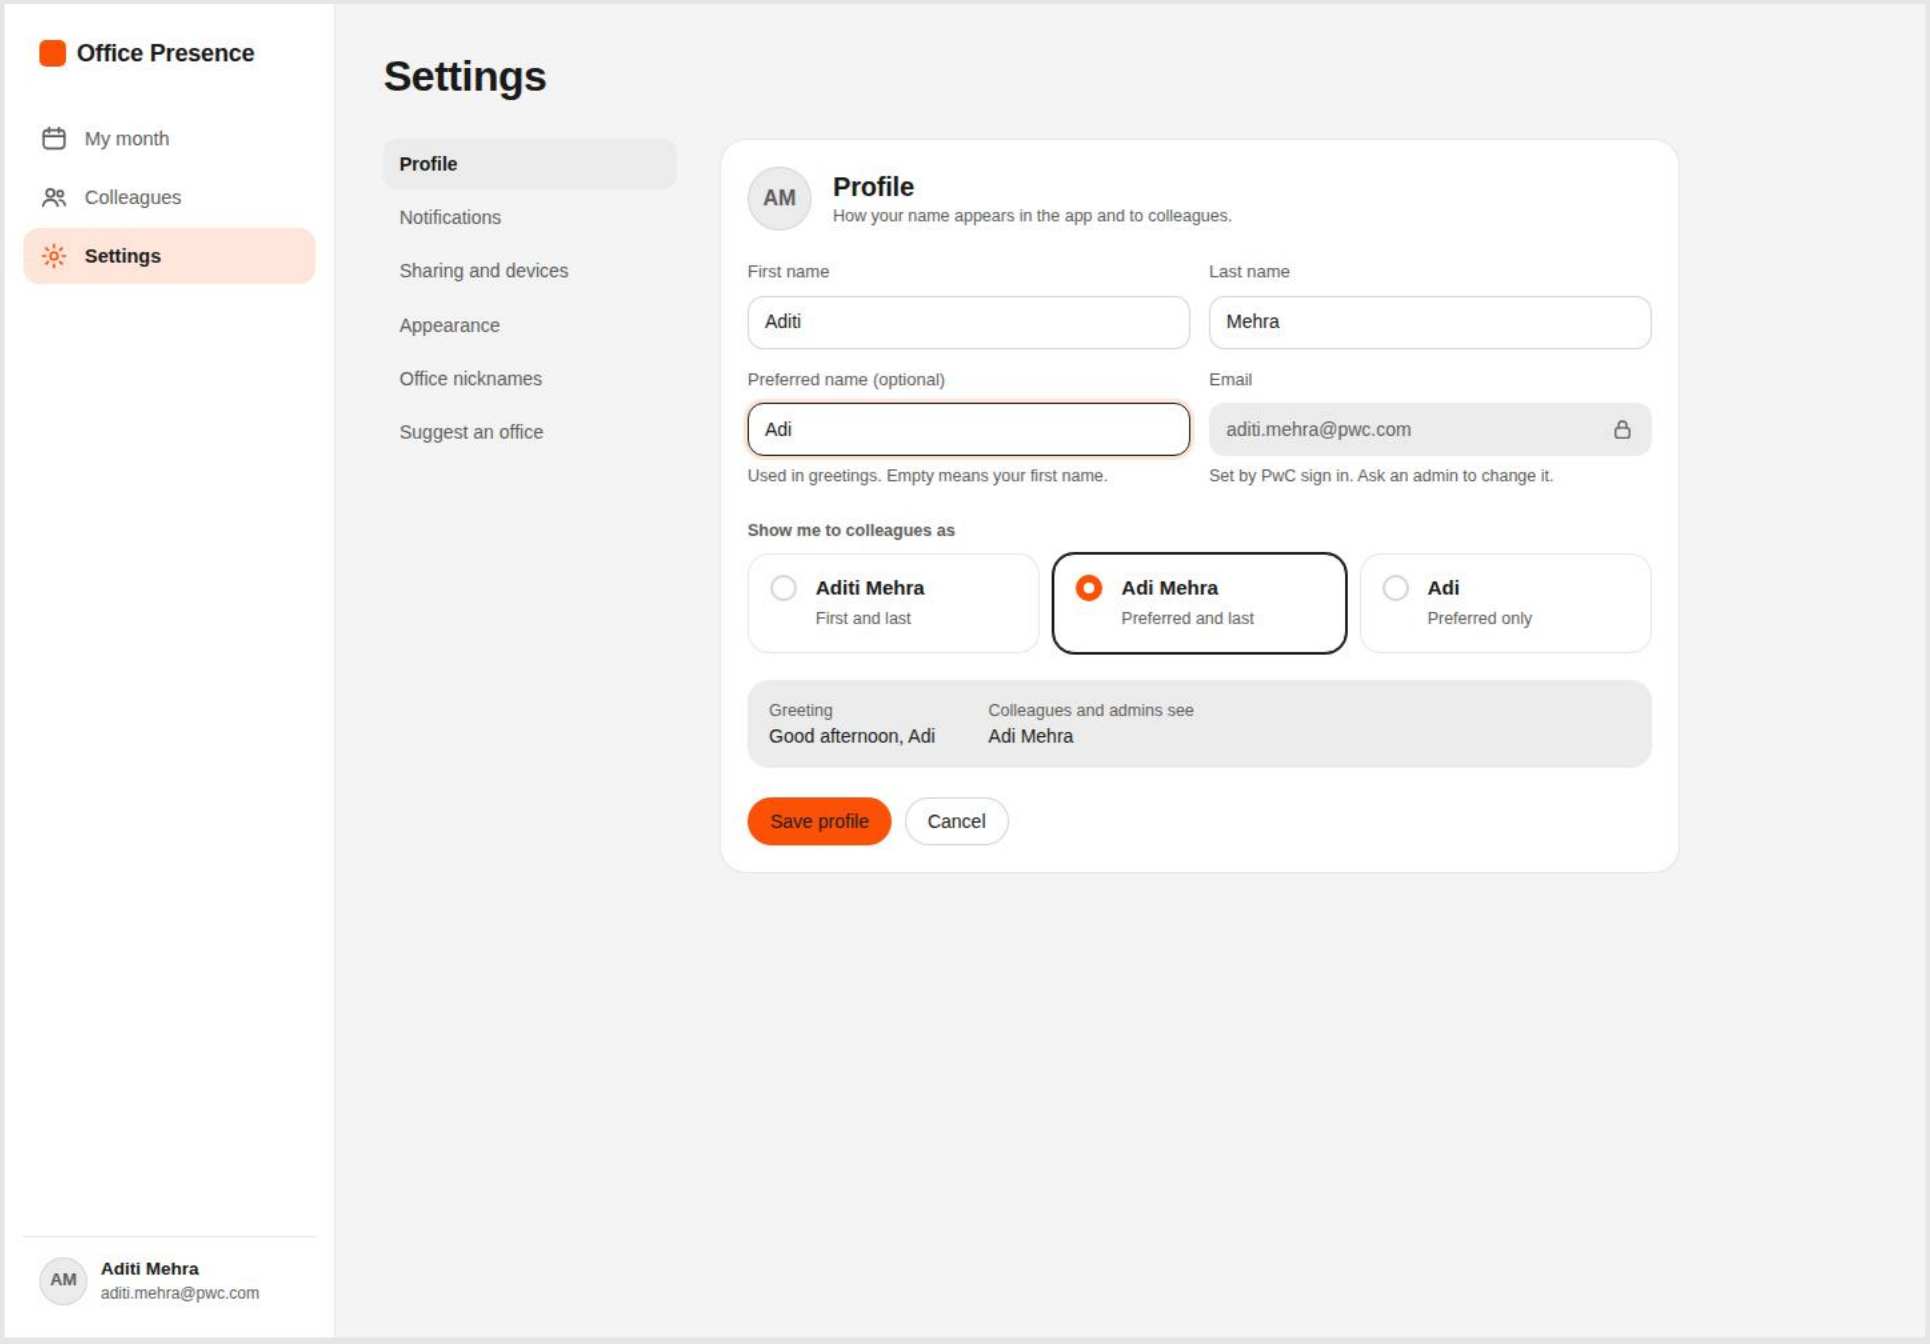

Search name | All | In | Out | All offices

Name	Status	Since	Office
RK Rohan Kapoor	In	9:15 am	Gurugram, Tower B
SN Sneha Nair	In	9:58 am	Gurugram, Tower B
PV Priya Venkat	In	10:04 am	Bengaluru, Prestige
AJ Arjun Joshi	Out	yesterday 6:40 pm	Gurugram, Tower B
MD Meera Das	Out	Fri 5:55 pm	Kolkata, Plot Y14
NR Nikhil Rao	Out	Fri 6:12 pm	Mumbai, BKC

Shows only what colleagues chose to share: In or Out, since when, and office name.

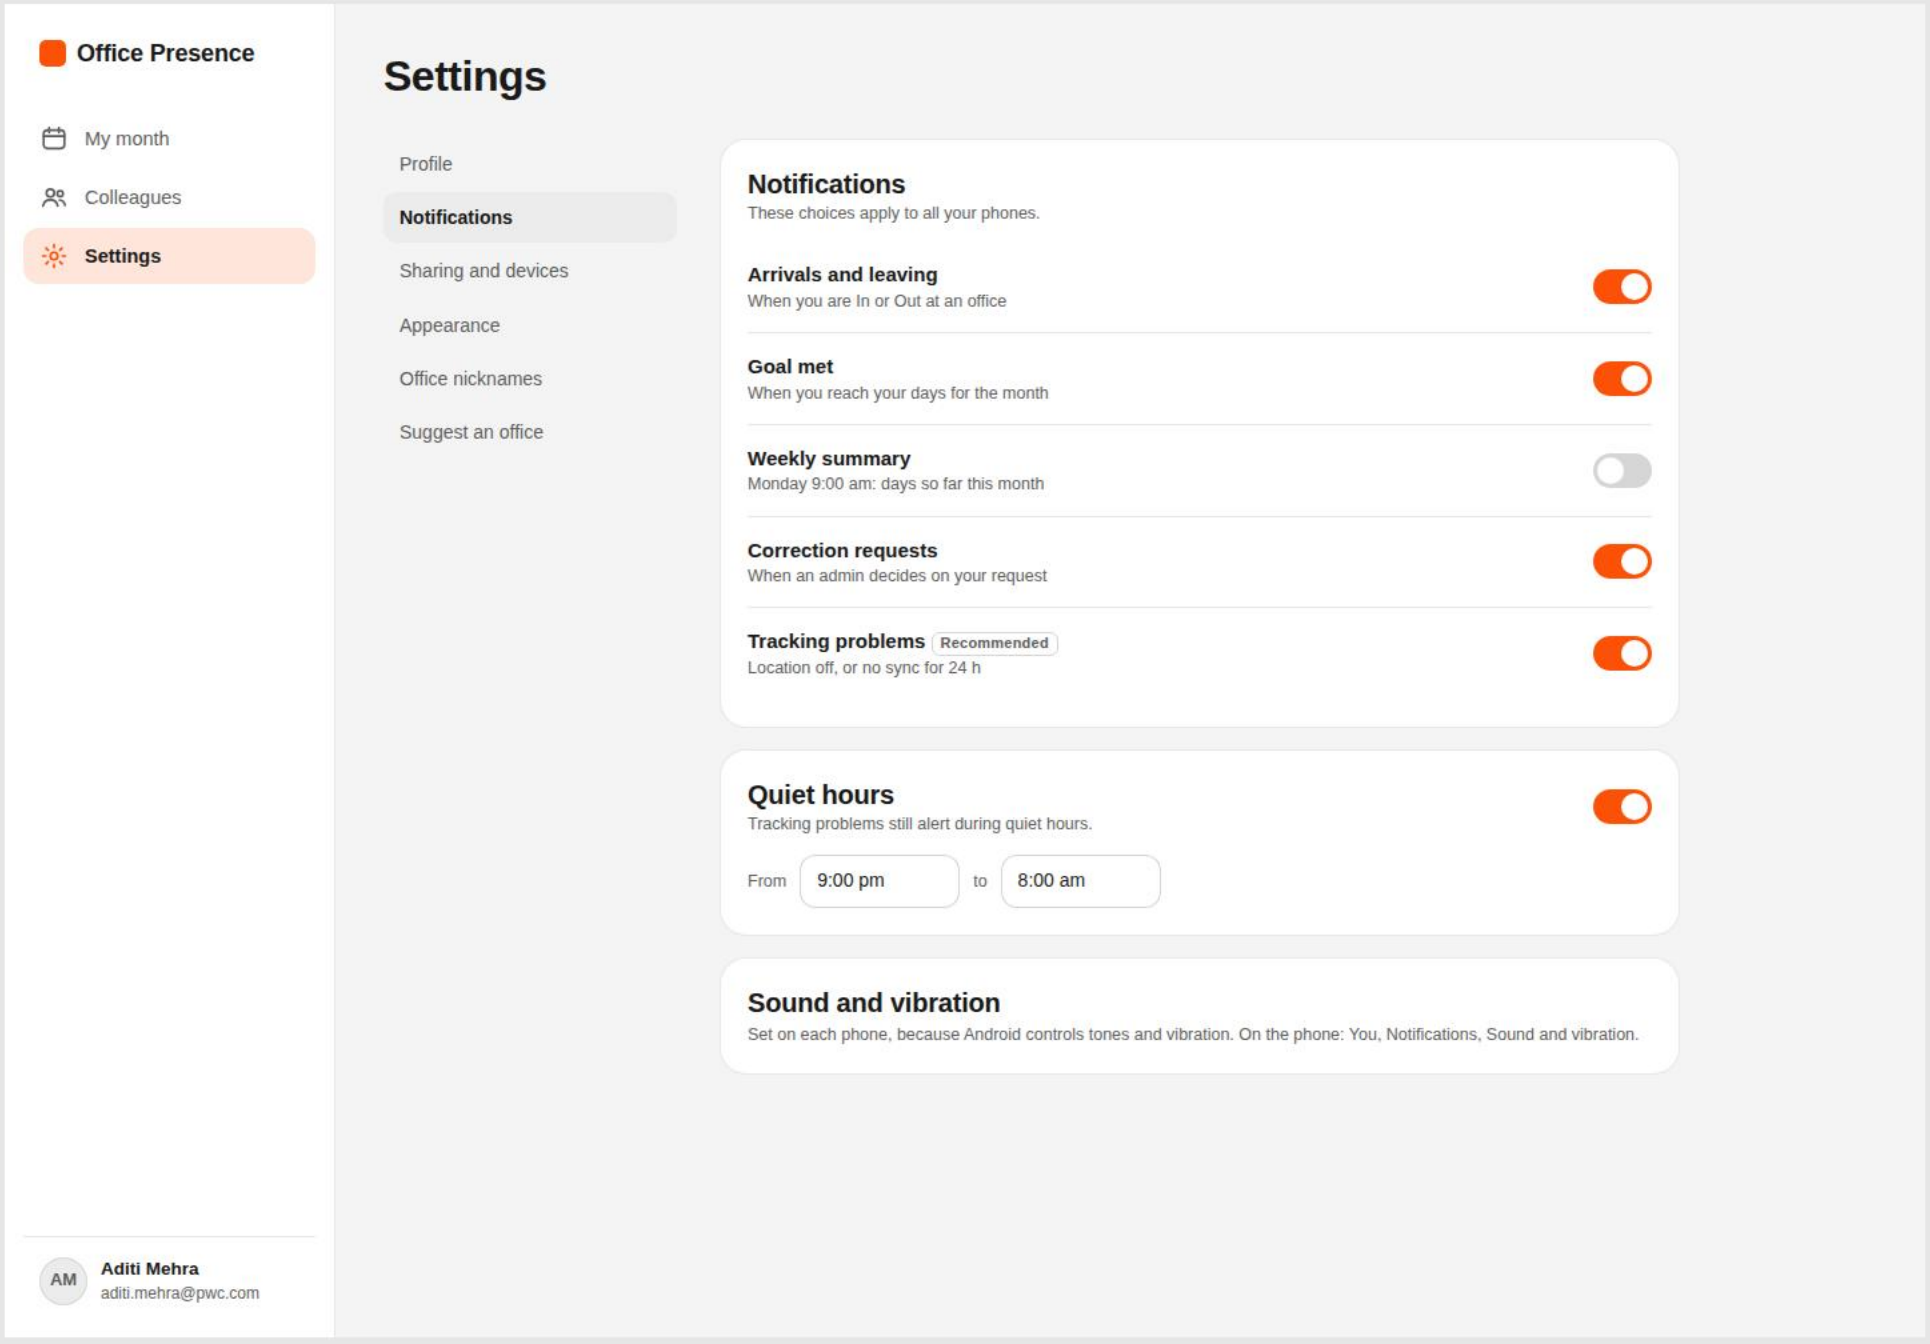

W / Settings / Profile

Default Settings section. Same rules as the phone profile.

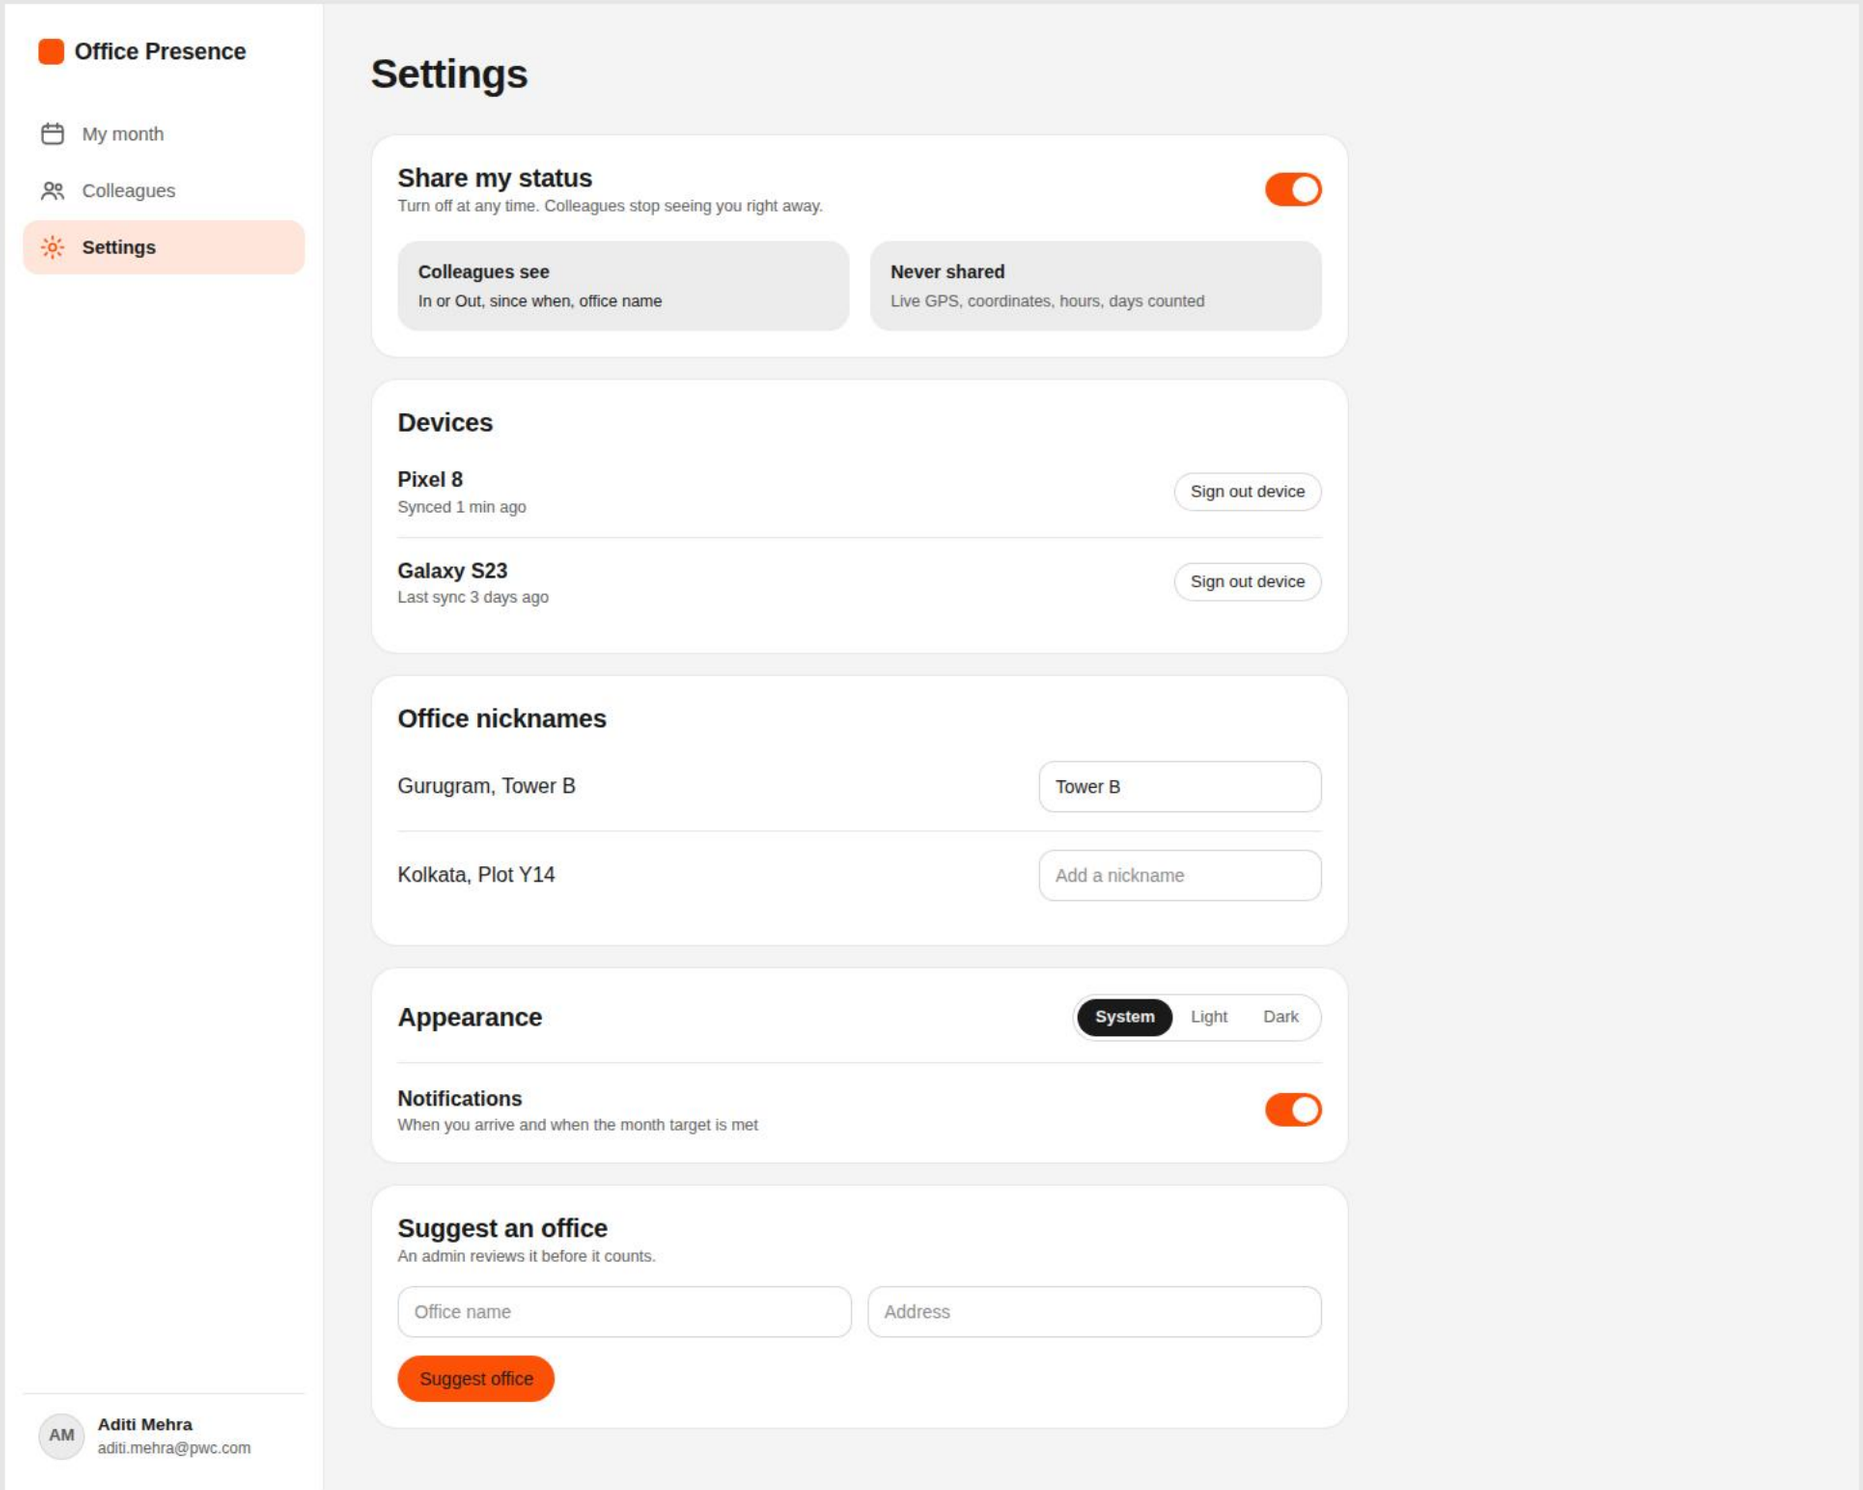

W / Settings / Notifications

Same server preferences as the phone. Tones stay per phone.

W / Settings / Sharing and devices

Sharing toggle saves immediately, no confirm dialog.

W / Admin / Roster

Count cells are filters. Hours today is FYI and never sorts by default. A row with no sync in 24 h is the only accent badge.

W / Admin / Roster / Dark

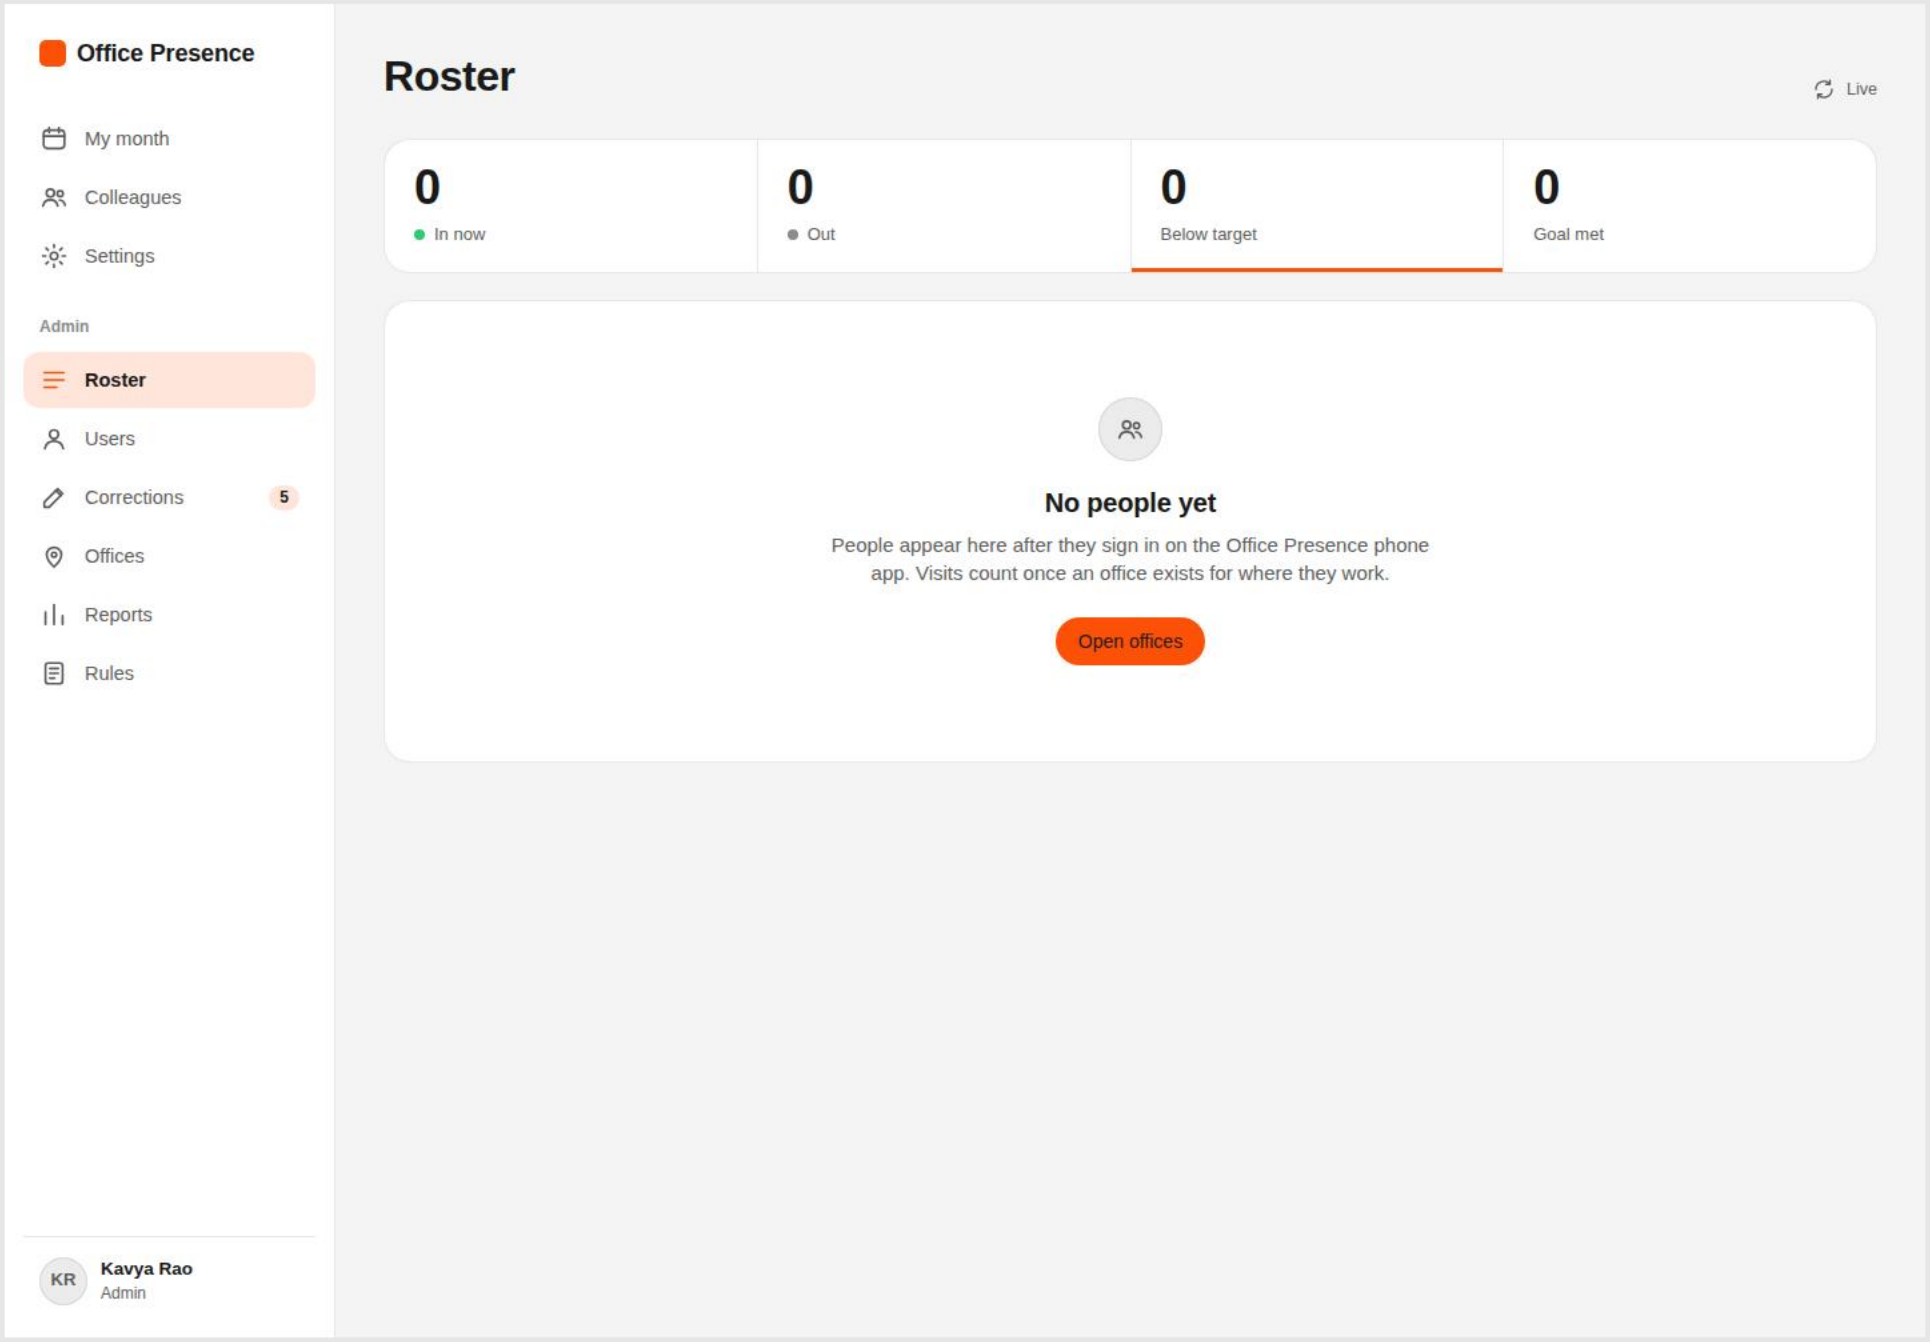

W / Admin / Roster / Loading

Loading. Filters stay usable; skeleton rows do not shimmer.

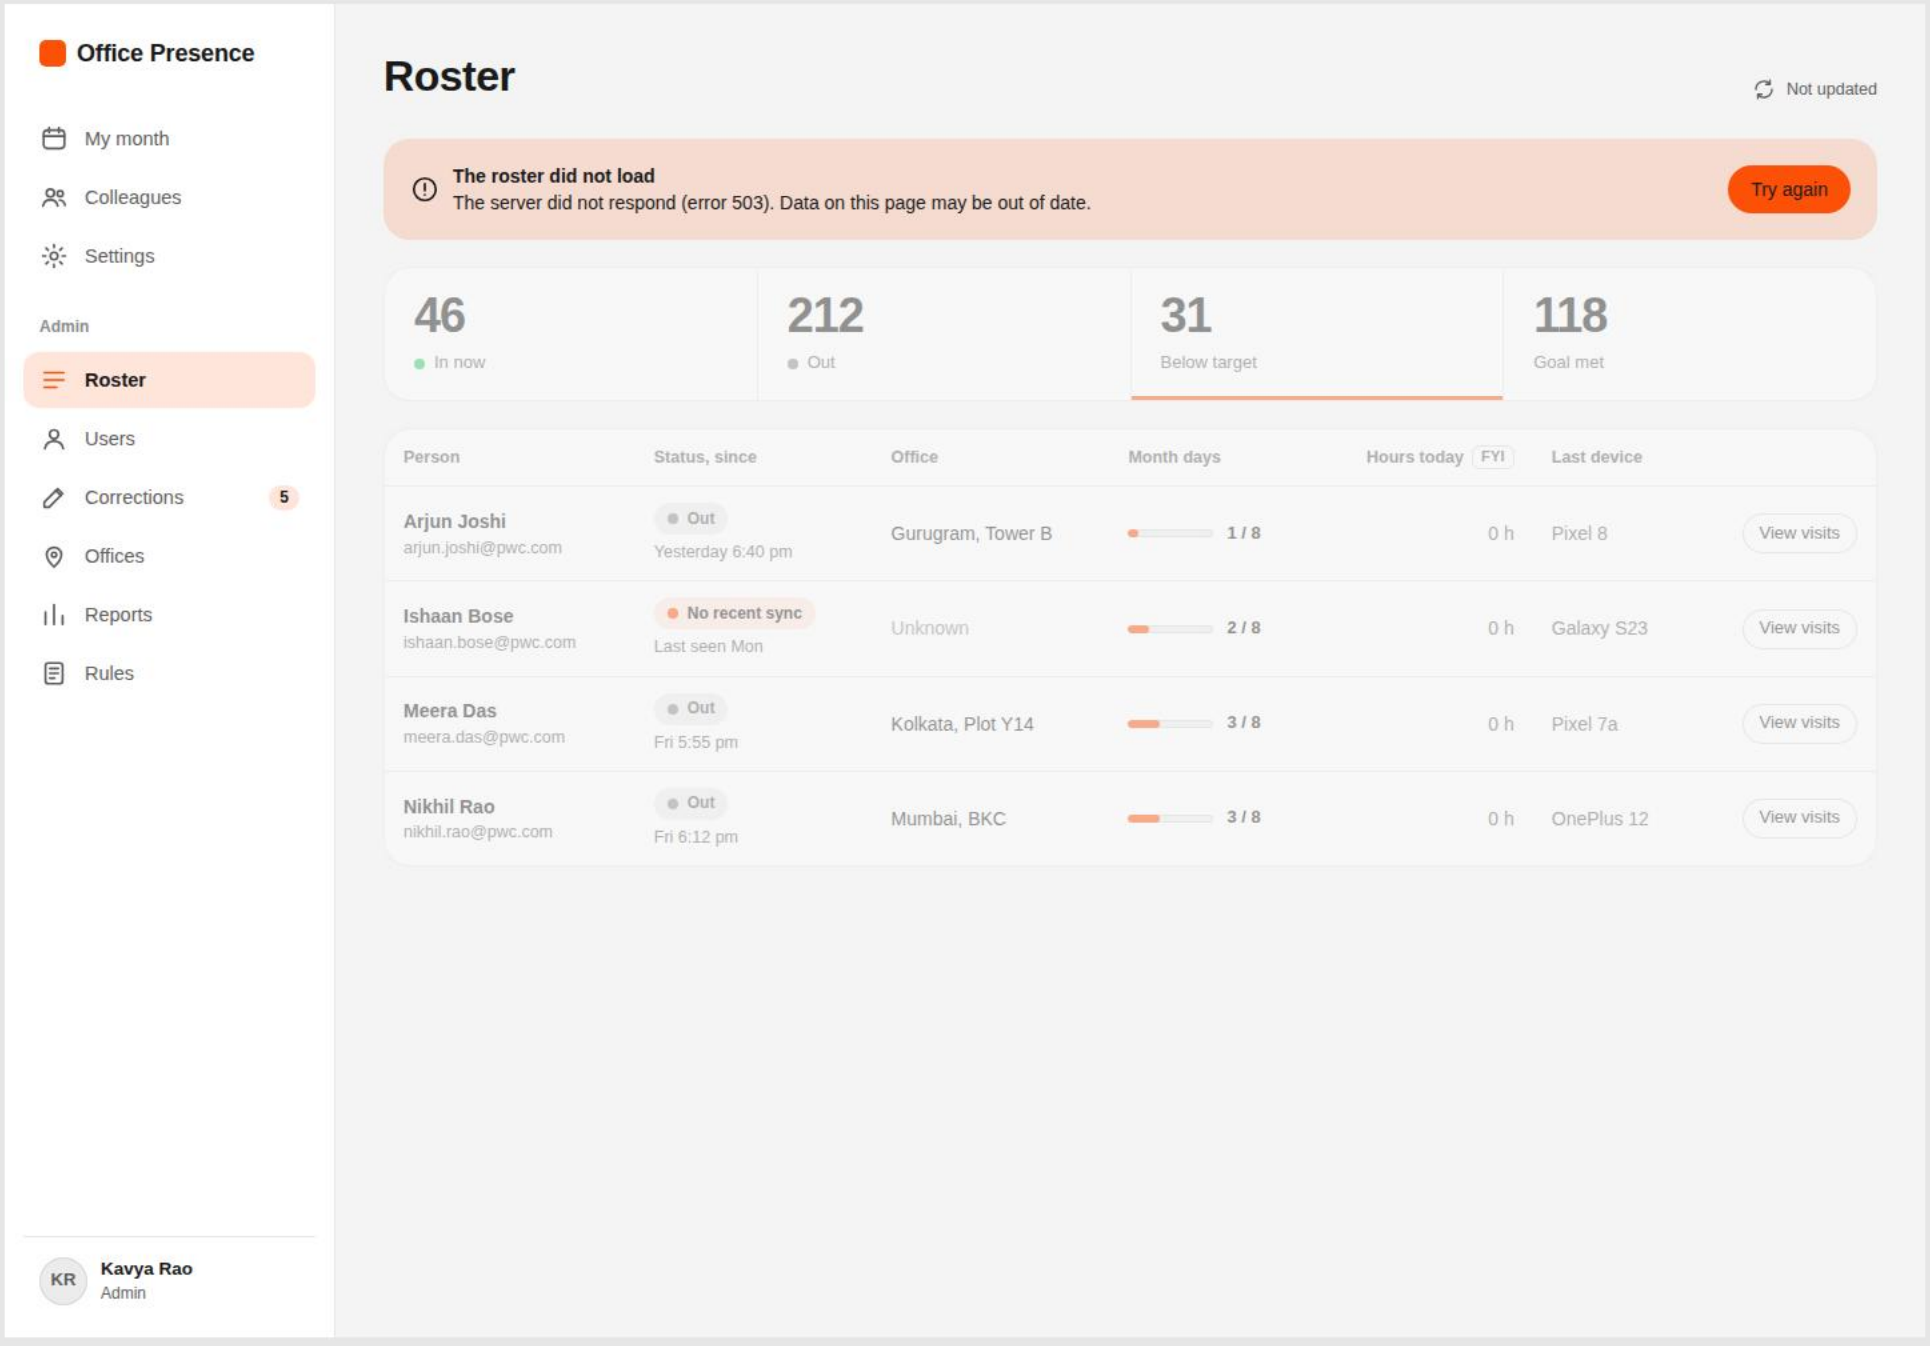

W / Admin / Roster / Empty

No people yet.

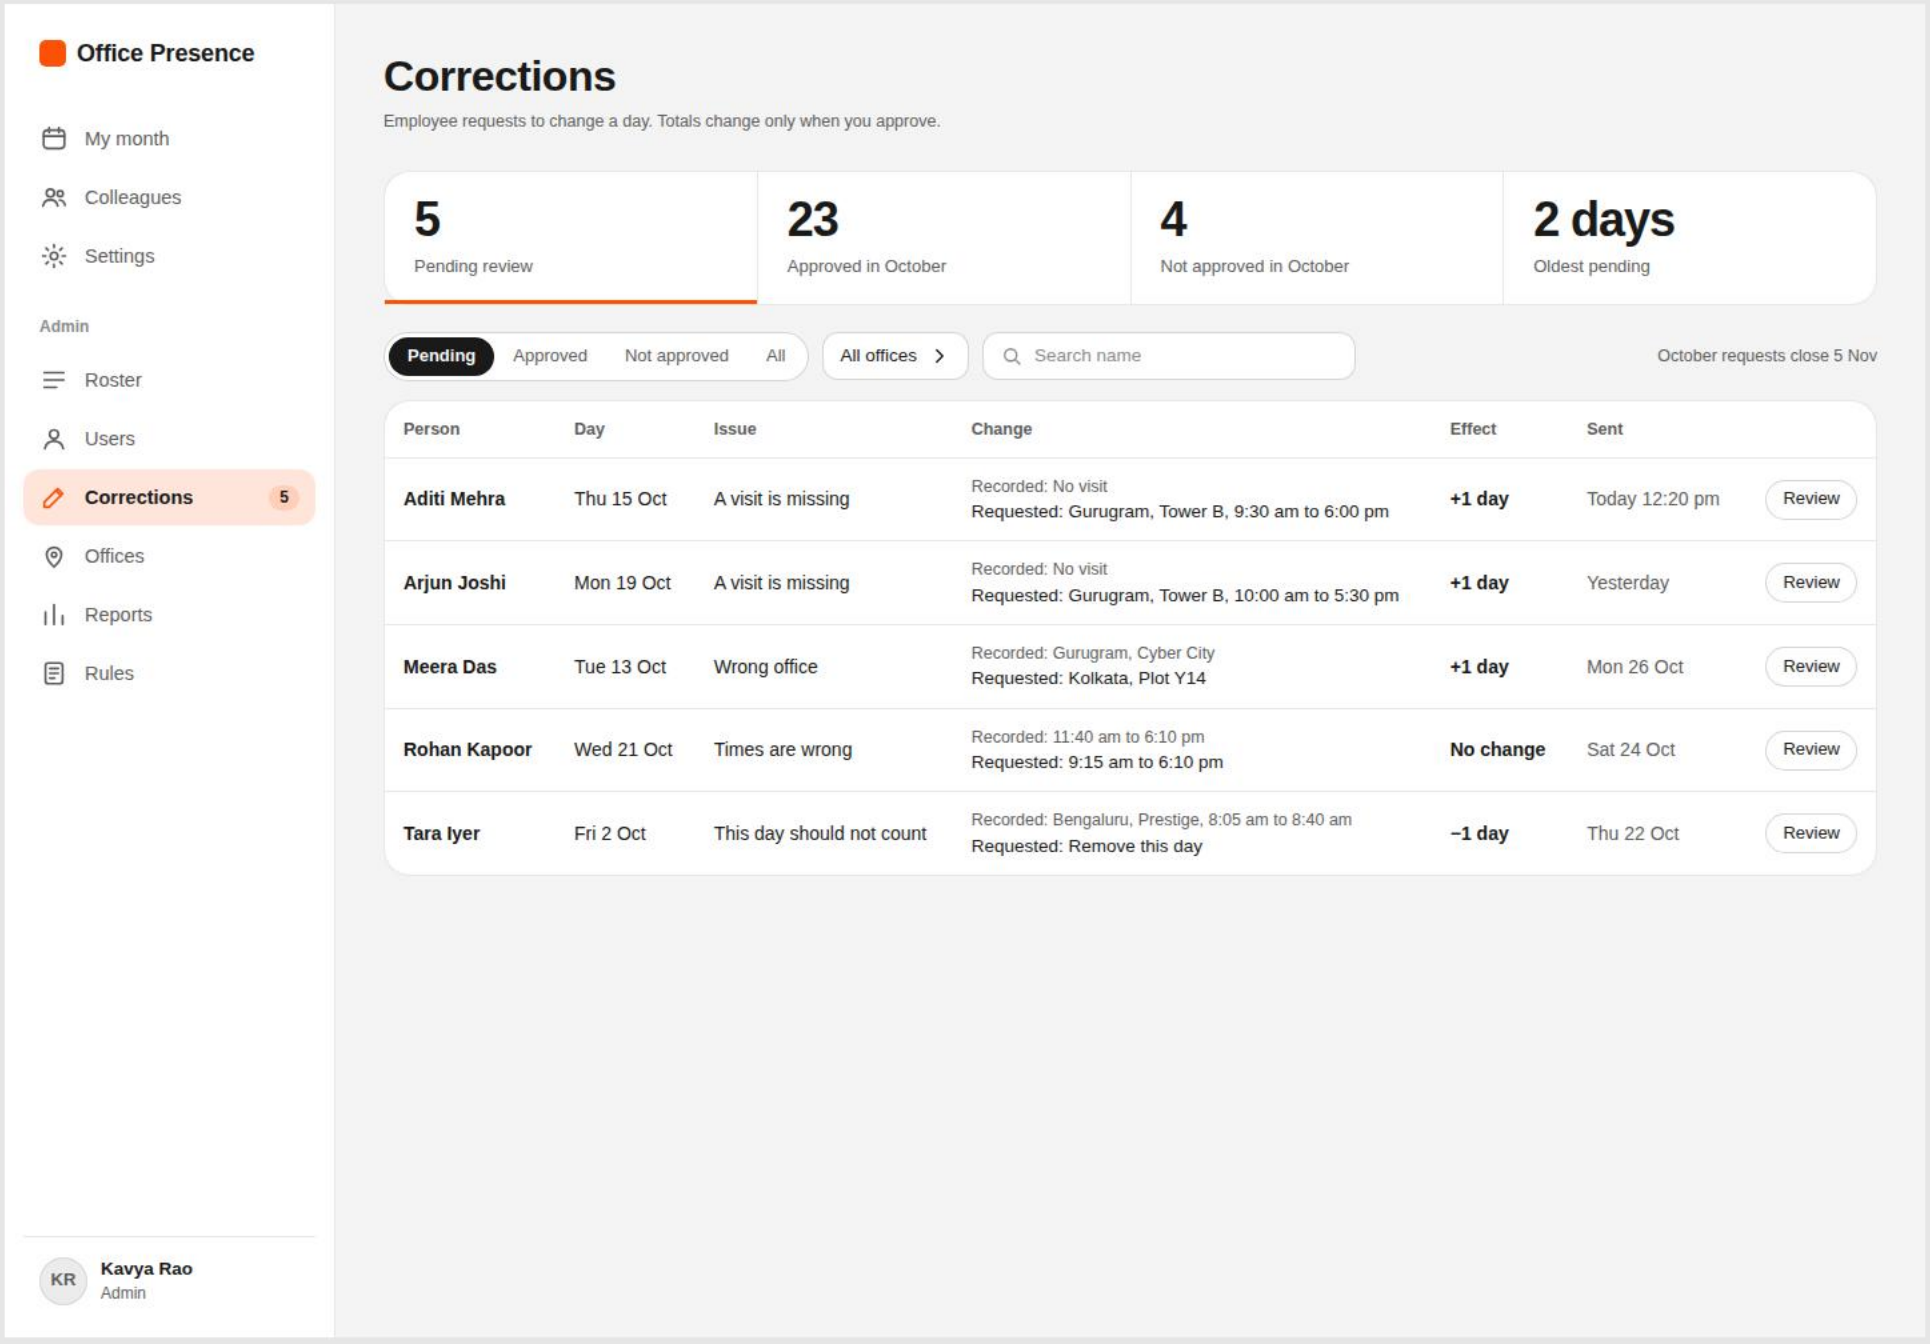

W / Admin / Roster / Error

Keep the last loaded data visible at reduced opacity. Retry backs off after 3 tries.

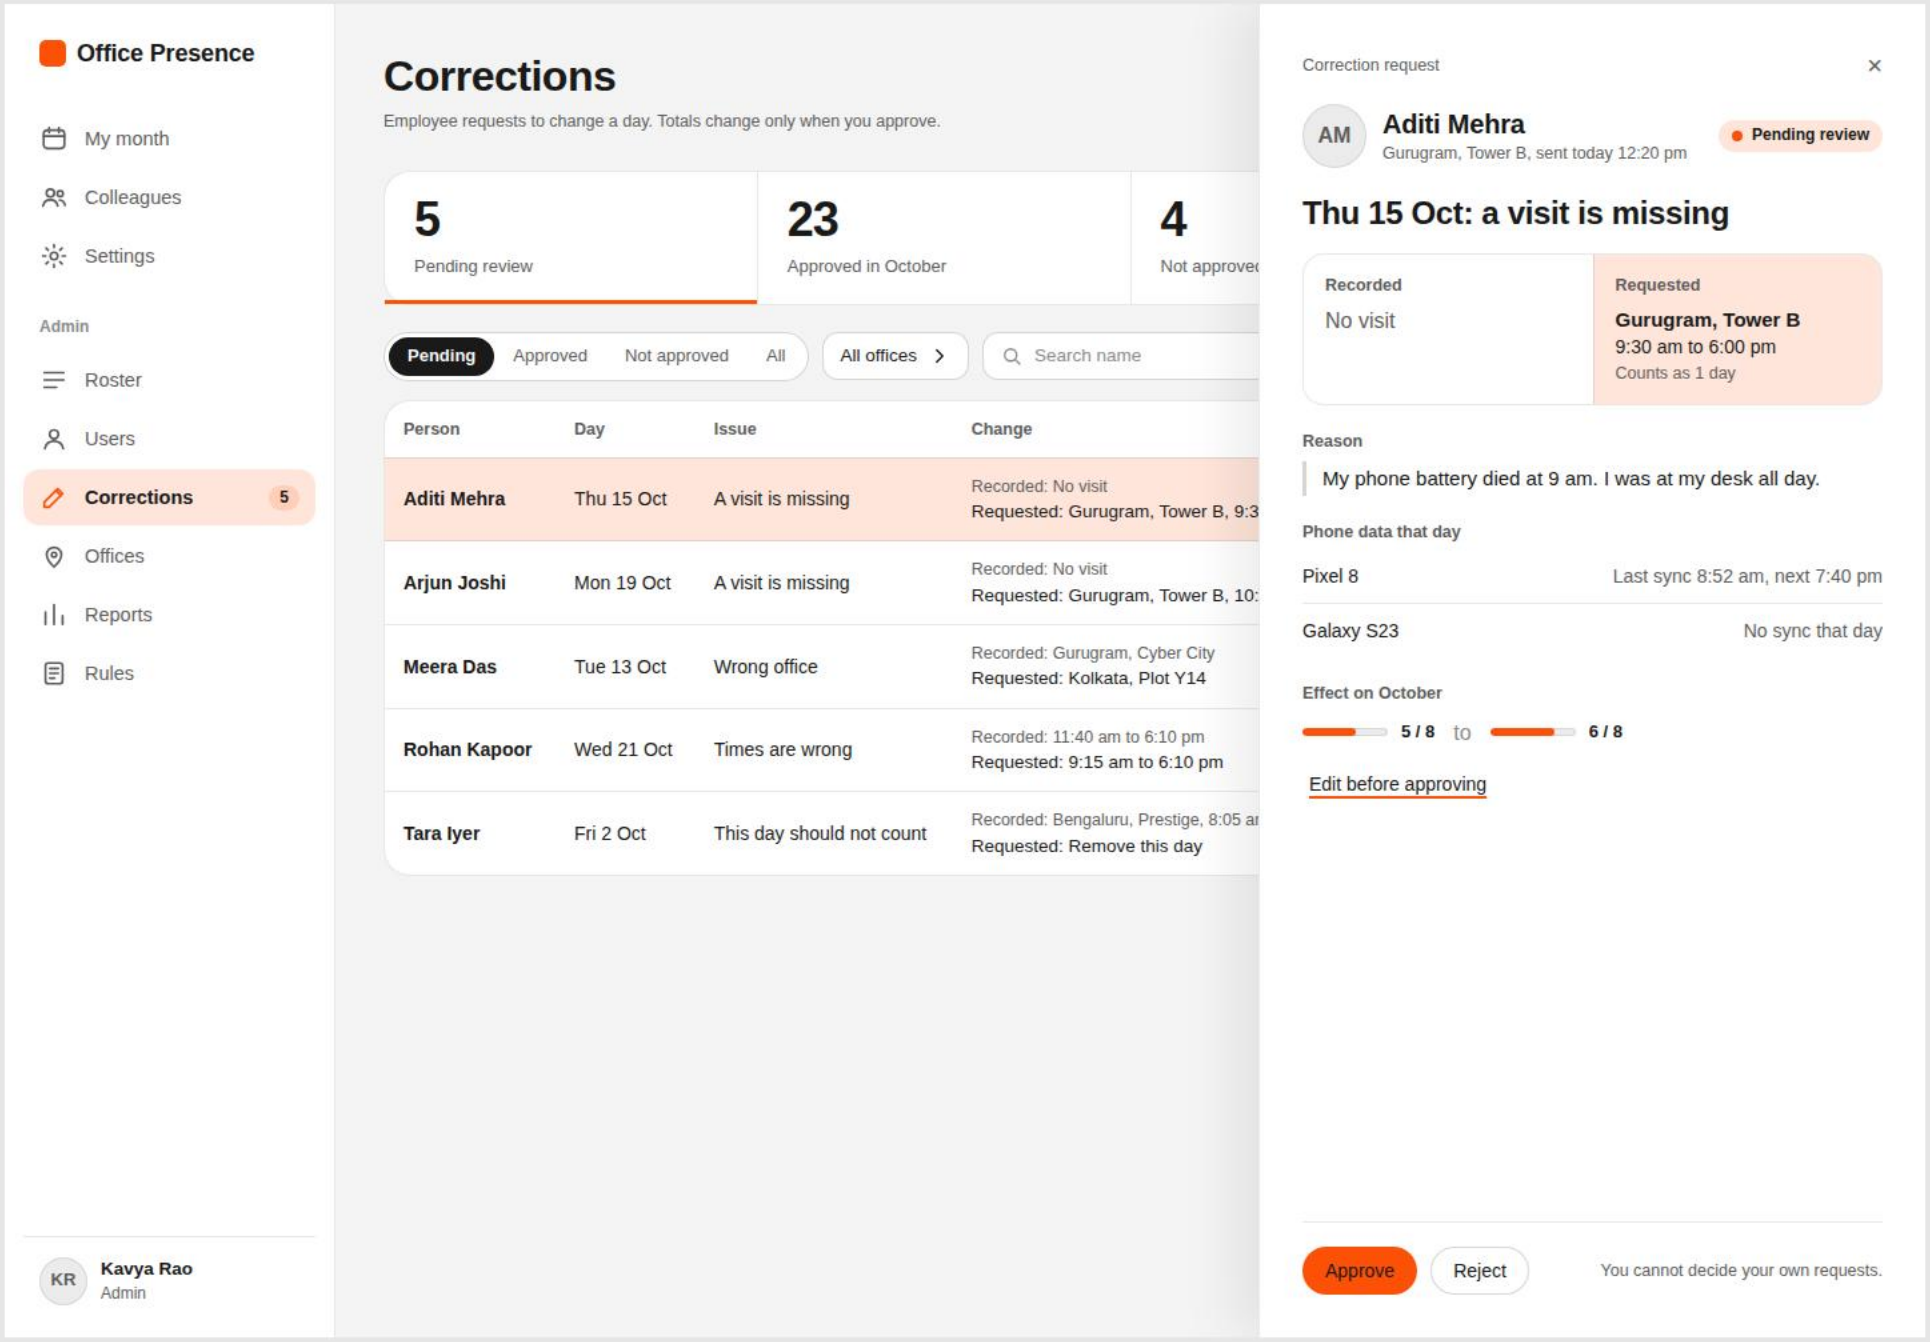

W / Admin / Corrections

Oldest first. Effect is the change to that person's days counted.

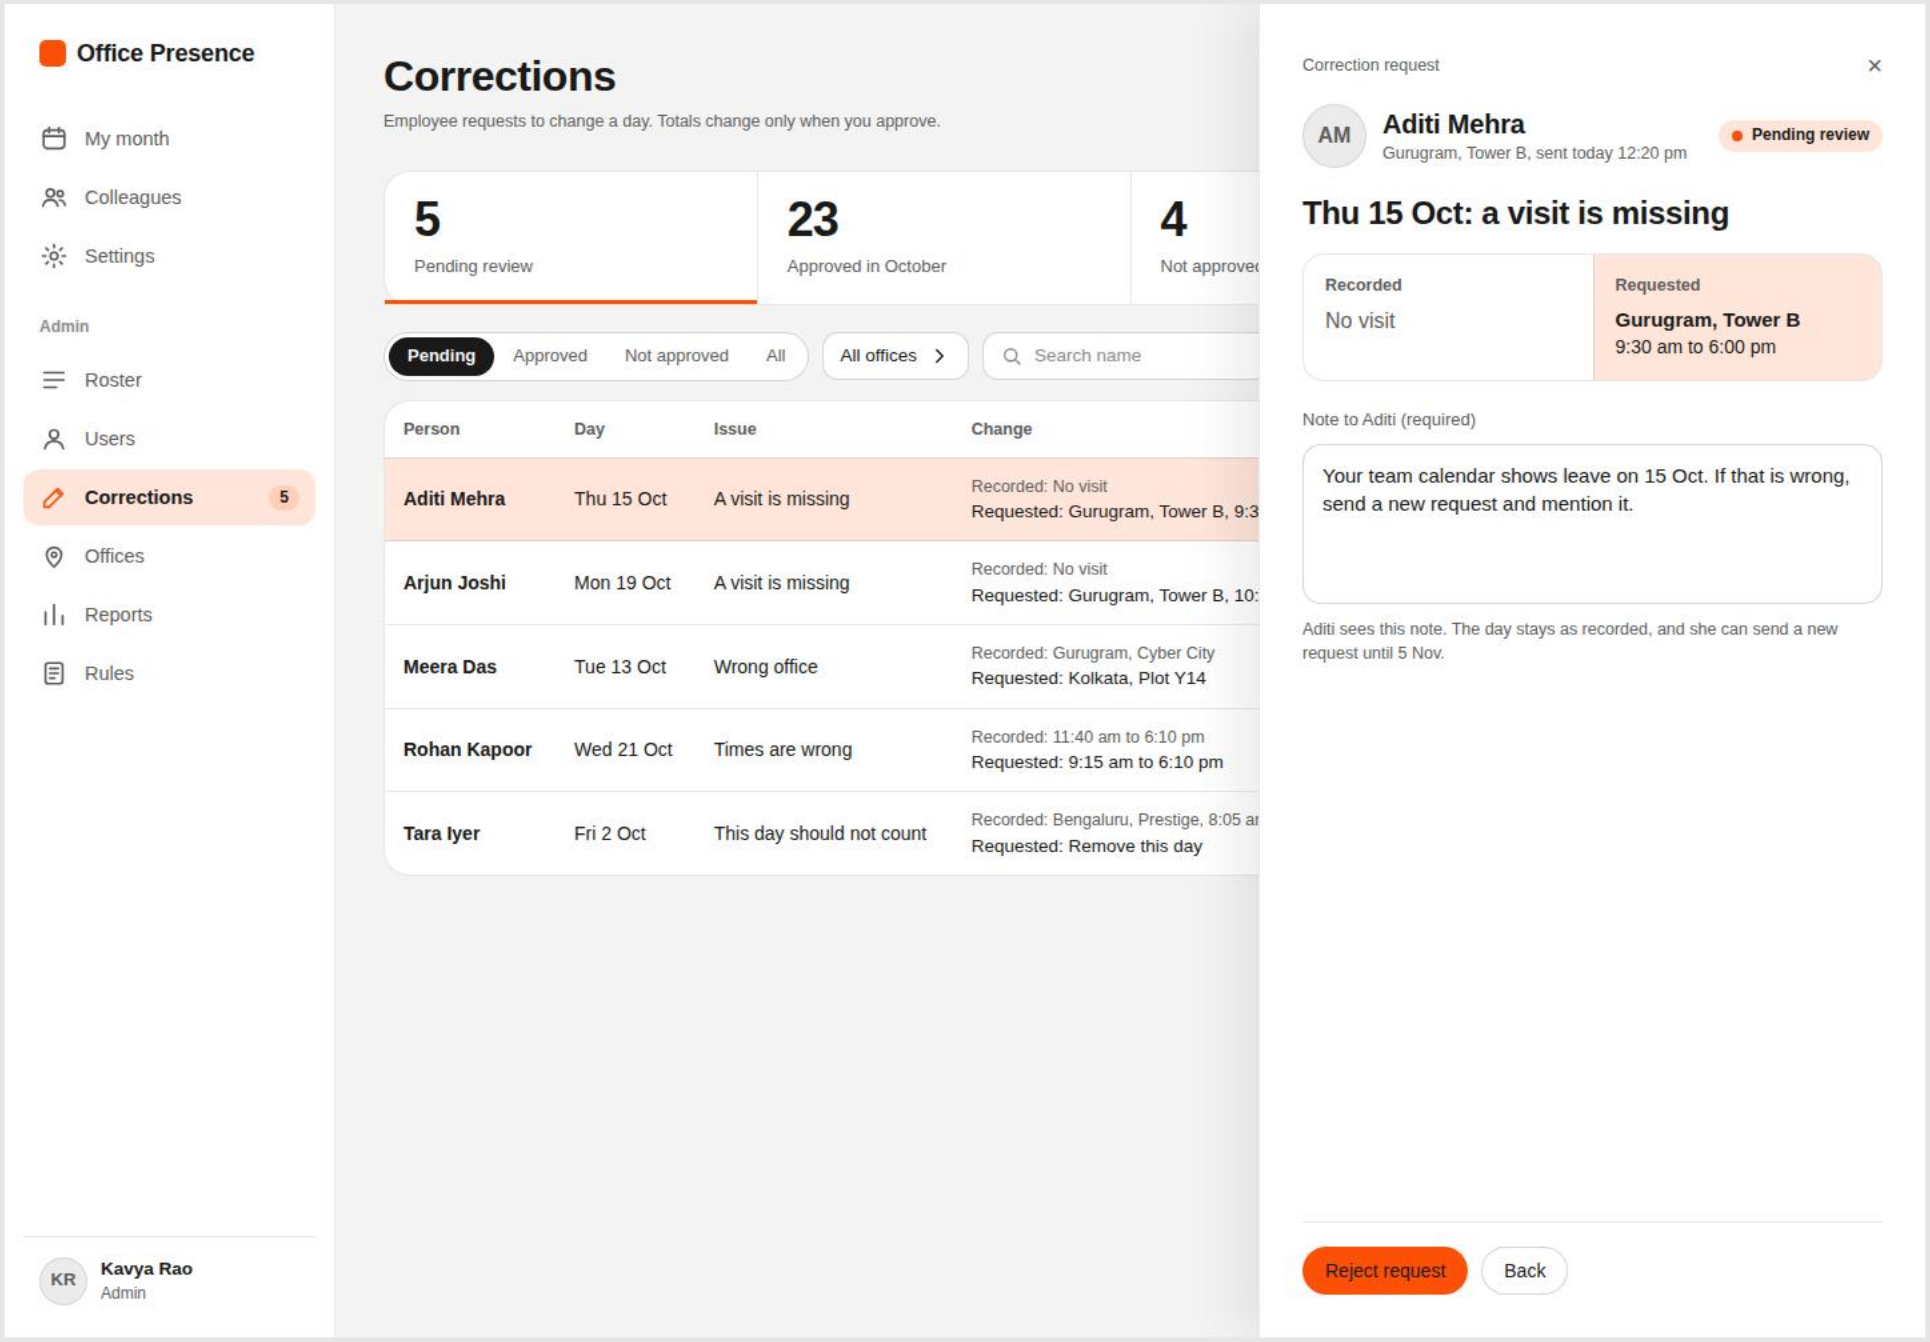

W / Admin / Corrections / Review

Approve applies the requested values, or the edited ones. Hide both buttons on the admin's own request.

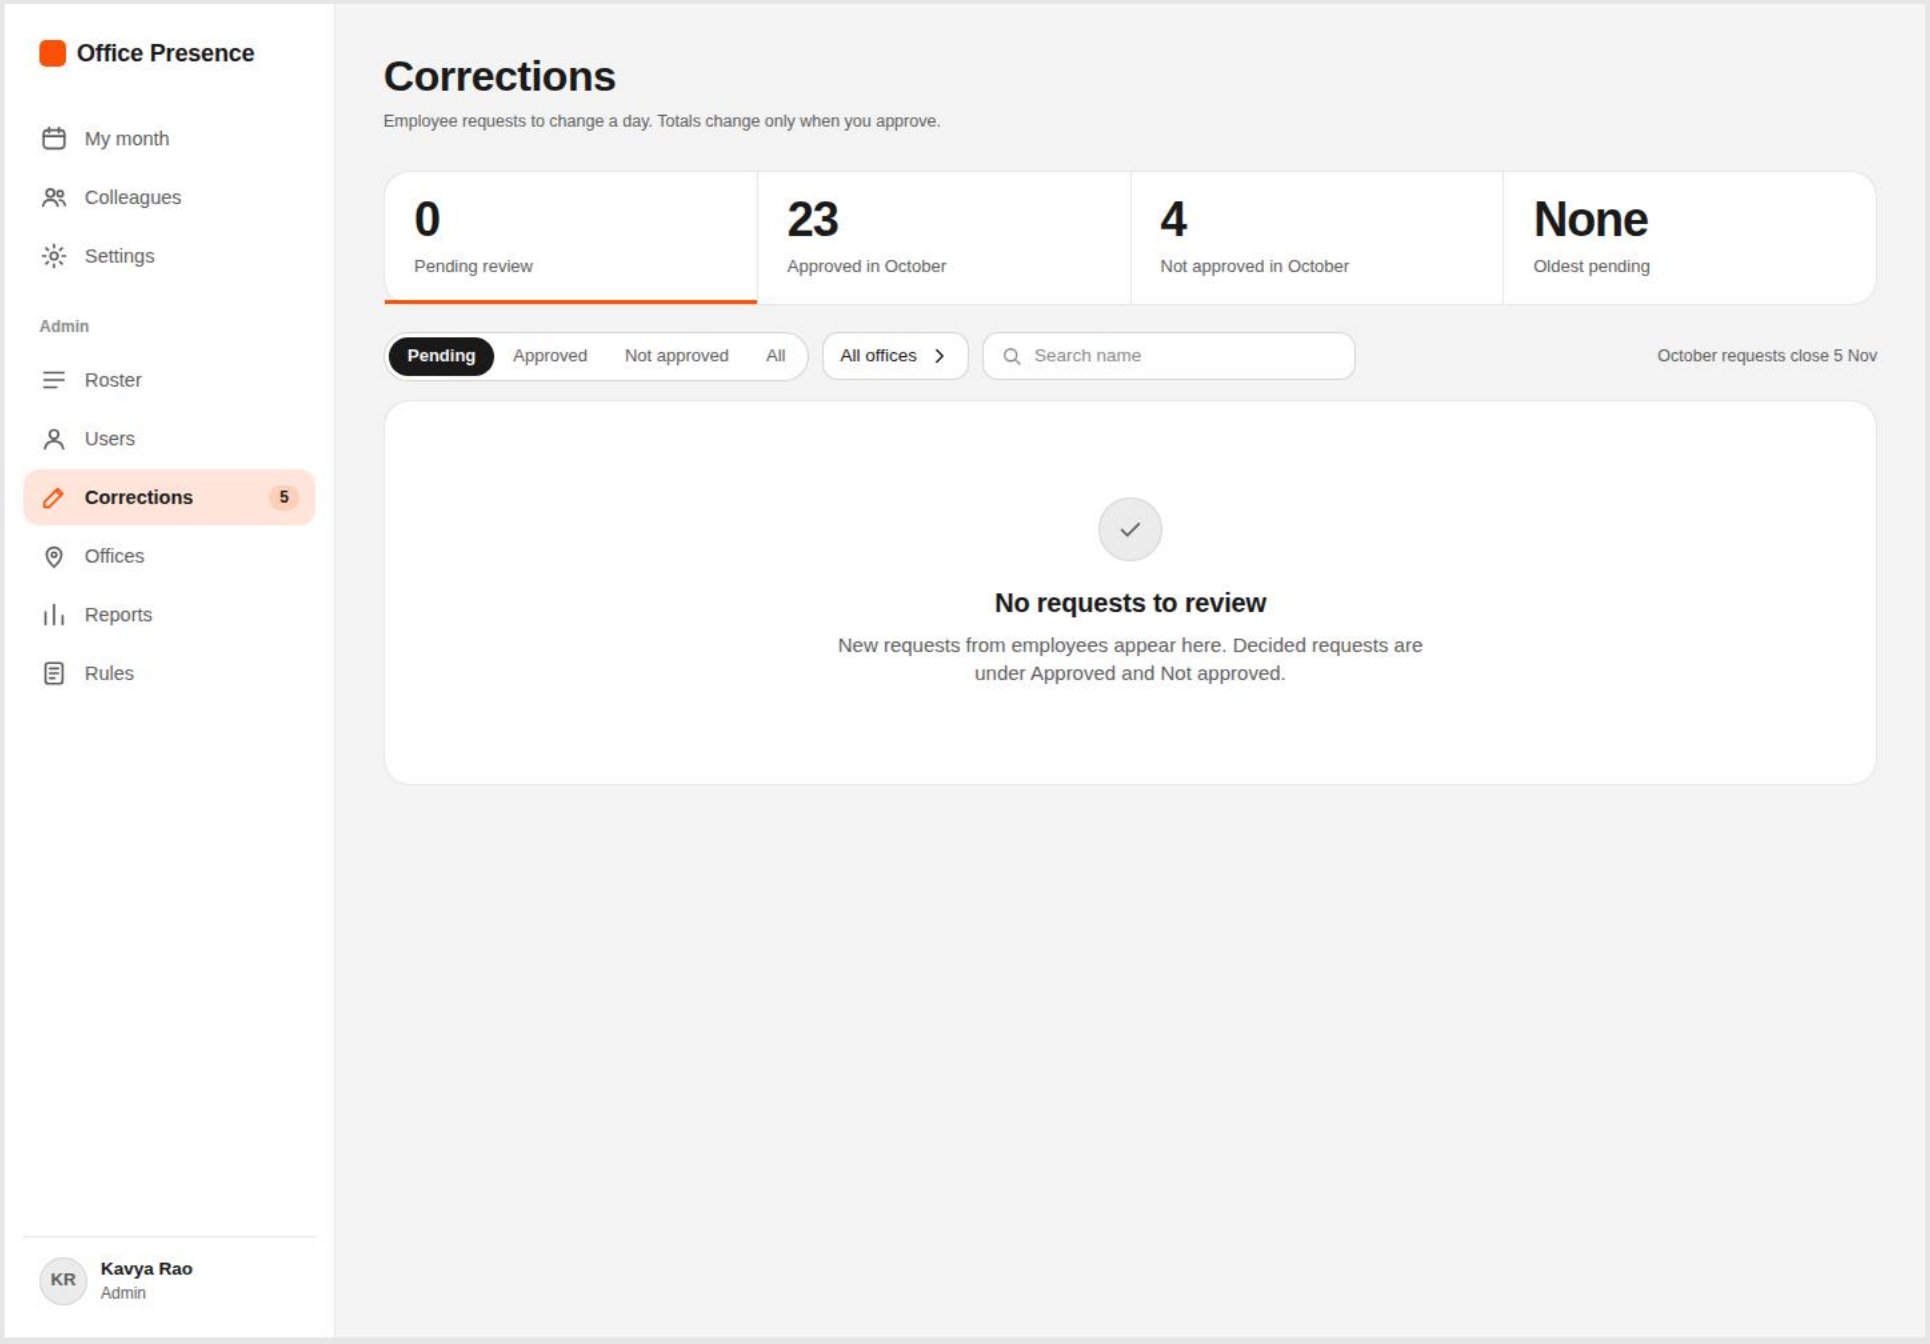

W / Admin / Corrections / Reject

Reject request stays disabled until the note has text.

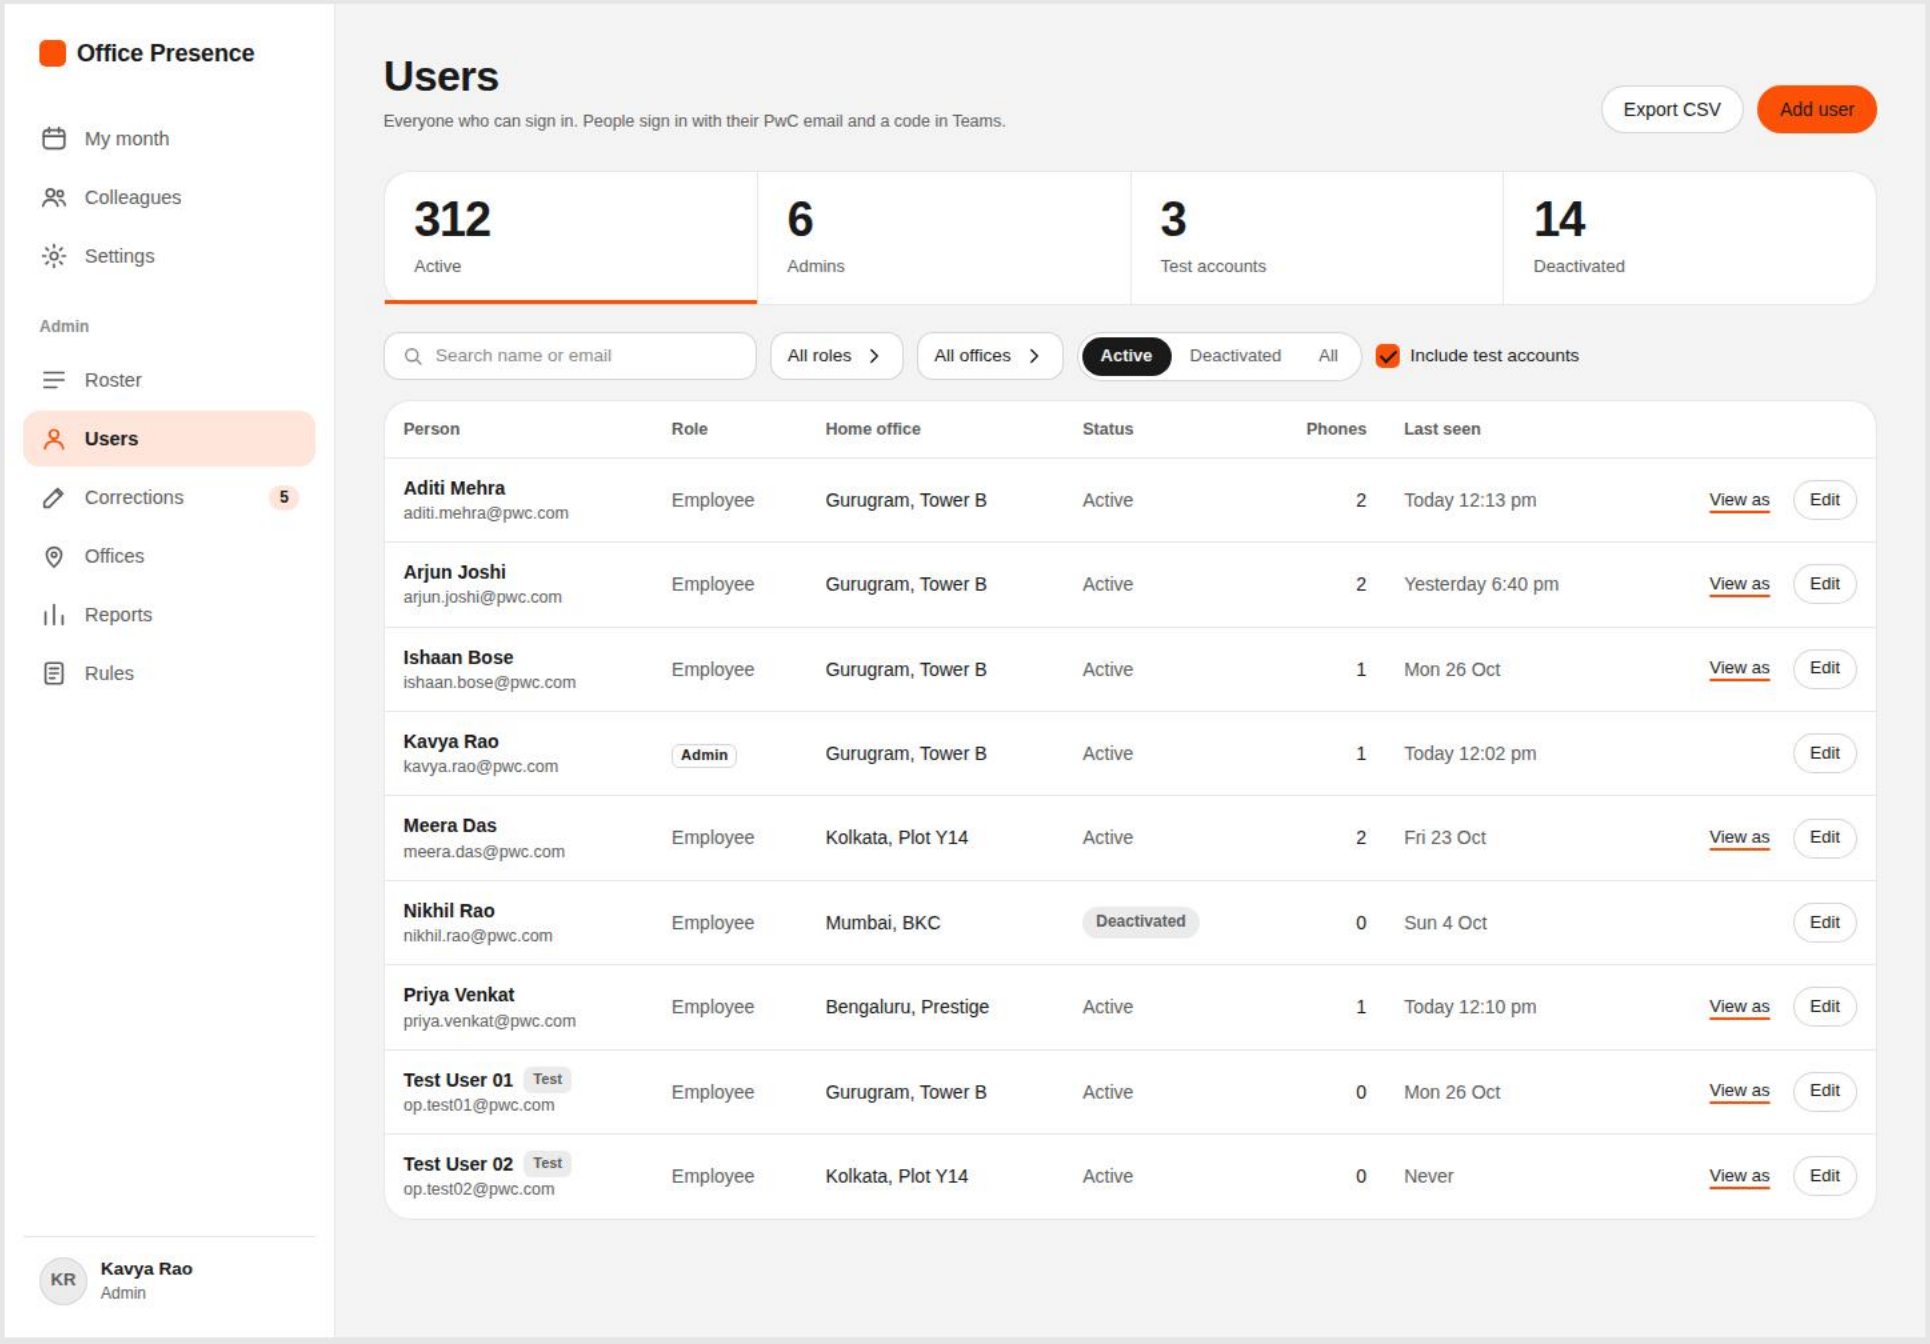

W / Admin / Corrections / Empty

Empty.

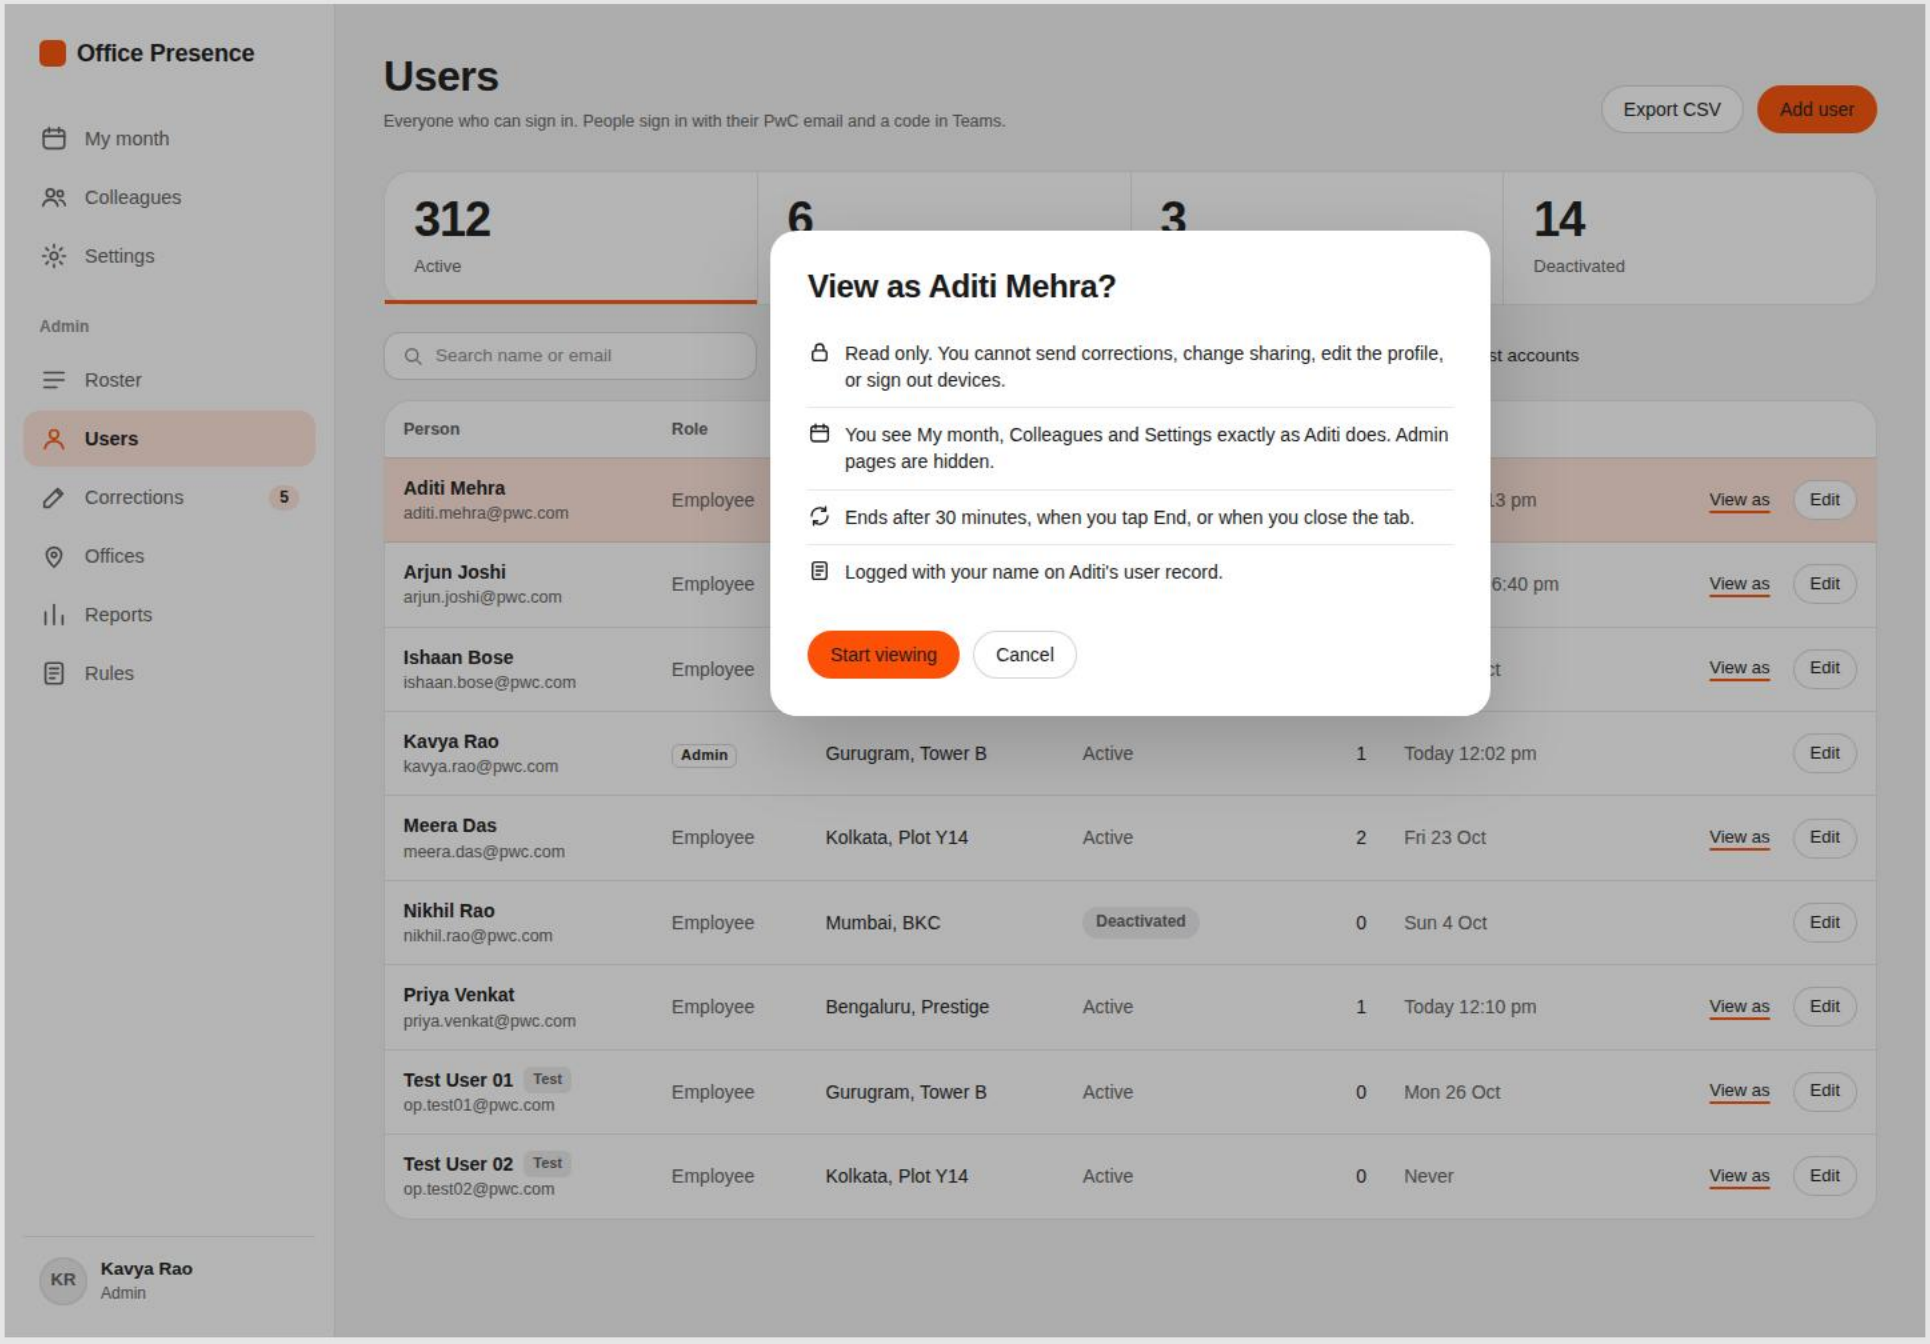

W / Admin / Users

Test accounts are hidden unless "Include test accounts" is on.

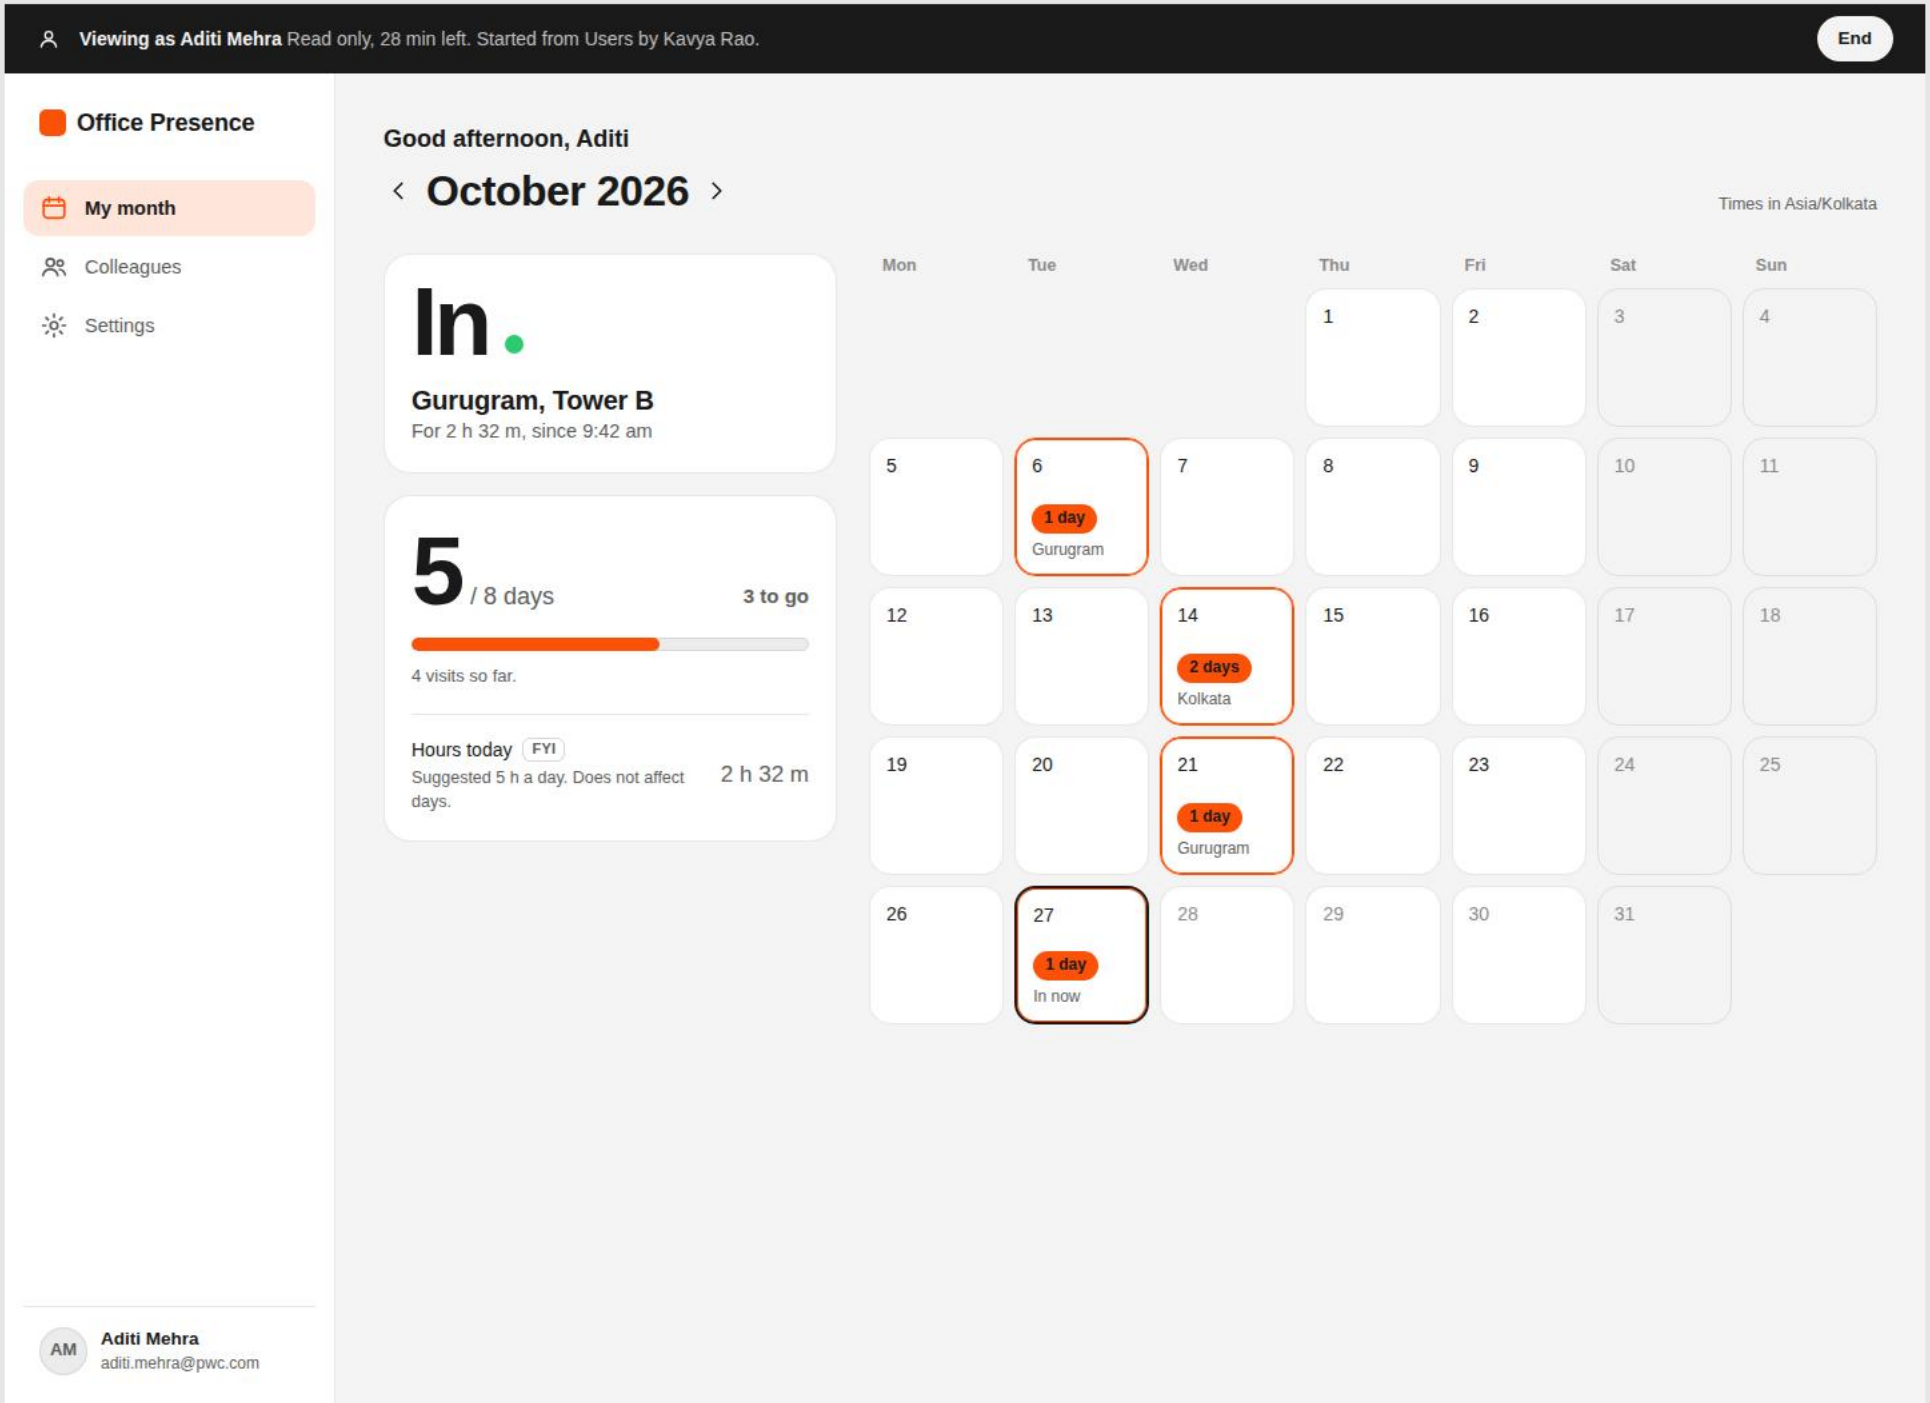

W / Admin / Users / View as

View as shows only for active non-admin users.

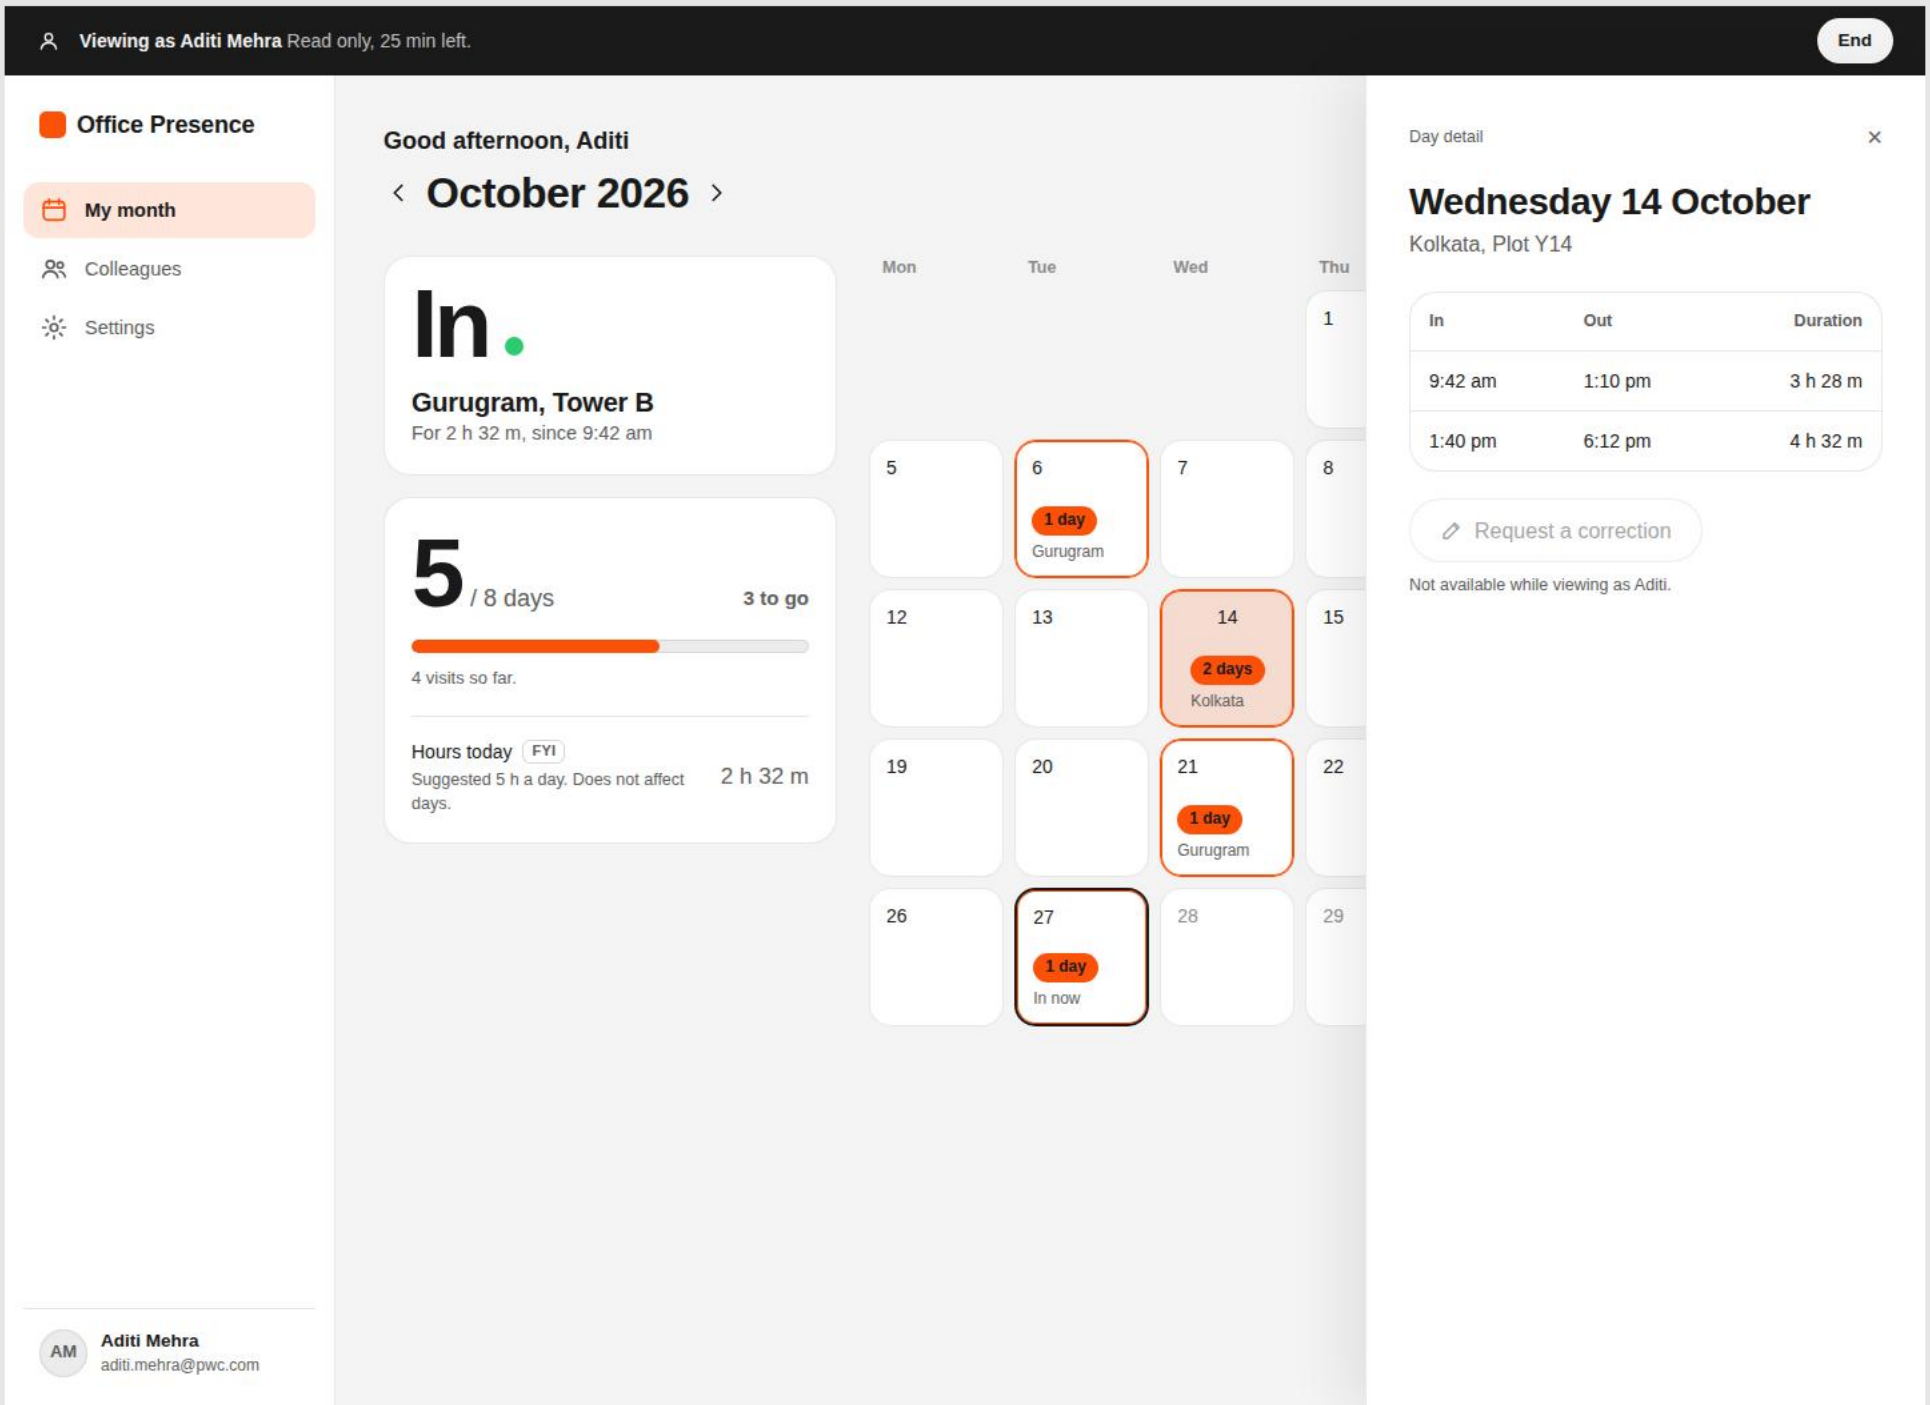

W / View as / My month

Banner sits above the whole app and cannot be closed. Rail shows the viewed user's rail.

W / View as / Read only

Write actions are disabled with one line saying why. Server rejects writes with the view-as token.

W / View as / Ended

Back on the page where the session started.

W / Admin / Users / Add user

Email must end in @pwc.com. No invite is sent.

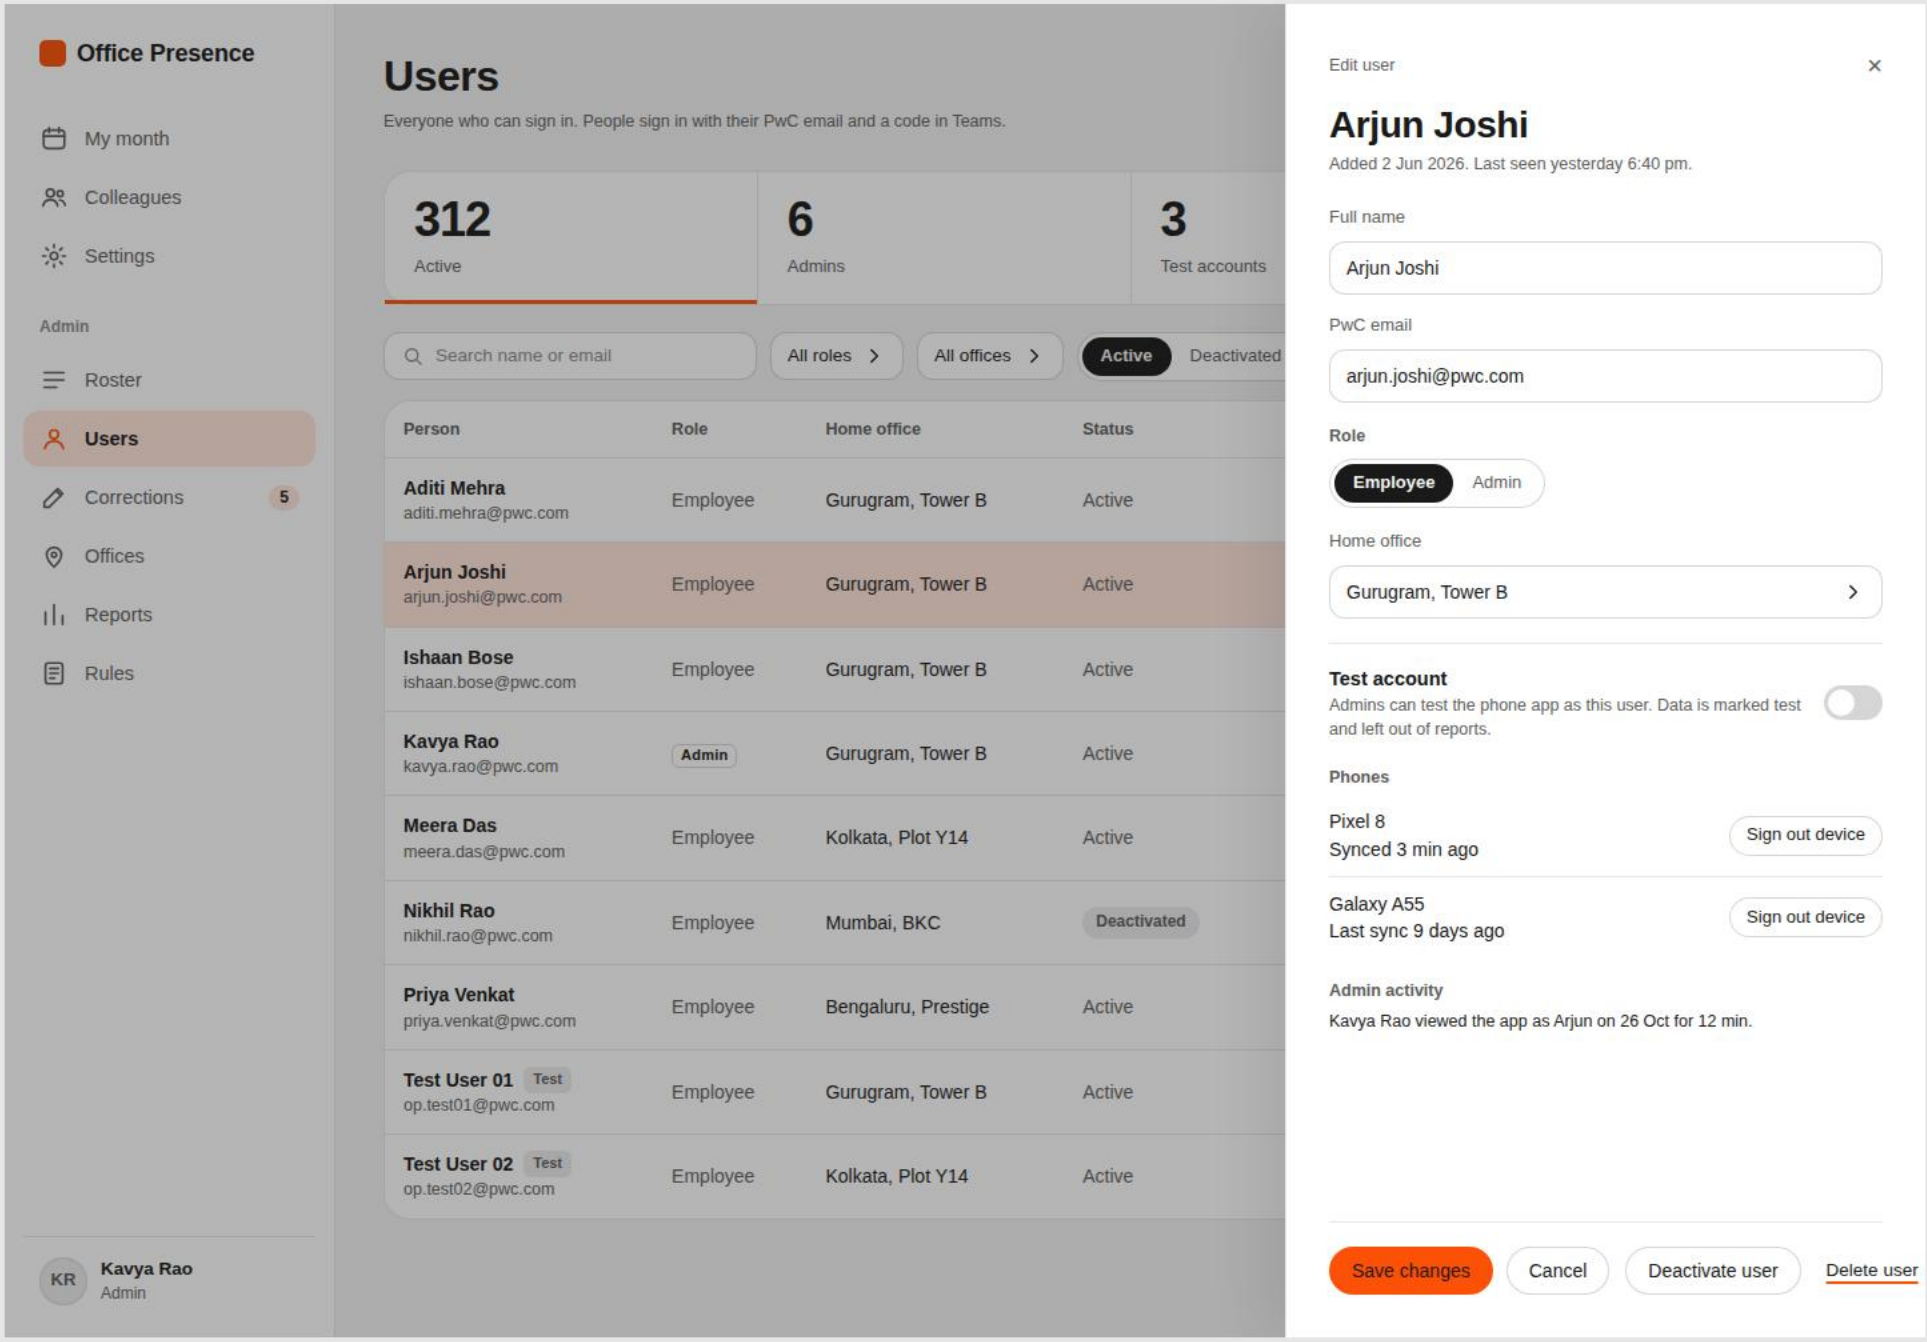

W / Admin / Users / Email in use

Checked on blur and on submit. Link opens the existing user, including deactivated ones.

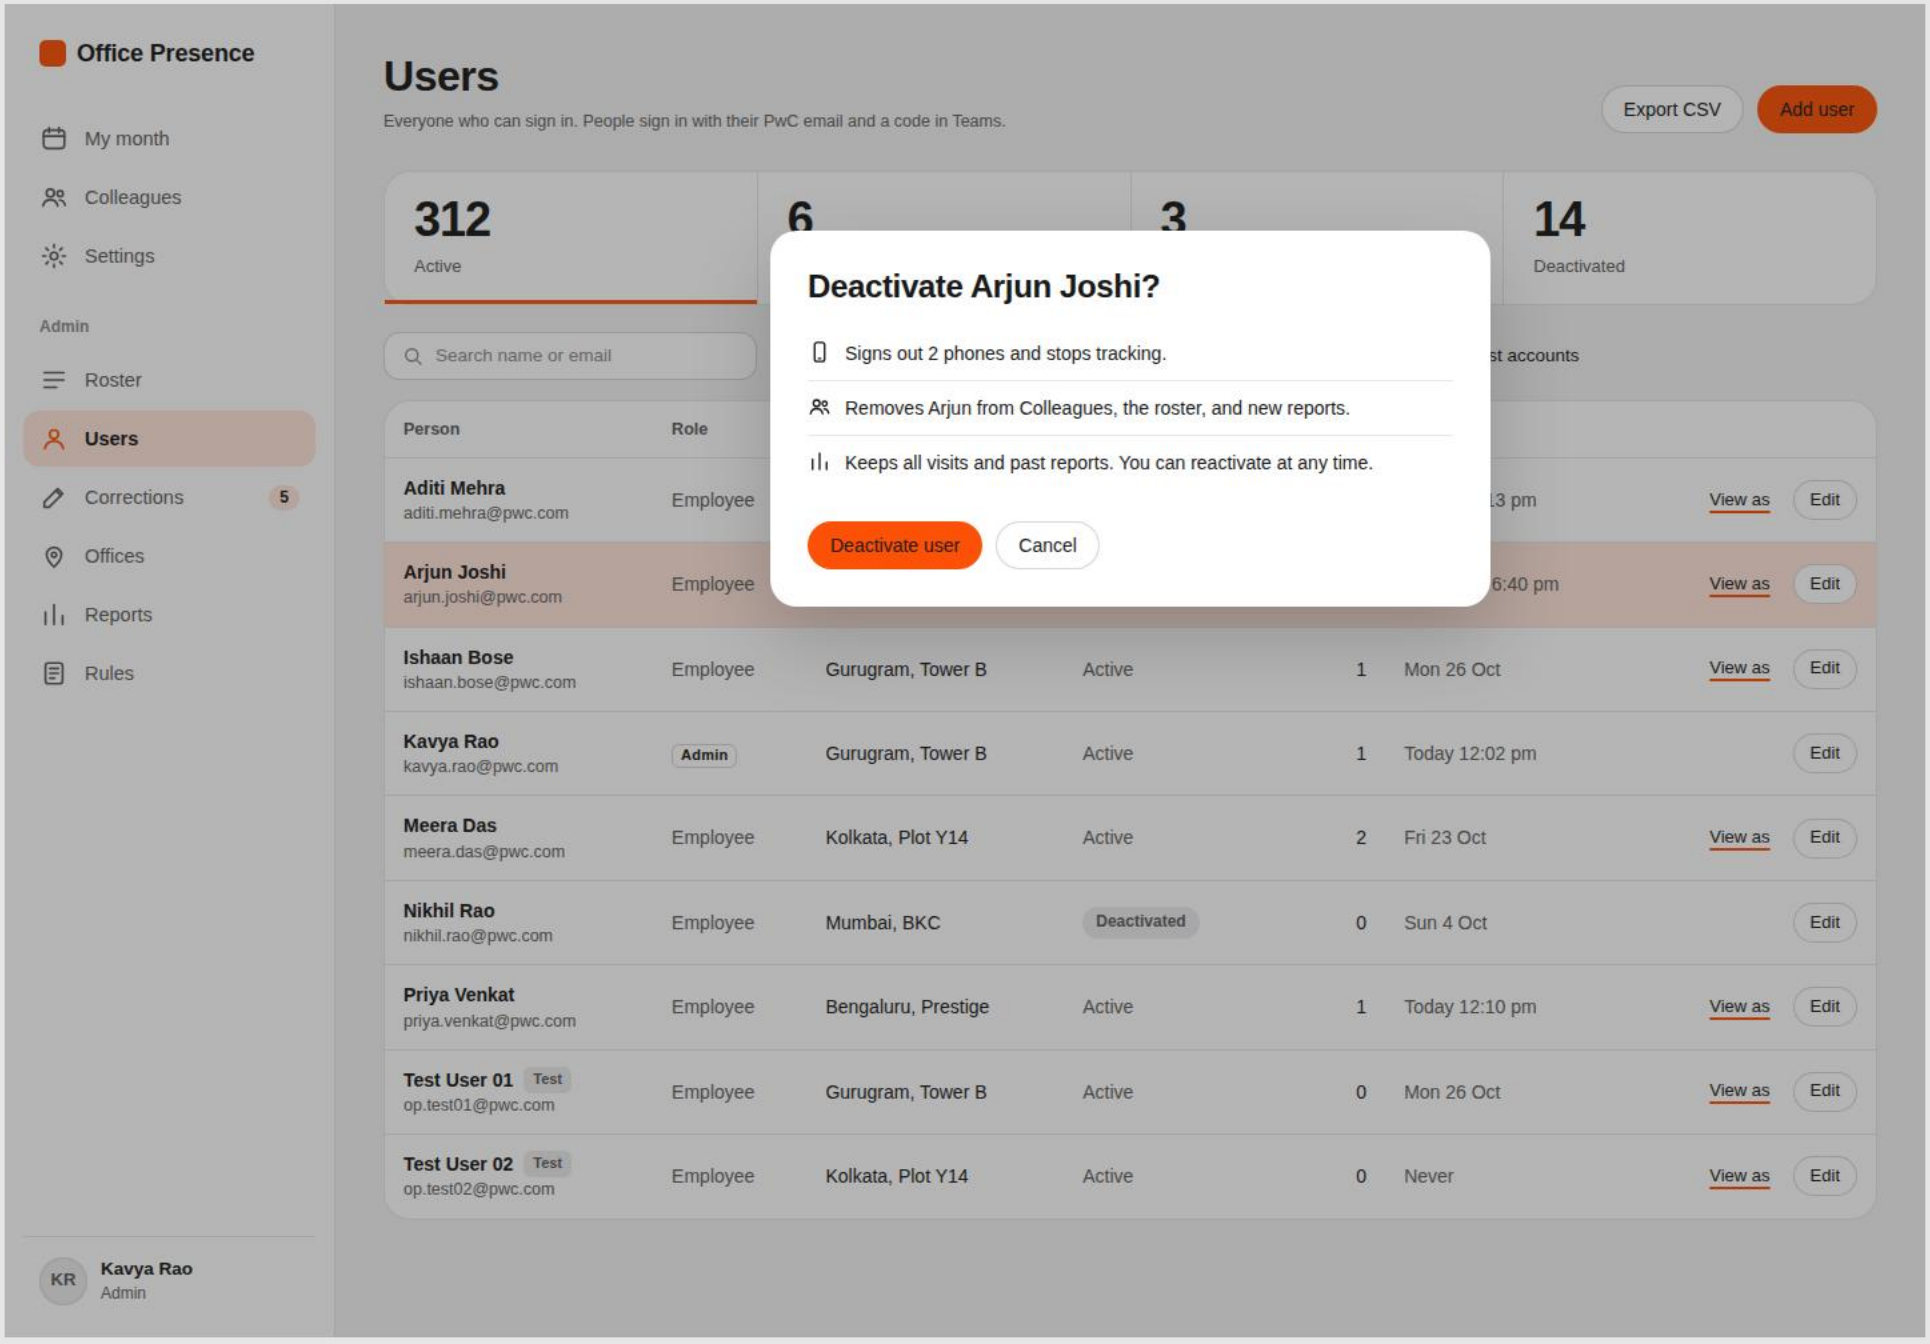

W / Admin / Users / Edit user

An admin cannot change their own role or deactivate themselves. Keep at least one admin.

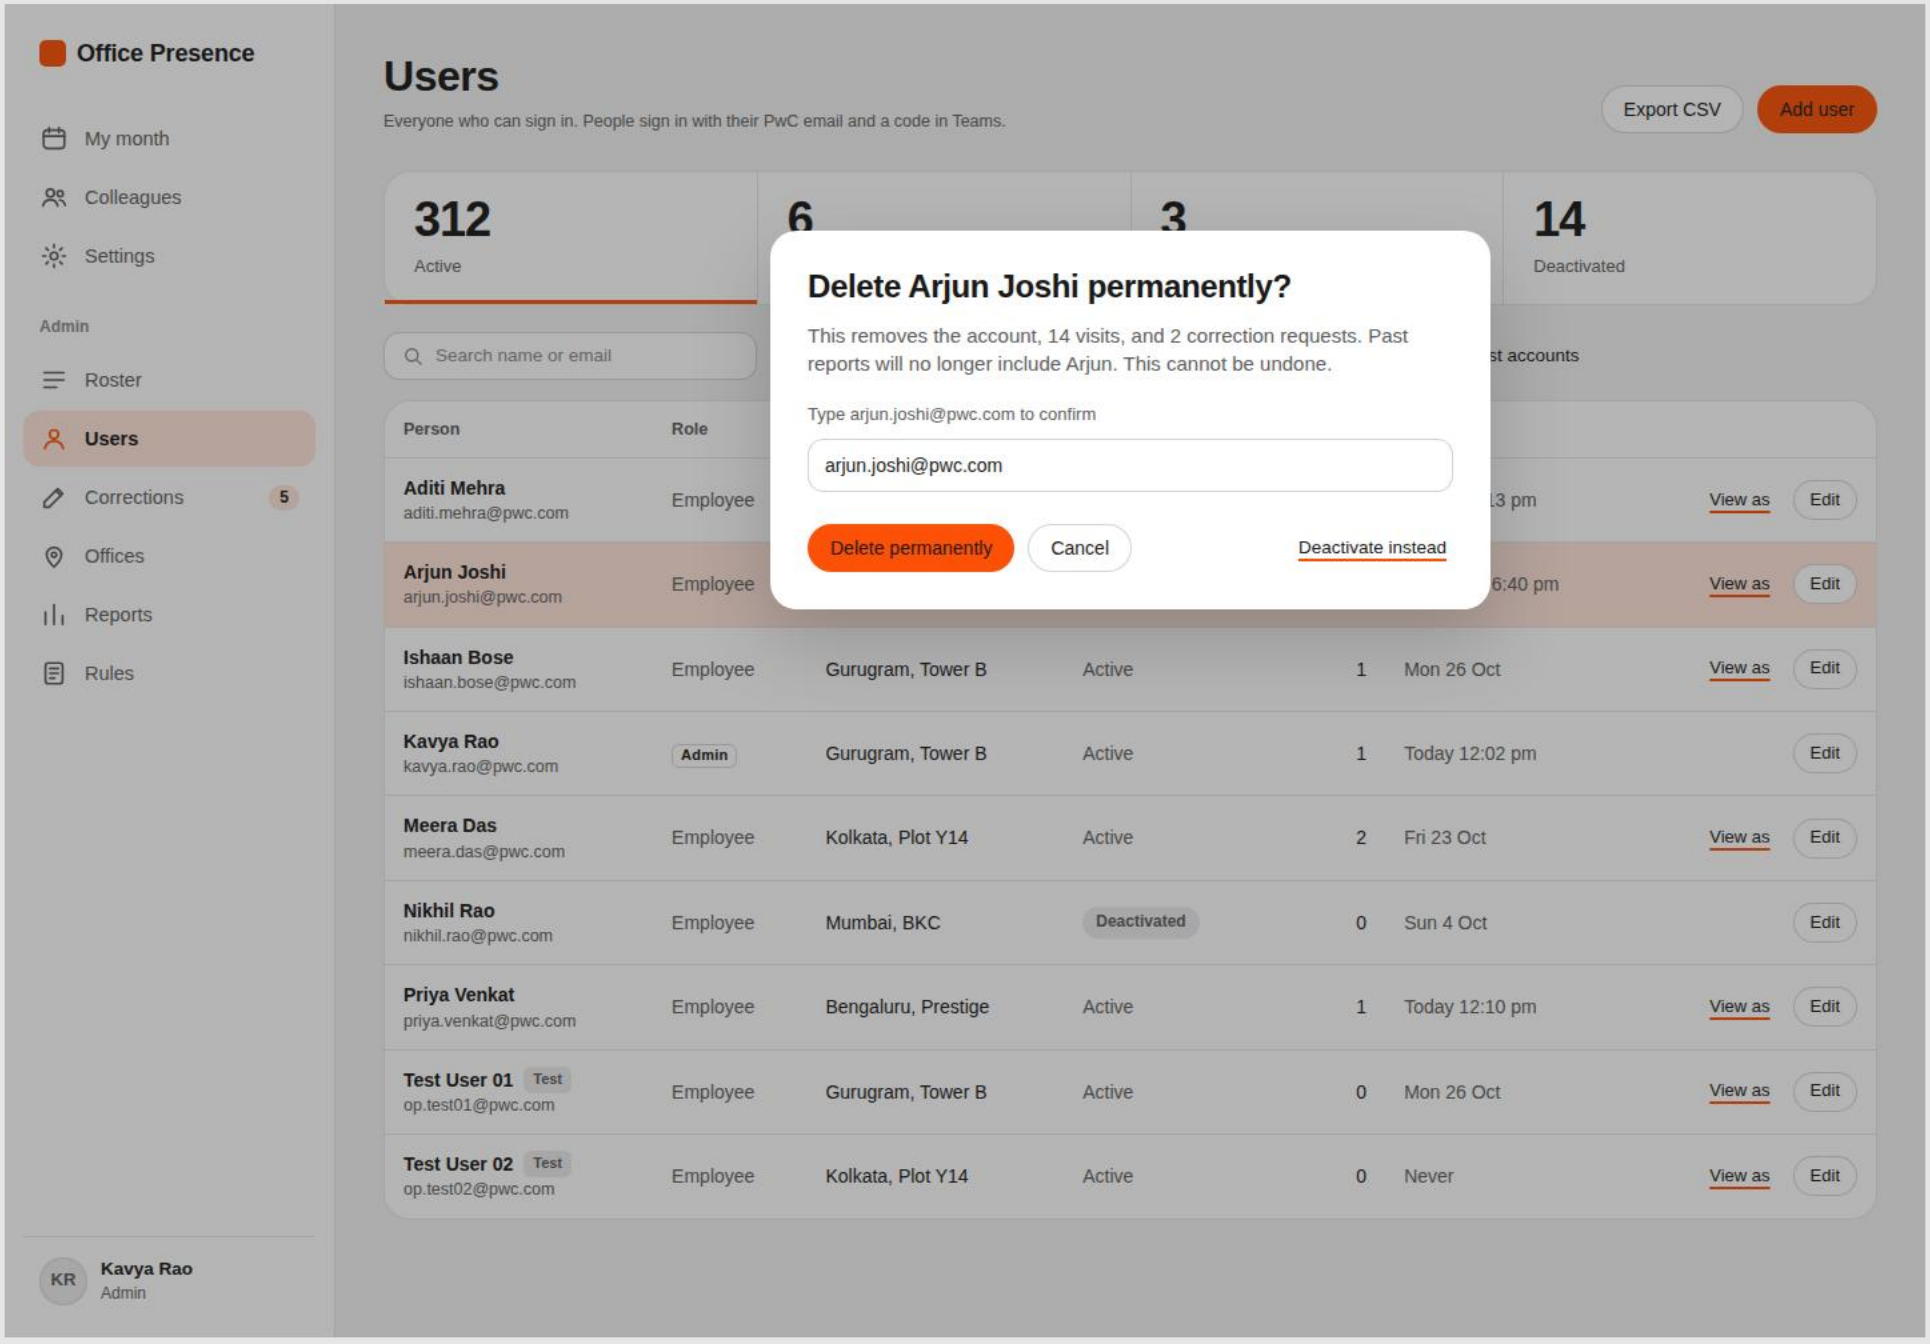

W / Admin / Users / Deactivate

Deactivate is the default removal. It signs out every phone on the server.

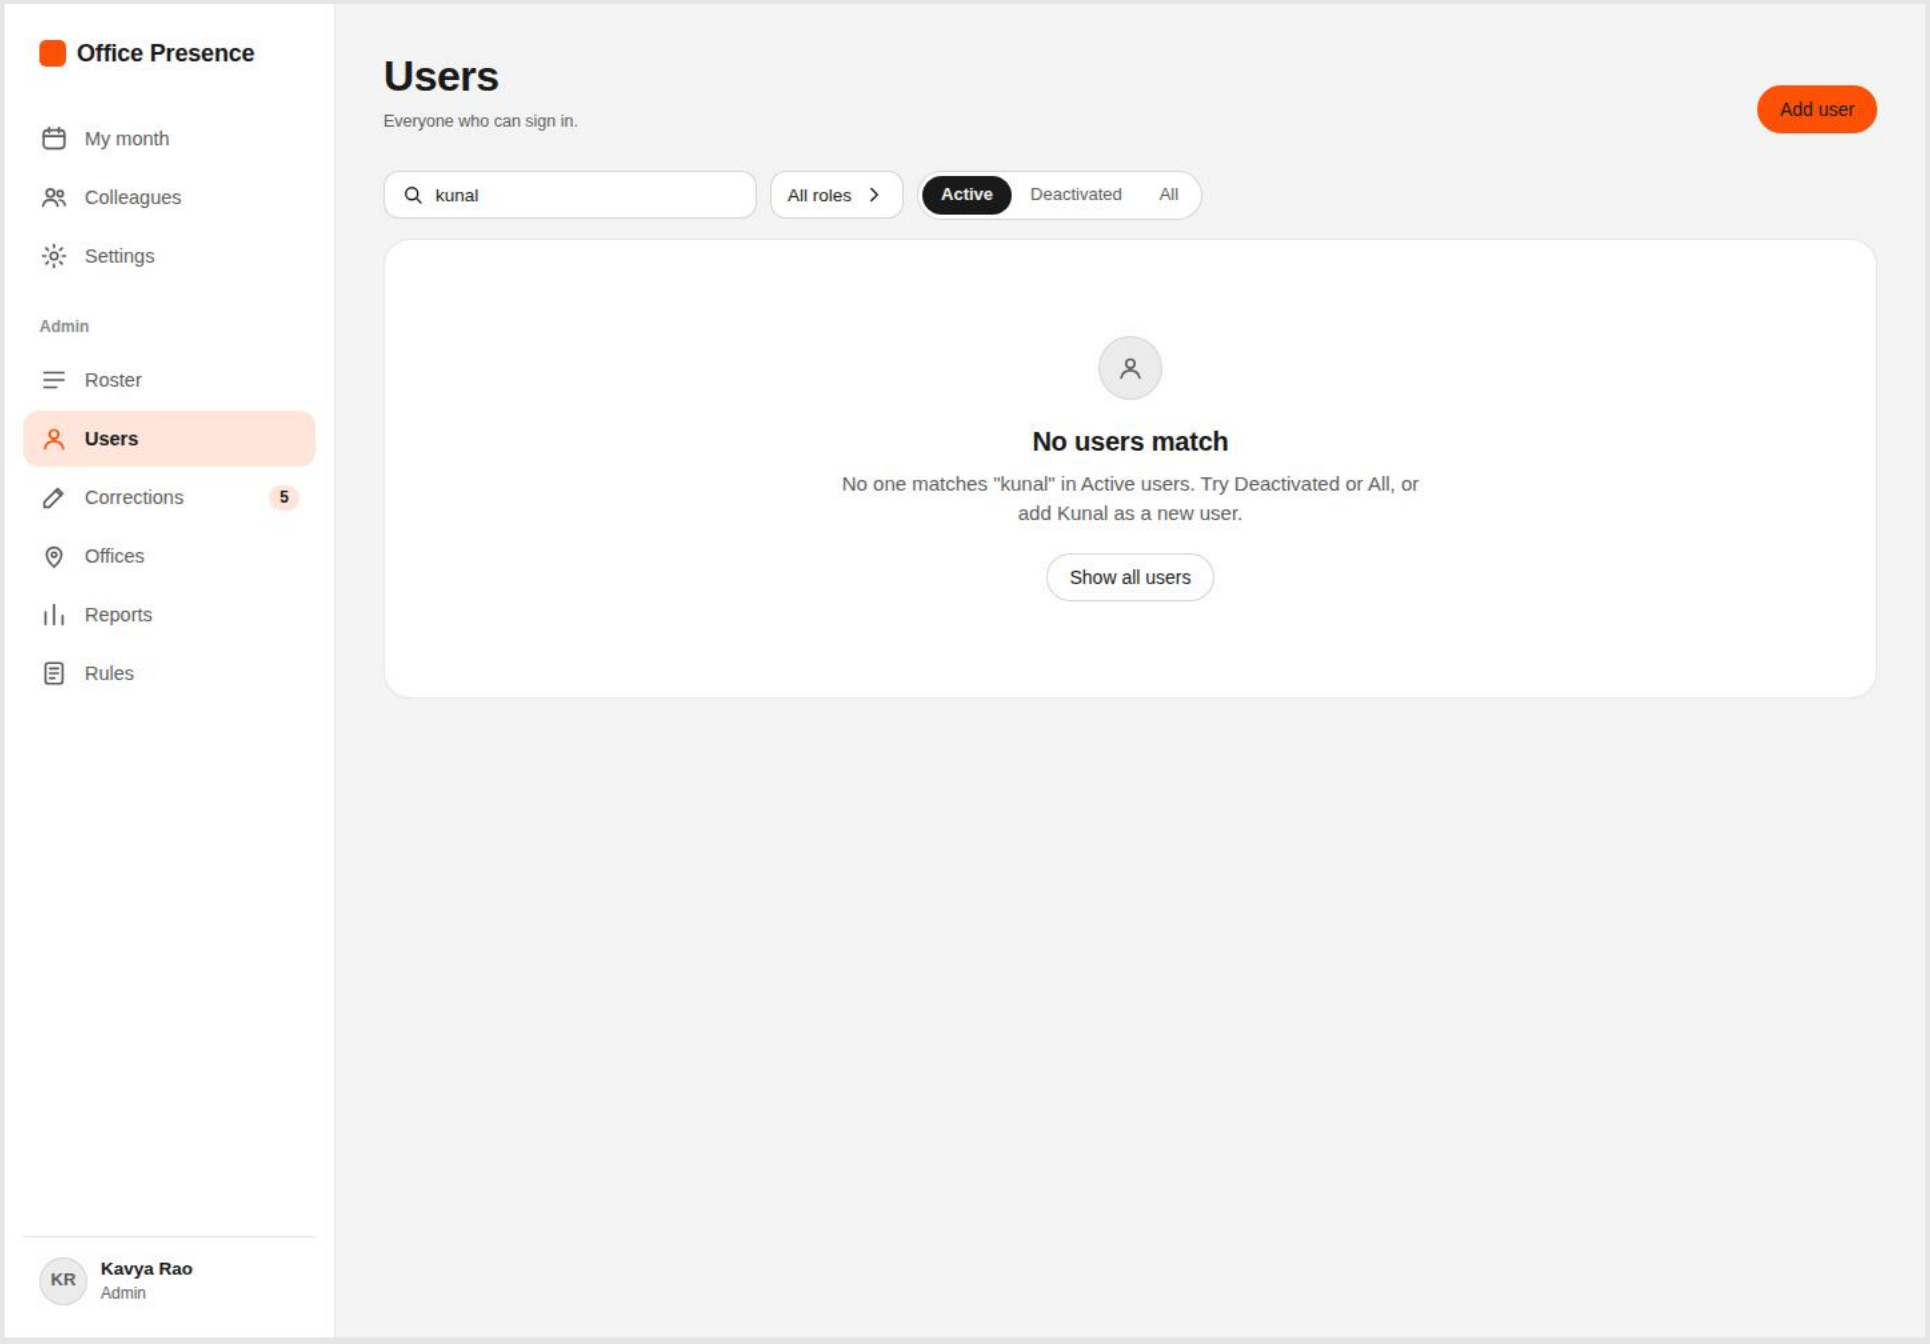

W / Admin / Users / Delete

Delete permanently stays disabled until the typed email matches exactly.

W / Admin / Users / No results

Empty search result.

W / Admin / Offices (list plus map)

Map is an editing tool for the selected office only. Radius circle is drawn to scale.
